Not Rated	30.85

Market overview

- + For the second quarter of 2020, the Bloomberg Barclays Municipal Index and the Bloomberg Barclays High Yield Municipal Index returned 2.73% and 4.55%, respectively. Investors continued to sell off municipal bonds in April amid disruption from the COVID-19 pandemic. However, May and June saw improved performance despite ongoing turmoil.
- + As April began, many states maintained quarantines with indeterminate timelines for closures of non-essential businesses. Ten-year AAA-rated municipals began the quarter trading at yields roughly 283% of the yield on comparable maturity US Treasuries, and as of quarter end were trading at 135%, still well above the historical norm of approximately 90%.
- + New issuance totaled \$107 billion for the quarter, up 15% from last quarter and 15% higher than the same quarter last year. At the beginning of the quarter, high-yield municipal bond funds continued to experience substantial outflows. High-yield municipal funds generally hold anywhere from 30% to 60% of their portfolios in investment grade securities. Consequently, funds had been selling both high-yield and investment grade securities into a distressed market to meet shareholder redemptions, causing price declines across the municipal universe.
- + Thus far, federal assistance to the municipal marketplace has included the Federal Reserve's plan to purchase up to \$500 billion in short-term municipal bonds to relieve pressure on short-term paper, which saw yields spike above 5% earlier in the year. Additionally, the Municipal Liquidity Facility (MLF) enables select large borrowers - two issuers per state, city or county are eligible - to use proceeds from the sale of notes to service their debt payments. Specific sectors such as airlines, transportation and hospitals have also received federal funding. These stimulus packages and those in other market segments are likely to push taxes higher. Because municipal bonds are one of the few income sources not subject to federal taxes, their income should be more attractive if taxes rise.
- + Municipal credits have a long history of low default rates as many provide essential services. Despite speculation, a flurry of downgrades has not yet occurred, mainly because most issuers have a rainy-day fund or cash on hand for difficult times. While we do not anticipate mass defaults, there could be hotspots, most likely among issuers already in trouble before COVID-19.

Positioning and outlook

- + We maintain the fund's preference for revenue bonds over general obligation bonds. The largest allocations were in the health care and special tax sectors.
- + Approximately 31% of fund holdings are non-rated by the national agencies but are assigned internal proprietary ratings that allow us to take advantage of pricing anomalies in the high-yield municipal market.
- + Though we cannot predict when the coronavirus pandemic will abate or how acute market volatility will be going forward, we continue to rely on our critical credit research to take advantage of marketplace dislocations to add value during this time of uncertainty.

Performance highlights

- + Invesco Short Duration High Yield Municipal Fund Class A shares at net asset value (NAV) posted a return of 1.59% for the second quarter, compared to its custom style-specific index, which returned 3.54%. (Please see the investment results table on page 2 for fund and index performance.)

Contributors to performance

- + Underweight exposure to AAA and AA-rated bonds added to relative return.
- + Security selection among state general obligation bonds added to relative return.
- + On the state level, security selection among Wisconsin and District of Columbia domiciled bonds added to relative return.

Detractors from performance

- + Security selection among BBB through B-rated bonds detracted from relative return.
- + Security selection in the special tax and tobacco sectors detracted from relative return.
- + On the state level, security selection among Illinois and Pennsylvania domiciled bonds detracted from relative results.

Expense ratios	% net	% total
Class A Shares	0.86	0.86
Class C Shares	1.61	1.61
Class Y Shares	0.61	0.61

Per the current prospectus

Net = Total annual operating expenses less any contractual fee waivers and/or expense reimbursements by the adviser in effect through at least Dec. 31, 2020. See current prospectus for more information.

Performance quoted is past performance and cannot guarantee comparable future results; current performance may be lower or higher. Visit invesco.com/performance for the most recent month-end performance.

