Market overview

- + For the third quarter, the Bloomberg Barclays Municipal Index had a total return of 1.23%, bringing its year-to-date total return to 3.80%. The Bloomberg Barclays High Yield Municipal Index returned 3.09%, bringing its year-to-date total return to 0.37%. The Bloomberg Barclays Taxable Municipal Index returned 1.71%, bringing its year-to-date return to 9.79%.²
- + As July began, the COVID-19 pandemic saw many states awaiting further federal stimulus and no clear timelines for reopening non-essential businesses. Despite the uncertainty, the quarter was much less dramatic for the municipal bond market as evidenced by positive returns, robust demand and an uptick in new issuance.
- + Thus far, federal support for the municipal market has included the Federal Reserve's plan to purchase up to \$500 billion in short-term municipal bonds, assistance with debt servicing via the Municipal Liquidity Facility, and stimulus packages with funding for specific sectors such as airlines, transportation and hospitals. Stimulus packages are likely to push taxes higher, making municipal bonds, one of few income sources not subject to federal taxes, more attractive. Demand for municipals was strong through the third quarter, averaging roughly \$1.5 billion per week in September. Net year-to-date inflows are now positive at approximately \$20 billion.³
- + New issuance was \$135 billion for the period, up 20% from last quarter and 26% from the same quarter last year. Year-to-date issuance stands at \$341 billion. More than \$102 billion of this was issued into the taxable market, an uptick resulting from recent tax law changes that prevent municipalities from refinancing existing debt with new tax-exempt debt.⁴ Tax-exempt issuance alone is up 12% from the same quarter last year.⁵ After numerous rate cuts in the second quarter, the Fed left the federal funds rate unchanged with a target range of 0% to 0.25%.⁶
- + In sectors most affected by COVID-19, yield spreads relative to Treasuries have tightened, but we still see value in health care, where we prefer larger multi-state systems with balance sheet strength to handle pandemic-related expense increases and patient mix shifts. Longer term, we believe our bottom-up research process in this sector will provide an opportunity to invest in strong credits with attractive valuations.

Positioning and outlook

- + We maintain the portfolio's preference for revenue bonds over general obligation bonds.
- + Our goal is to deliver a highly competitive yield through an opportunistic approach that seeks to identify sectors and individual securities offering an attractive balance of reward and risk.
- + Approximately 45% of fund holdings are non-rated by national agencies but are assigned internal proprietary ratings that allow us to take advantage of pricing anomalies in the high-yield municipal market.
- + It remains impossible to predict when the COVID-19 pandemic will abate or how the US election will affect market volatility. We rely on our seasoned credit research staff to capitalize on marketplace dislocations to add value during these ambiguous times.

Performance highlights

- + Invesco Rochester[®] Municipal Opportunities Fund Class A shares at net asset value (NAV) returned 2.08% for the third quarter, outperforming to its benchmark, the Barclays Municipal Bond Index, which returned 1.23%. (Please see the investment results table on page 2 for fund and index performance.)

Contributors to performance

- + Security selection among non-rated issues added to relative return.
- + Overweights in the special tax and hospital sectors added to relative return.
- + Security selection among Puerto Rico and Alabama domiciled bonds added to relative return.

Detractors from performance

- + Security selection among bonds with durations between two and three years detracted from relative return.
- + Underweights in the water and sewer and the industrial development revenue/pollution control revenue sectors detracted from relative return.
- + Security selection among Florida and New Hampshire domiciled issues detracted from relative results.

Expense ratios	% net	% total
Class A Shares	0.95	0.95
Class C Shares	1.60	1.60
Class Y Shares	0.70	0.70

From Lipper Fund Awards from Refinitiv, ©2020 Refinitiv. All rights reserved. Used under license. The 2020 Lipper Fund Award winners are selected based on the highest risk-adjusted performance among funds within a given category. The calculation periods extend over 36, 60, and 120 months. The highest Lipper Leader for Consistent Return (Effective Return) value within each eligible classification determines the fund classification winner over three, five or 10 years. A high Lipper rating does not necessarily imply that a fund had the best total performance or that the fund achieved positive results for that period. Lipper Inc. is a major independent mutual fund tracking organization. Other share classes may have different performance characteristics.

