¹ Data from month-end after strategy inception on Feb. 6, 2013 for fund Class A shares at NAV, through September 30, 2020. On Feb. 6, 2013, Invesco Utilities Fund was renamed Invesco Dividend Income Fund and its objectives changed from a concentrated utilities-related securities fund to a strategy requiring the fund to invest at least 80% of its assets in dividend-paying securities.
² Sources: Invesco, Bloomberg L.P., Barclays, US Department of Treasury. Equities or shares of stock represent an ownership interest in a corporation and fixed income investments or bonds are a form of debt in which the issuing corporation or government promises to pay the principal amount at a specific date. Treasuries are generally backed by the government and dividends from stocks are not fixed, unlike a bond or Treasury, and may not be paid out by the issuer. Investment-grade corporate bonds are represented by the Bloomberg Barclays US Corporate Investment Grade Index, which is an unmanaged index considered representative of fixed-rate, investment-grade taxable bond debt.

Per the current prospectus.

Net = Total annual operating expenses less any contractual fee waivers and/or expense reimbursements by the advisor in effect through at least June 30, 2022. Not all share classes are available to all investors. See current prospectus for more information.

Performance quoted is past performance and cannot guarantee comparable future results; current performance may be lower or higher. Visit [invesco.com](https://www.invesco.com) for the most recent month-end performance. Performance figures reflect reinvested distributions and changes in net asset value (NAV). Investment return and principal value will vary so that you may have a gain or a loss when you sell shares. Had fees not been waived and/or expenses reimbursed in the past, returns would have been lower. Performance shown at NAV does not include the applicable front-end sales charge, which would have reduced the performance. Class Y shares have no sales charge; therefore, performance is at NAV. Class Y shares are available only to certain investors. See the prospectus for more information.

About risk

The risks of investing in securities of foreign issuers can include fluctuations in foreign currencies, political and economic instability, and foreign taxation issues.

Stocks of small and mid-sized companies tend to be more vulnerable to adverse developments, may be more volatile, and may be illiquid or restricted as to resale.

The fund is subject to certain other risks. Please see the current prospectus for more information regarding the risks associated with an investment in the fund.

Before investing, investors should carefully read the prospectus and/or summary prospectus and carefully consider the investment objectives, risks, charges and expenses. For this and more complete information about the fund(s), investors should ask their financial advisor for a prospectus/summary prospectus or visit [invesco.com/fund](https://www.invesco.com/fund) prospectus.
