Estimated long-term return (Fee-based) ¹	1.17%

* Represents the principal amount of the underlying bonds per unit as of the close of business on the trust's deposit date. Subsequently, bonds may be sold to meet redemptions, to pay expenses, and in other limited circumstances. The sale of bonds will affect the principal amount of bonds included in the trust and as a result the principal amount of bonds per unit. There can be no assurance that a unitholder will receive this par value per unit subsequent to the deposit date.

† Reflects the minimum credit quality of underlying securities in the portfolio as rated by S&P/Fitch and Moody's, when available. Not all bonds are rated by each service. Although the bonds in the portfolio are rated at or above the minimum credit quality as of deposit date, each bond's rating may change after its inclusion in the trust.

1 These estimates are calculated as of the close of business on the deposit date and will vary thereafter. Estimated current return shows the estimated interest distributions you are scheduled to receive each year divided by the unit price. Estimated long term return shows the estimated return over the estimated life of the trust. We base this estimate on an average of the bond yields over their estimated life. Estimated long term return also reflects the sales charge and estimated expenses. The average yield for the portfolio is derived by weighting each bond's yield by its value and estimated life. Unlike estimated current return, estimated long term return accounts for maturities, discounts and premiums of the bonds. These estimates show a comparison rather than a prediction of returns. No return calculation can predict your actual return. Your actual return may vary from these estimates. The estimates relating to units held in "wrap fee" accounts will typically be higher due to applicable sales charge waivers, which are fully described in the prospectus. Current estimates are available at www.invesco.com/uit.

Objective

The trust seeks to provide a high level of current income and to preserve capital. The trust invests in a portfolio of investment grade corporate bonds maturing approximately 3 to 7 years from the Date of Deposit.

Portfolio diversification (% of par value)

(As of the opening of business on the deposit date)

Corporate Bonds 100%

- Energy 28%
- Financials 27%
- Information Technology 11%
- Health Care 8%
- Industrials 8%
- Consumer Staples 7%
- Consumer Discretionary 7%
- Real Estate 4%

Invesco helped pioneer the tax-exempt unit trust in 1976⁵. Since then, we have consistently offered fixed income trusts and now boast a large family of tax-exempt and taxable income trusts.

Over 5,400 fixed income unit trusts have deposited—with over \$46 billion in initial deposits and more than \$21 billion in income distributed to fixed income trust holders as of June 30, 2020.

Why consider the Investment Grade Corporate Trust, 3-7 Year Series?

Take advantage of a portfolio of taxable bonds through a convenient and efficient way of purchasing a professionally selected and diversified portfolio of investment grade bonds.

- A defined and diversified portfolio of investment grade corporates³
- Low minimum investment of one unit
- Suitable for tax sheltered vehicles like IRAs
- Yields may be higher than U.S. treasury bonds with comparable maturities⁴
- Provides diversification of taxable bonds

2 The amount is based on estimated cash flows per Unit and that the amount will vary with changes in expenses, interest rates and maturity, call or sale of bonds.

3 The bonds in the portfolio are generally rated BBB- or higher by Standard & Poor's or Baa3 by Moody's as of the deposit date.

4 Unlike Treasury bonds, the bonds the trust invests in are not guaranteed by the U.S. government as to the timely payment of principal and interest, and therefore are subject to greater risk.

5 Through Invesco UITs and predecessor firms.

6 Over 5,400 fixed income unit trusts have deposited—with over \$46 billion in initial deposits and more than \$21 billion in income distributed to fixed income trust holders as of June 30, 2020.

Diversification does not guarantee a profit or eliminate the risk of loss.

Following the date of deposit, a bond may cease to be rated or its rating may be reduced, even to below "investment grade" ("BBB-" or "Baa3"), and the trust could continue to hold such bond. "S.F." indicates a sinking fund is established with respect to an issue of bonds.

The trust portfolio is provided for informational purposes only and should not be deemed as a recommendation to buy or sell the individual securities shown above. Invesco unit investment trusts are distributed by the Sponsor, Invesco Capital Markets, Inc. and broker dealers including Invesco Distributors, Inc. Both firms are indirect, wholly owned subsidiaries of Invesco Ltd.

About risk

There is no assurance that a unit investment trust will achieve its investment objective. An investment in this unit trust is subject to market risk, which is the possibility that the market values of securities owned by the trust will decline and that the value of trust units may therefore be less than what you paid for them. This trust is unmanaged. Accordingly, you can lose money investing in this trust. An investment in a trust should be made with the understanding of the risks associated therewith, such as the inability of the issuer or an insurer to pay the principal of or interest on a bond when due, volatile interest rates, early call provisions and changes to the tax status of the bonds.

An investment in a trust should be made with the understanding of the risks associated therewith, such as the inability of the issuer or an insurer to pay the principal of or interest on a bond when due, volatile interest rates, early call provisions and changes to the tax status of the bonds.

The value of the bonds will generally fall if interest rates, in general, rise. In a low interest rate environment risks associated with rising rates are heightened. The negative impact on fixed income securities from any interest rate increases could be swift and significant. No one can predict whether interest rates will rise or fall in the future.

The financial condition of an issuer may worsen or its credit ratings may drop, resulting in a reduction in the value of your Units. This may occur at any point in time, including during the primary offering period.

During periods of market turbulence, corporate bonds may experience illiquidity and volatility. During such periods, there can be uncertainty in assessing the financial condition of an issuer. As a result, the ratings of the bonds in the Trust's portfolio may not accurately reflect an issuer's current financial condition, prospects, or the extent of the risks associated with investing in such issuer's securities.

Bonds of foreign issuers in present risks beyond those of U.S. issuers. These risks may include market and political factors related to an issuer's foreign market, international trade conditions, less regulation, smaller or less liquid markets, increased volatility, differing accounting practices and changes in the value of foreign currencies.

The Trust is concentrated in bonds of issuers in the energy sector. Issuers in the energy sector face risks such as the potential adverse effects of fluctuations in the prices of energy fuels, substantial government regulation, and political conditions in oil producing regions.

The Trust is concentrated in bonds of issuers in the financials sector. Issuers in the financials sector face risks such as the potential adverse effects of economic recession, volatile interest rates, and state and federal regulations.

Although the underlying securities in the portfolio are rated at or above the minimum credit quality as of the date of deposit, the ratings may change after inclusion in the trust.

Invesco and its representatives do not provide tax advice. Individuals should consult their personal tax advisors before making any tax-related investment decisions.

A credit rating is an assessment provided by a nationally recognized statistical rating organization (NRSRO) of the creditworthiness of an issuer with respect to debt obligations, including specific securities, money market instruments or other debts. Ratings are measured on a scale that generally ranges from AAA/Aaa (highest) to D/C (lowest); ratings are subject to change without notice. For more information on Standard and Poor's rating methodology, please visit www.standardandpoors.com and select 'Understanding Ratings' under Rating Resources on the homepage or Moody's at www.moody.com and select 'Rating Methodologies' under Research and Ratings on the homepage.

Before investing, investors should carefully read the prospectus and consider the investment objectives, risks, charges and expenses. For this and more complete information about the trust, investors should ask their advisor(s) for a prospectus or download one at invesco.com/uit.

This does not constitute a recommendation of any investment strategy or product for a particular investor. Investors should consult a financial professional before making any investment decisions.
