Global Technology Leaders CDA Portfolio 2023-4
A 15-month sector unit trust

Objective
The Portfolio seeks to provide capital appreciation. The Portfolio seeks to achieve its objective by investing in a portfolio primarily consisting of stocks in the technology industry that have a global presence. The technology industry may be categorized into communication equipment, computers & peripherals, electronic equipment instruments & components, IT services, internet software & services, semiconductors & equipment and software companies.

The Sponsor constructs the Portfolio to take advantage of potential opportunities within the technology industry based on its current outlook on continually evolving industry paradigms. Rather than focus on particular sectors or subsectors, the Sponsor takes a holistic view of the technology industry and chooses to focus primarily on those companies with disruptive technologies participating in markets tied to particular secular themes. These secular themes may include: 5G, artificial intelligence ("AI"), cloud infrastructure and services, cybersecurity, data analytics, fintech, internet of things ("IoT"), and remote working and learning.

Portfolio composition (As of the business day before deposit date)

Application Software
Adobe, Inc. ADBE

About risk

There is no assurance that a unit investment trust will achieve its investment objective. An investment in this unit investment trust is subject to market risk, which is the possibility that the market values of securities owned by the trust will decline and that the value of trust units may therefore be less than what you paid for them. This trust is unmanaged and its portfolio is not intended to change during the trust's life except in limited circumstances. Accordingly, you can lose money investing in this trust. The trust should be considered as part of a long-term investment strategy and you should consider your ability to pursue it by investing in successive trusts, if available. You will realize tax consequences associated with investing from one series to the next.

The Portfolio is concentrated in securities issued by companies in the technology industry. The technology industry faces risks related to rapidly changing technology, rapid product obsolescence, cyclical market patterns, evolving industry standards and frequent new product introductions. Negative developments in this industry will affect the value of your investment more than would be the case for a more diversified investment.

Common stocks do not assure dividend payments. Dividends are paid only when declared by an issuer's board of directors and the amount of any dividend may vary over time. There can be no guarantee or assurance that companies will declare dividends in the future or that if declared, they will remain at current levels or increase over time.

You could experience dilution of your investment if the size of the Portfolio is increased as Units are sold. There is no assurance that your investment will maintain its proportionate share in the Portfolio's profits and losses.

The financial condition of an issuer may worsen or its credit ratings may drop, resulting in a reduction in the value of your Units. This may occur at any point in time, including during the initial offering period.

Value, blend and growth are types of investment styles. Growth investing generally seeks stocks that offer the potential for greater-than-average earnings growth, and may entail greater risk than value or blend investing. Value investing generally seeks stocks that may be sound investments but are temporarily out of favor in the marketplace, and may entail less risk than growth investing. A blend investment combines the two styles.

Before investing, investors should carefully read the prospectus and consider the investment objectives, risks, charges and expenses. For this and more complete information about the trust, investors should ask their financial professional(s) for a prospectus or download one at invesco.com/uit.

This does not constitute a recommendation of any investment strategy or product for a particular investor. Investors should consult a financial professional before making any investment decisions.

Invesco's history of offering unit investment trusts began with the acquisition of the Sponsor by Invesco Ltd. in June 2010. Invesco unit investment trusts are distributed by the Sponsor, Invesco Capital Markets, Inc. and broker dealers including Invesco Distributors, Inc. Both firms are indirect, wholly owned subsidiaries of Invesco Ltd.