Performance figures reflect reinvested distributions and changes in net asset value (NAV). Investment return and principal value will vary, and you may have a gain or a loss when you sell shares. No contingent deferred sales charge (CDSC) will be imposed on redemptions of Class C shares following one year from the date shares were purchased. Performance shown at NAV does not include applicable CDSC or front-end sales charges, which would have reduced the performance. Class Y shares have no sales charge; therefore, performance is at NAV. Returns less than one year are cumulative; all others are annualized. Fund performance reflects any applicable fee waivers and/or expense reimbursements. Had the adviser not waived fees and/or reimbursed expenses currently or in the past, returns would have been lower. See current prospectus for more information. Index returns do not reflect any fees, expenses, or sales charges.

1 Ratings source: Standard & Poor's, Moody's or Fitch, as applicable. A credit rating is an assessment provided by a nationally recognized statistical rating organization (NRSRO) of the creditworthiness of an issuer with respect to debt obligations, including specific securities, money market instruments or other debts. Ratings are measured on a scale that generally ranges from AAA (highest) to D (lowest); ratings are subject to change without notice. If securities are rated differently by the rating agencies, the higher rating is applied. Not Rated indicates the debtor was not rated and should not be interpreted as indicating low quality. A negative in Cash indicates fund activity that has accrued or is pending settlement. Pre-Refunded/Escrowed to Maturity (Prerefunded/ETM) bonds are issues backed by an escrow account, invested in US Treasuries, which is used to pay bondholders. Other includes bonds rated below single B and bonds currently not paying a coupon. For more information on the rating methodology, please visit www.standardandpoors.com and select 'Understanding Ratings' under Rating Resources on the homepage; www.moody.com and select 'Rating Methodologies' under Research and Ratings on the homepage; www.fitchratings.com and select 'Ratings Definitions' on the homepage.

Class Y shares are available only to certain investors. See the prospectus for more information.

Income may be subject to state and local taxes. There is no guarantee that the fund's income will be exempt from federal income taxes, including the alternative minimum tax.

Diversification does not guarantee a profit or eliminate the risk of loss.

The Custom Invesco Short Duration High Yield Municipal Index consists of 60% S&P Municipal Bond High Yield Index, 40% S&P Municipal Bond Short Index. An investment cannot be made directly in an index.

The Bloomberg Barclays Municipal Bond Index is an unmanaged index considered representative of the tax-exempt bond market. An investment cannot be made directly in an index.

The Bloomberg Barclays Municipal High Yield Bond Index is an unmanaged index considered representative of noninvestment-grade bonds. An investment cannot be made directly in an index.

Option adjusted duration is a measure, as estimated by the fund's portfolio managers, of a bond fund's price sensitivity to changes in interest rates. It takes into account mortgage prepayments, puts, adjustable coupons and potential call dates. **Weighted average maturity (WAM)** is a measure, as estimated by the fund's portfolio managers, of the length of time the average security in a bond fund will mature or be redeemed by its issuer. It takes into account mortgage prepayments, puts, adjustable coupons and potential call dates.

About risk

All or a portion of the fund's otherwise tax-exempt income may be subject to the federal alternative minimum tax.

An issuer may be unable to meet interest and/or principal payments, thereby causing its instruments to decrease in value and lowering the issuer's credit rating.

Derivatives may be more volatile and less liquid than traditional investments and are subject to market, interest rate, credit, leverage, counterparty and management risks. An investment in a derivative could lose more than the cash amount invested.

Interest rate risk refers to the risk that bond prices generally fall as interest rates rise and vice versa.

Securities which are in the medium- and lower grade categories generally offer higher yields than are offered by higher-grade securities of similar maturity, but they also generally involve more volatility and greater risks, such as greater credit risk, market risk, liquidity risk, management risk, and regulatory risk.

The fund may invest in municipal securities issued by entities having similar characteristics, which may make the fund more susceptible to fluctuation.

Municipal securities have the risk that legislative or economic conditions could affect an issuer's ability to make principal and/or interest payments.

The fund is considered non-diversified and may experience greater volatility than a more diversified investment.

The fund is subject to certain other risks. Please see the current prospectus for more information regarding the risks associated with an investment in the fund.