Performance quoted is past performance and cannot guarantee comparable future results; current performance may be lower or higher. Visit [invesco.com/performance](https://www.invesco.com/performance) for the most recent month-end performance. Performance figures reflect reinvested distributions and changes in net asset value (NAV). Investment return and principal value will vary, and you may have a gain or a loss when you sell shares. No contingent deferred sales charge (CDSC) will be imposed on redemptions of Class C shares following one year from the date shares were purchased. Performance shown at NAV does not include applicable CDSC or front-end sales charges, which would have reduced the performance. Class Y shares have no sales charge; therefore, performance is at NAV. Returns less than one year are cumulative; all others are annualized. Fund performance reflects any applicable fee waivers and/or expense reimbursements. Had the adviser not waived fees and/or reimbursed expenses currently or in the past, returns would have been lower. See current prospectus for more information. Index returns do not reflect any fees, expenses, or sales charges. As the result of a reorganization on May 24, 2019, the returns of the fund for periods on or prior to May 24, 2019 reflect performance of the Oppenheimer predecessor fund. Share class returns will differ from the predecessor fund due to a change in expenses and sales charges.

1 Ratings source: Standard & Poor's, Moody's or Fitch, as applicable. A credit rating is an assessment provided by a nationally recognized statistical rating organization (NRSRO) of the creditworthiness of an issuer with respect to debt obligations, including specific securities, money market instruments or other debts. Ratings are measured on a scale that generally ranges from AAA (highest) to D (lowest); ratings are subject to change without notice. If securities are rated differently by the rating agencies, the higher rating is applied. Not Rated indicates the debtor was not rated and should not be interpreted as indicating low quality. A negative in Cash indicates fund activity that has accrued or is pending settlement. For more information on the rating methodology, please visit www.standardandpoors.com and select 'Understanding Ratings' under Rating Resources on the homepage; www.moodys.com and select 'Rating Methodologies' under Research and Ratings on the homepage; www.fitchratings.com and select 'Ratings Definitions' on the homepage.

■ Effective September 30, 2020, the Invesco Oppenheimer Rochester High Yield Municipal Fund was renamed Invesco Rochester Municipal Opportunities Fund. Please see the prospectus for additional information.

Class Y shares are available only to certain investors. See the prospectus for more information.

Asset allocation/diversification does not guarantee a profit or eliminate the risk of loss.

Income may be subject to state and local taxes. There is no guarantee that the fund's income will be exempt from federal income taxes, including the alternative minimum tax.

The fund holdings are organized according to the Global Industry Classification Standard, which was developed by and is the exclusive property and service mark of MSCI Inc. and Standard & Poor's.

The Bloomberg Barclays Municipal Bond Index is an unmanaged index considered representative of the tax-exempt bond market. An investment cannot be made directly in an index.

Option adjusted duration is a measure, as estimated by the fund's portfolio managers, of a bond fund's price sensitivity to changes in interest rates. It takes into account mortgage prepayments, puts, adjustable coupons and potential call dates. Weighted average maturity (WAM) is a measure, as estimated by the fund's portfolio managers, of the length of time the average security in a bond fund will mature or be redeemed by its issuer. It takes into account mortgage prepayments, puts, adjustable coupons and potential call dates.

About risk

All or a portion of the fund's otherwise tax-exempt income may be subject to the federal alternative minimum tax.

The Fund may use leverage to seek to enhance income, which creates the likelihood of greater volatility of the Fund's shares and may also impair the ability to maintain its qualification for federal income tax purposes as a regulated investment company.

An issuer may be unable to meet interest and/or principal payments, thereby causing its instruments to decrease in value and lowering the issuer's credit rating.

Derivatives may be more volatile and less liquid than traditional investments and are subject to market, interest rate, credit, leverage, counterparty and management risks. An investment in a derivative could lose more than the cash amount invested.

Junk bonds have greater risk of default or price changes due to changes in the issuer's credit quality. Junk bond values fluctuate more than high quality bonds and can decline significantly over a short time.

Interest rate risk refers to the risk that bond prices generally fall as interest rates rise and vice versa.

Inverse floating rate obligations may be subject to greater price volatility than a fixed income security with similar qualities. When short-term interest rates rise, they may decrease in value and produce less or no income and are subject to risks similar to derivatives.

Municipal securities have the risk that legislative or economic conditions could affect an issuer's ability to make principal and/or interest payments.

The fund is subject to certain other risks. Please see the current prospectus for more information regarding the risks associated with an investment in the fund.

Before investing, investors should carefully read the prospectus and/or summary prospectus and carefully consider the investment objectives, risks, charges and expenses. For this and more complete information about the fund(s), investors should ask their advisors for a prospectus/summary prospectus or visit [invesco.com/fundprospectus](https://www.invesco.com/fundprospectus).
