

Invesco International Dividend Achievers™ ETF

As of December 31, 2022

Fund description

The Invesco International Dividend Achievers™ ETF (Fund) is based on the Nasdaq International Dividend Achievers™ Index (Index). The Fund will normally invest at least 90% of its total assets in dividend-paying common stocks and other securities that comprise the Index. The Index is designed to identify an international group of American Depositary Receipts, Global Depositary Receipts and non-U.S. common or ordinary stocks that have qualified as International Dividend Achievers™. These companies have increased their aggregate annual regular cash dividend payments consistently for at least each of the last five consecutive years. The Index is computed using the net return, which withholds applicable taxes for non-resident investors. The Fund and the Index are reconstituted annually in March and rebalanced quarterly in March, June, September and December.

Returns less than one year are cumulative. Performance data quoted represents past performance. Past performance is not a guarantee of future results; current performance may be higher or lower than performance quoted. Investment returns and principal value will fluctuate and Shares, when redeemed, may be worth more or less than their original cost. See invesco.com to find the most recent month-end performance numbers. Market returns are based on the midpoint of the bid/ask spread at 4 p.m. ET and do not represent the returns an investor would receive if shares were traded at other times. Fund performance reflects fee waivers, absent which, performance data quoted would have been lower. Nasdaq International Dividend Achievers Index performance prior to March 9, 2015 reflects that of the Underlying Index, Nasdaq International Dividend Achievers Index (gross total return, which reflects dividends paid). From March 9, 2015, forward, the Index performance reflects that of the Underlying Index, Nasdaq International Dividend Achievers Index (net total return) AND IS NOT INTENDED FOR ANY THIRD PARTY USE.

Index returns do not represent Fund returns. An investor cannot invest directly in an index. Neither the underlying Index nor the benchmark indexes charge management fees or brokerage expenses, and no such fees or expenses were deducted from the performance shown; nor do any of the indexes lend securities, and no revenues from securities lending were added to the performance shown. In addition, the results actual investors might have achieved would have differed from those shown because of differences in the timing, amounts of their investments, and fees and expenses associated with an investment in the Fund. ¹The MSCI EAFE® Index is an unmanaged index considered representative of stocks of Europe, Australasia and the Far East. The index is computed using the net return, which withholds applicable taxes for non-resident investors.

Investment risks

There are risks involved with investing in ETFs, including possible loss of money. Shares are not actively managed and are subject to risks similar to those of stocks, including those regarding short selling and margin maintenance requirements. Ordinary brokerage commissions apply. The Fund's return may not match the return of the Underlying Index. The Fund is subject to certain other risks. Please see the current prospectus for more information regarding the risk associated with an investment in the Fund.

Securities that pay high dividends as a group can fall out of favor with the market, causing such companies to underperform companies that do not pay high dividends.

Investments focused in a particular industry or sector, such as energy, are subject to greater risk, and are more greatly impacted by market volatility, than more diversified investments.

Because the Fund invests a significant portion of its assets in companies that are domiciled in Canada, it's particularly sensitive to political, economic and social conditions in that country.

The performance of an investment concentrated in issuers of a certain region or country is expected to be closely tied to conditions within that region and to be more volatile than more geographically diversified investments.

The Fund may become "non-diversified," as defined under the Investment Company Act of 1940, as amended, solely as a result of a change in relative market capitalization or index weighting of one or more constituents of the Index. Shareholder approval will not be sought when the Fund crosses from diversified to non-diversified status under such circumstances.

The risks of investing in securities of foreign issuers, including emerging market issuers, can include fluctuations in foreign currencies, political and economic instability, and foreign taxation issues.

Important information

Typically, security classifications used in calculating allocation tables are as of the last trading day of the previous month.

The Global Industry Classification Standards was developed by and is the exclusive property and a service mark of MSCI, Inc. and Standard & Poor's.

Glossary

30 Day SEC Unsubsidized Yield reflects the 30-day yield if the investment adviser were not waiving all or part of its fee or reimbursing the fund for part of its expenses. Total return would have also been lower in the absence of these temporary reimbursements or waivers.

30 Day SEC Yield is based on a 30-day period and is computed by dividing the net investment income per share earned during the period by the maximum offering price per share on the last day of the period.

Intraday NAV is a symbol representing estimated fair value based on the most recent intraday price of underlying assets.

Weighted Harmonic Average Stock Price-to-Book-Value Ratio (P/B Ratio) is the ratio of a stock's market price to a company's net asset value.

Weighted Harmonic Average Stock Price-to-Earnings Ratio (P/E Ratio) is the share price divided by earnings per share. It is measured on a 12-month trailing basis.

Weighted Average Return on Equity is net income divided by net worth.

Weighted Market Capitalization is the sum of each underlying securities market value.
