

# Invesco Large Cap Growth ETF

**PWB**

## Fund description

The Invesco Large Cap Growth ETF (Fund) is based on the Dynamic Large Cap Growth Intellidex<sup>SM</sup> Index (Index). The Fund will normally invest at least 90% of its total assets in common stocks that comprise the Index. The Index seeks to provide capital appreciation while maintaining consistent stylistically accurate exposure. The Style Intellidexes apply a rigorous 10-factor style isolation process to objectively segregate companies into their appropriate investment style and size universe. The Fund and the Index are rebalanced and reconstituted quarterly in February, May, August and November.

**Effective after the close of markets on Aug. 25, 2023, the Fund's name changed from Invesco Dynamic Large Cap Growth ETF to Invesco Large Cap Growth ETF. No other changes were made to the Fund. See the prospectus for more information.**

Returns less than one year are cumulative. Performance data quoted represents past performance. Past performance is not a guarantee of future results; current performance may be higher or lower than performance quoted. Investment returns and principal value will fluctuate and Shares, when redeemed, may be worth more or less than their original cost. See [invesco.com](https://www.invesco.com) to find the most recent month-end performance numbers. Market returns are based on the midpoint of the bid/ask spread at 4 p.m. ET and do not represent the returns an investor would receive if shares were traded at other times. Fund performance reflects fee waivers, absent which, performance data quoted would have been lower. Please keep in mind that high, double-digit and/or triple-digit returns are highly unusual and cannot be sustained.

Index returns do not represent Fund returns. An investor cannot invest directly in an index.

Neither the underlying Index nor the benchmark indexes charge management fees or brokerage expenses, and no such fees or expenses were deducted from the performance shown; nor do any of the indexes lend securities, and no revenues from securities lending were added to the performance shown. In addition, the results actual investors might have achieved would have differed from those shown because of differences in the timing, amounts of their investments, and fees and expenses associated with an investment in the Fund.

#### Sector allocation (%)

#### Investment risks

There are risks involved with investing in ETFs, including possible loss of money. Shares are not actively managed and are subject to risks similar to those of stocks, including those regarding short selling and margin maintenance requirements. Ordinary brokerage commissions apply. The Fund's return may not match the return of the Underlying Index. The Fund is subject to certain other risks. Please see the current prospectus for more information regarding the risk associated with an investment in the Fund.

Growth stocks tend to be more sensitive to changes in their earnings and can be more volatile.

Investments focused in a particular sector, such as information technology, are subject to greater risk, and are more greatly impacted by market volatility, than more diversified investments.

The Fund may engage in frequent trading of its portfolio securities in connection with the rebalancing or adjustment of the Underlying Index.

The Fund may become "non-diversified," as defined under the Investment Company Act of 1940, as amended, solely as a result of a change in relative market capitalization or index weighting of one or more constituents of the Index. Shareholder approval will not be sought when the Fund crosses from diversified to non-diversified status under such circumstances.

#### Important information

Typically, security classifications used in calculating allocation tables are as of the last trading day of the previous month.

The Global Industry Classification Standard was developed by and is the exclusive property and a service mark of MSCI, Inc. and Standard & Poor's.

#### Glossary

**30 Day SEC Unsubsidized Yield** reflects the 30-day yield if the investment adviser were not waiving all or part of its fee or reimbursing the fund for part of its expenses. Total return would have also been lower in the absence of these temporary reimbursements or waivers.

**30 Day SEC Yield** is based on a 30-day period and is computed by dividing the net investment income per share earned during the period by the maximum offering price per share on the last day of the period.

**Intraday NAV** is a symbol representing estimated fair value based on the most recent intraday price of underlying assets.

**Weighted Harmonic Average Stock Price-to-Book-Value Ratio (P/B Ratio)** is the ratio of a stock's market price to a company's net asset value.

**Weighted Harmonic Average Stock Price-to-Earnings Ratio (P/E Ratio)** is the share price divided by earnings per share. It is measured on a 12-month trailing basis.

**Weighted Average Return on Equity** is net income divided by net worth.

**Weighted Market Capitalization** is the sum of each underlying securities market value.
