

Trust specifics Deposit information Public offering price per unit¹ \$10.00 Minimum investment (\$250 for IRAs)² \$1,000.00 10/04/22 Deposit date Termination date 01/04/24 Distribution dates 25th day of February, May and August Record dates 10th day of February, May and August Term of trust 15 months ICCBBJ Symbol Historical 12 month distributions[†] \$0.8572 CSCC224 Sales charge and CUSIPs **Brokerage** Sales charge³ Deferred sales charge 1.35% Creation and development fee 0.50% Total sales charge 1.85% Last deferred sales charge payment date 07/10/23 **CUSIPs** Cash 46150B-10-6 46150B-11-4 Reinvest Historical 12 month distribution rate⁺ 8.57% Fee-based Sales charge³ 0.50% Fee-based sales charge **CUSIPs** Fee-based cash 46150B-12-2 Fee-based reinvest 46150B-13-0 Historical 12 month distribution rate[†] (fee-based) Investors in fee-based accounts will not be assessed the

The historical 12 month distributions per unit and each historical 12 month distribution rate of the securities included in the trust are for illustrative purposes only and are not indicative of the trust's actual distributions or distribution rate. The historical 12 month distributions per unit amount is based upon the weighted average of the actual distributions paid by the securities included in the trust over the 12 months preceding the trust's deposit date, and is reduced to account for the effects of fees and expenses which will be incurred when investing in a trust. Each historical 12 month distribution rate is calculated by dividing the historical 12 month distributions amount by the trust's initial \$10 public offering price per unit. There is no guarantee the issuers of the securities included in the trust will declare dividends or distributions in the future. Due to the negative economic impact across many industries caused by the recent COVID-19 outbreak, certain issuers of the securities included in the trust may elect to reduce the amount of, or cancel entirely, dividends and/or distributions paid in the future. As a result, the historical 12 month distributions per unit and each historical 12 month distribution rate will likely be higher, and in some cases significantly higher, than the actual distribution rate achieved by the trust. The distributions paid by the trust, as well as the corresponding rates, may be higher or lower than the figures shown due to certain factors that may include, but are not limited to, a change in the dividends or distributions paid by issuers, actual expenses incurred, currency fluctuations, the sale of trust securities to pay any deferred sales charges, trust fees and expenses, variations in the trust's per unit price, or with the call, maturity or the sale of securities in the trust. Distributions made by certain securities in the trust may include non-ordinary income.

deferred sales charge for eligible fee-based purchases and

must purchase units with a Fee-based CUSIP.

Closed-End Strategy: Covered Call Income Portfolio 2022-4

A specialty unit trust

Objective

The Portfolio seeks to provide current income and the potential for capital appreciation. The Portfolio seeks to achieve its objective by investing in a portfolio consisting of common stock of closed-end investment companies (known as "closed-end funds"). These closed-end funds generally focus on covered call option strategies or other income-oriented investment strategies.

Portfolio composition (As of the business day before deposit date)

The trust portfolio is provided for informational purposes only and should not be deemed as a recommendation to buy or sell the individual securities shown above.

See page 2 for the footnotes on trust specifics.

About risk

There is no assurance the trust will achieve its investment objective. An investment in this unit investment trust is subject to market risk, which is the possibility that the market values of securities owned by the trust will decline and that the value of trust units may therefore be less than what you paid for them. Recently, an outbreak of a respiratory disease caused by a novel coronavirus, COVID-19, has spread globally in a short period of time, resulting in the disruption of, and delays in, production and supply chains and the delivery of healthcare services and processes, as well as the cancellation of organized events and educational institutions, quarantines, a decline in consumer demand for certain goods and services, and general concern and uncertainty. COVID-19 and its effects have contributed to increased volatility in global markets, severe losses, liquidity constraints, and lowered yields. The duration of such effects cannot yet be determined but could be present for an extended period of time and may adversely affect the value of your Units. This trust is unmanaged and its portfolio is not intended to change during the trust's life except in limited circumstances. Accordingly, you can lose money investing in this trust. The trust should be considered as part of a long-term investment strategy and you should consider your ability to pursue it by investing in successive trusts, if available. You will realize tax consequences associated with investing from one series to the next.

The Portfolio invests in shares of closed-end funds. Shares of these funds tend to trade at a discount from their net asset value in the secondary market and the net asset value of the shares may decrease. Closed-end funds are subject to risks related to factors such as management's ability to achieve a fund's objective, market conditions affecting a fund's investments and use of leverage. You will bear not only your share of the Portfolio's expenses, but also the expenses of the underlying funds. By investing in other funds, the Portfolio incurs greater expenses than you would incur if you invested directly in the funds.

The financial condition of an issuer may worsen or its credit ratings may drop, resulting in a reduction in the value of your Units. This may occur at any point in time, including during the initial offering period.

A security issuer may be unwilling or unable to declare dividends in the future, or may reduce the level of the dividends declared. This may reduce the level of dividends a closed-end fund pays which would reduce your income and cause the value of your units to fall.

You could experience dilution of your investment if the size of the Portfolio is increased as Units are sold. There is no assurance that your investment will maintain its proportionate share in the Portfolio's profits and losses.

The Portfolio is concentrated in funds that write call options on their assets. The use of options may require an underlying fund to sell portfolio securities at inopportune times or at prices other than current market values, may limit the amount of appreciation a fund can realize on an investment, or may cause a fund to hold a security it might otherwise sell. To the extent the underlying fund purchases options pursuant to a hedging strategy, the fund could lose its entire investment in the option.

Certain of the funds in the Portfolio invest in securities of foreign issuers, presenting risks beyond those of U.S. issuers. These risks may include market and political factors related to an issuer's foreign market, international trade conditions, less regulation, smaller or less liquid markets, increased volatility, differing accounting and tax practices and changes in the value of foreign currencies which may have both economic and tax consequences.

Certain of the funds may invest in securities rated below investment grade quality ("junk" or "high-yield" bonds). Securities rated below "BBB-" by Standard & Poor's or below "Baa3" by Moody's are considered to be below investment grade. Investing in such bonds should be viewed as speculative and you should review your ability to assume the risks associated with investments which utilize such bonds. Junk bonds are subject to numerous risks including higher interest rates, economic recession, deterioration of the junk bond market, possible downgrades and defaults of interest and/or principal. Junk bond prices tend to fluctuate more than higher rated bonds and are affected by short-term credit developments to a greater degree.

The Portfolio, through its investments in various closed-end funds, may have significant exposure to certain market sectors. Accordingly, the Portfolio may be more susceptible to economic, political and other occurrences influencing those sectors.

Before investing, investors should carefully read the prospectus and consider the investment objectives, risks, charges and expenses. For this and more complete information about the trust(s), investors should ask their financial professional(s) for a prospectus or download one at invesco.com/uit.

This does not constitute a recommendation of any investment strategy or product for a particular investor. Investors should consult a financial professional before making any investment decisions.

Invesco unit investment trusts are distributed by the Sponsor, Invesco Capital Markets, Inc. and broker dealers including Invesco Distributors, Inc. Both firms are indirect, wholly owned subsidiaries of Invesco Ltd.

¹ Including sales charges. As of deposit date.
2 Represents the value of 100 units on the deposit date. The value of the minimum investment amount of 100 units may be greater or less than \$1,000.00 following the deposit date.

³ Assuming a public offering price of \$10 per unit. There is no initial sales charge if the public offering price per unit is \$10 or less. If the public offering price per unit exceeds \$10, an initial sales charge is paid at the time of purchase. The per unit amount of the initial sales charge is 1.85% of the dollar amount that the public offering price per unit exceeds \$10.
