

Invesco Dynamic Energy Exploration & Production ETF

As of Dec. 31, 2019

Fund Description

The Invesco Dynamic Energy Exploration & Production ETF (Fund) is based on the Dynamic Energy Exploration & Production IntellidexSM Index (Intellidex Index). The Fund will normally invest at least 90% of its total assets in the securities that comprise the Index. The Intellidex Index thoroughly evaluates companies based on a variety of investment merit criteria, including: price momentum, earnings momentum, quality, management action, and value. The Underlying Intellidex Index is composed of securities of 30 U.S. companies involved in the exploration and production of natural resources used to produce energy. These companies are engaged principally in exploration, extraction and production of crude oil and natural gas from land-based or offshore wells. These companies include petroleum refineries that process the crude oil into finished products, such as gasoline and automotive lubricants, and companies involved in gathering and processing natural gas, and manufacturing natural gas liquid. The Fund is rebalanced and reconstituted quarterly in February, May, August and November

|--|-----------------------|
| Dynamic Energy Exploration & Production Intellidex | DWETR |
| Index Provider | ICE Data Indices, LLC |

Fund Inception: Oct. 26, 2005

Shares are not FDIC insured, may lose value and have no bank guarantee.

Shares are not individually redeemable and owners of the Shares may acquire those Shares from the Fund and tender those Shares for redemption to the Fund in Creation Unit aggregations only, typically consisting of 50,000 Shares.

Growth of \$10,000

Data beginning 10 years prior to the ending date of Dec. 31, 2019. Fund performance shown at NAV.

Fund Performance & Index History (%)

| | 1 year | 3 year | 5 year | 10 year | Fund Inception |
|---|--------|--------|--------|---------|----------------|
| Underlying Index | | | | | |
| Dynamic Energy Exploration & Production Intellidex Index | -1.02 | -8.11 | -6.45 | 2.99 | 2.63 |
| Benchmark Index | | | | | |
| S&P Composite 1500 Oil & Gas Exploration & Production Index | 7.64 | -7.83 | -7.52 | -2.04 | 1.12 |
| Fund | | | | | |
| NAV | -1.70 | -8.69 | -6.92 | 2.35 | 2.01 |
| Market Price | -1.19 | -8.68 | -6.94 | 2.35 | 2.01 |

Returns less than one year are cumulative. Performance data quoted represents past performance. Past performance is not a guarantee of future results; current performance may be higher or lower than performance quoted. Investment returns and principal value will fluctuate and Shares, when redeemed, may be worth more or less than their original cost. See invesco.com to find the most recent month-end performance numbers. Market returns are based on the midpoint of the bid/ask spread at 4 p.m. ET and do not represent the returns an investor would receive if shares were traded at other times. Fund performance reflects fee waivers, absent which, performance data quoted would have been lower.

10-Year Index Statistics

| | Alpha | Beta | Correlation | Sharpe Ratio | Volatility (%) |
|---|-------|------|-------------|--------------|----------------|
| Dynamic Energy Exploration & Production Intellidex Index | - | - | - | 0.09 | 27.42 |
| S&P Composite 1500 Oil & Gas Exploration & Production Index | 5.34 | 0.95 | 0.93 | -0.10 | 26.96 |

Alpha, beta and correlation are that of the underlying index.

Index returns do not represent Fund returns. An investor cannot invest directly in an index.

Neither the underlying Index nor the benchmark indexes charge management fees or brokerage expenses, and no such fees or expenses were deducted from the performance shown; nor do any of the indexes lend securities, and no revenues from securities lending were added to the performance shown. In addition, the results actual investors might have achieved would have differed from those shown because of differences in the timing, amounts of their investments, and fees and expenses associated with an investment in the Fund.

The S&P Composite 1500 Oil and Gas Exploration & Production (S&P Oil & Gas Exploration & Production) Index consists of all oil and gas exploration and production stocks included in the S&P Composite 1500 Index.

| 2018 | -22.59 | -21.06 |
| 2019 | -1.02 | 7.64 |

About risk

There are risks involved with investing in ETFs, including possible loss of money. Shares are not actively managed and are subject to risks similar to those of stocks, including those regarding short selling and margin maintenance requirements. Ordinary brokerage commissions apply. The Fund's return may not match the return of the Underlying Index. The Fund is subject to certain other risks. Please see the current prospectus for more information regarding the risk associated with an investment in the Fund.

The Fund is non-diversified and may experience greater volatility than a more diversified investment.

Stocks of small and mid-sized companies tend to be more vulnerable to adverse developments, may be more volatile, and may be illiquid or restricted as to resale.

Investments focused in a particular industry, such as energy exploration and production and oil and gas services, are subject to greater risk, and are more greatly impacted by market volatility, than more diversified investments.

The Fund may engage in frequent trading of its portfolio securities in connection with the rebalancing or adjustment of the Underlying Index.

The **Intraday NAV** is a symbol representing estimated fair value based on the most recent intraday price of underlying assets. **Volatility** is the annualized standard deviation of index returns. **Sharpe Ratio** is a risk-adjusted measure calculated using standard deviation and excess return to determine reward per unit of risk. A higher Sharpe Ratio indicates better risk-adjusted performance. **Correlation** indicates the degree to which two investments have historically moved in the same direction and magnitude. **Alpha** is a measure of performance on a risk-adjusted basis. **Weighted Harmonic Average Stock Price-to-Earnings Ratio (P/E Ratio)** is the share price divided by earnings per share. It is measured on a 12-month trailing basis. **Weighted Harmonic Average Stock Price-to-Book-Value Ratio (P/B Ratio)** is the ratio of a stock's market price to a company's net asset value. **Weighted Harmonic Average** is a method of calculating an average value that lessens the impact of large outliers and increases the impact of small ones. **Weighted Average Return on Equity** is net income divided by net worth. **Weighted Market Capitalization** is the sum of each underlying securities' market value. The **30-Day SEC Yield** is based on a 30-day period and is computed by dividing the net investment income per share earned during the period by the maximum offering price per share on the last day of the period. The **30-Day SEC Unsubsidized Yield** reflects the 30-day yield if the investment adviser were not waiving all or part of its fee or reimbursing the fund for part of its expenses. Total return would have also been lower in the absence of these temporary reimbursements or waivers. **Beta** is a measure of risk representing how a security is expected to respond to general market movements. **Smart Beta** represents an alternative and selection index based methodology that seeks to outperform a benchmark or reduce portfolio risk, or both. Smart beta funds may underperform cap-weighted benchmarks and increase portfolio risk.

Typically, security classifications used in calculating allocation tables are as of the last trading day of the previous month.
