

# Invesco BulletShares 2034 Corporate Bond ETF

**BSCY**
**Fund description**

The Invesco BulletShares® 2034 Corporate Bond ETF (Fund) is based on the BulletShares® USD Corporate Bond 2034 Index (Index). The Fund will invest at least 80% of its total assets in corporate bonds that comprise the index. The Index seeks to measure the performance of a portfolio of US dollar-denominated, investment-grade corporate bonds with effective maturities in 2034. The Fund does not purchase all of the securities in the Index; instead, the Fund utilizes a "sampling" methodology to seek to achieve its investment objective. The Fund and the Index are rebalanced monthly. The Fund has a designated year of maturity of 2034 and will terminate on or about Dec. 15, 2034. See the prospectus for more information.

**ETF information**

Fund name	Invesco BulletShares 2034 Corporate Bond ETF
Fund ticker	BSCY
CUSIP	46139W783

**Performance as at December 31, 2024**

Performance (%)	YTD	1Y	3Y	5Y	10Y	Fund inception
ETF - NAV	-	-	-	-	-	2.37
ETF - Market Price	-	-	-	-	-	2.42
Underlying index	-	-	-	-	-	2.48
Benchmark <sup>1</sup>	2.13	2.13	-2.27	0.30	2.43	2.19

*This is a new Fund and has no full-year Fund performance to report as of most recent quarter end. Returns less than one year are cumulative. Performance data quoted represents past performance. Past performance is not a guarantee of future results; current performance may be higher or lower than performance quoted. Investment returns and principal value will fluctuate and Shares, when redeemed, may be worth more or less than their original cost. See [invesco.com](https://www.invesco.com) to find the most recent month-end performance numbers. Market returns are based on the midpoint of the bid/ask spread at 4 p.m. ET and do not represent the returns an investor would receive if shares were traded at other times. Fund performance reflects fee waivers, absent which, performance data quoted would have been lower.*

**Fund inception: June 12, 2024**

Not a Deposit Not FDIC Insured Not Guaranteed by the Bank May Lose Value Not Insured by any Federal Government Agency

Shares are not individually redeemable. Shares may be acquired from the Fund and tendered for redemption to the Fund in Creation and Redemption Units only, typically consisting of 150,000 Shares.

Index returns do not represent Fund returns. An investor cannot invest directly in an index.

Neither the underlying Index nor the benchmark indexes charge management fees or brokerage expenses, and no such fees or expenses were deducted from the performance shown; nor do any of the indexes lend securities, and no revenues from securities lending were added to the performance shown. In addition, the results actual investors might have achieved would have differed from those shown because of differences in the timing, amounts of their investments, and fees and expenses associated with an investment in the Fund.

<sup>1</sup>The Bloomberg U.S. Corporate Index is an unmanaged index considered representative of fixed rate investment-grade taxable bond debt. An investment cannot be made into an index.

### Investment risks

There are risks involved with investing in ETFs, including possible loss of money. Shares are not actively managed and are subject to risks similar to those of stocks, including those regarding short selling and margin maintenance requirements. Ordinary brokerage commissions apply. The Fund's return may not match the return of the Underlying Index. The Fund is subject to certain other risks. Please see the current prospectus for more information regarding the risk associated with an investment in the Fund.

Investments focused in a particular industry or sector are subject to greater risk, and are more greatly impacted by market volatility, than more diversified investments.

The Fund is non-diversified and may experience greater volatility than a more diversified investment.

Interest rate risk refers to the risk that bond prices generally fall as interest rates rise and vice versa.

During the final year of the Fund's operations, as the bonds mature and the portfolio transitions to cash and cash equivalents, the Fund's yield will generally tend to move toward the yield of cash and cash equivalents and thus may be lower than the yields of the bonds previously held by the Fund and/or bonds in the market.

An issuer may be unable or unwilling to meet interest and/or principal payments, thereby causing its instruments to decrease in value and lowering the issuer's credit rating.

The risks of investing in securities of foreign issuers can include fluctuations in foreign currencies, political and economic instability, and foreign taxation issues.

Income generated from the Fund is based primarily on prevailing interest rates, which can vary widely over the short- and long-term. If interest rates drop, the Fund's income may drop as well. During periods of rising interest rates, an issuer may exercise its right to pay principal on an obligation later than expected, resulting in a decrease in the value of the obligation and in a decline in the Fund's income.

An issuer's ability to prepay principal prior to maturity can limit the Fund's potential gains. Prepayments may require the Fund to replace the loan or debt security with a lower yielding security, adversely affecting the Fund's yield.

The Fund currently intends to effect creations and redemptions principally for cash, rather than principally in-kind because of the nature of the Fund's investments. As such, investments in the Fund may be less tax efficient than investments in ETFs that create and redeem in-kind.

Unlike a direct investment in bonds, the Fund's income distributions will vary over time and the breakdown of returns between Fund distributions and liquidation proceeds are not predictable at the time of investment. For example, at times the Fund may make distributions at a greater (or lesser) rate than the coupon payments received, which will result in the Fund returning a lesser (or greater) amount on liquidation than would otherwise be the case. The rate of Fund distribution payments may affect the tax characterization of returns, and the amount received as liquidation proceeds upon Fund termination may result in a gain or loss for tax purposes.

During periods of reduced market liquidity or in the absence of readily available market quotations for the holdings of the Fund, the ability of the Fund to value its holdings becomes more difficult and the judgment of the Sub-Adviser may play a greater role in the valuation of the Fund's holdings due to reduced availability of reliable objective pricing data.

The Fund's use of a representative sampling approach will result in its holding a smaller number of securities than are in the underlying Index, and may be subject to greater volatility.

### Glossary

**30 Day SEC Unsubsidized Yield** reflects the 30-day yield if the investment adviser were not waiving all or part of its fee or reimbursing the fund for part of its expenses. Total return would have also been lower in the absence of these temporary reimbursements or waivers.

**30 Day SEC Yield** is based on a 30-day period and is computed by dividing the net investment income per share earned during the period by the maximum offering price per share on the last day of the period.

**Credit ratings** are assigned by Nationally Recognized Statistical Rating Organizations based on assessment of the credit worthiness of the underlying bond issuers. The ratings range from AAA (highest) to D (lowest) and are subject to change. Not rated indicates the debtor was not rated, and should not be interpreted as indicating low quality. Futures and other derivatives are not eligible for assigned credit ratings by any NRSRO and are excluded from quality allocations. For more information on rating methodologies, please visit the following NRSRO websites: [standardandpoors.com](http://standardandpoors.com) and select "Understanding Ratings" under Rating Resources and [moody.com](http://moody.com) and select "Rating Methodologies" under Research and Ratings. Source: Standard & Poor's and Moody's, as applicable.

**Effective Duration** is a measure of a bond's sensitivity to interest rate changes that reflects the change in a bond's price given a change in yield. This duration measure is appropriate for bonds with embedded options
