Performance quoted is past performance and cannot guarantee comparable future results; current performance may be lower or higher. Visit [invesco.com/performance](https://www.invesco.com/performance) for the most recent month-end performance. Performance figures reflect reinvested distributions and changes in net asset value (NAV). Investment return and principal value will vary, and you may have a gain or a loss when you sell shares. No contingent deferred sales charge (CDSC) will be imposed on redemptions of Class C shares following one year from the date shares were purchased. Performance shown at NAV does not include applicable CDSC or front-end sales charges, which would have reduced the performance. Class Y shares have no sales charge; therefore, performance is at NAV. Returns less than one year are cumulative; all others are annualized. Fund performance reflects any applicable fee waivers and/or expense reimbursements. Had the adviser not waived fees and/or reimbursed expenses currently or in the past, returns would have been lower. See current prospectus for more information. Index returns do not reflect any fees, expenses, or sales charges. As the result of a reorganization on May 24, 2019, the returns of the fund for periods on or prior to May 24, 2019 reflect performance of the Oppenheimer predecessor fund. Share class returns will differ from the predecessor fund due to a change in expenses and sales charges. Index sources: Invesco, FactSet Research Systems Inc.

Calendar year total returns (%)

■ Effective September 30, 2020, "Oppenheimer" was removed from the fund name. Please see the prospectus for additional information.

Class Y shares are available only to certain investors. See the prospectus for more information.

The JP Morgan Government Bond Index-Emerging Markets Global Diversified Index is a comprehensive global local emerging markets index comprising liquid, fixed-rate, domestic currency government bonds. An investment cannot be made directly in an index.

Effective duration is a modified duration calculation which incorporates the expected duration-shortening effect of an issuer's embedded call provision. **Weighted average effective maturity (WAM)** is a measure, as estimated by the fund's portfolio managers, of the length of time the average security in a bond fund will mature or be redeemed by its issuer. It takes into account mortgage prepayments, puts, adjustable coupons and potential call dates.

Not a deposit; Not FDIC insured; Not guaranteed by the bank; May lose value; Not insured by any federal agency

Overall Morningstar rating™
(Class A shares as of Sept. 30, 2020)

Ratings are based on a risk-adjusted return measure that accounts for variation in a fund's monthly performance, placing more emphasis on downward variations and rewarding consistent performance. Open-end mutual funds and exchange-traded funds are considered a single population for comparison purposes. Ratings are calculated for funds with at least a three year history. The overall rating is derived from a weighted average of three-, five- and 10-year rating metrics, as applicable, excluding sales charges and including fees and expenses. Had fees not been waived and/or expenses reimbursed currently or in the past, the Morningstar rating would have been lower. Class A shares received 4 stars for the overall, 4 stars for the three years, 5 stars for the five years and 4 stars for the 10 years. The fund was rated among 67, 67, 64 and 18 funds within the Morningstar Emerging-Markets Local-Currency Bond Category for the overall period, three, five and 10 years, respectively.

It may not be copied or distributed and is not warranted to be accurate, complete or timely. Neither Morningstar nor its content providers are responsible for any damages or losses arising from any use of this information. Past performance is no guarantee of future results. Ratings are as of the most recent quarter end and are subject to change every month. The top 10% of funds in a category receive five stars, the next 22.5% four stars, the next 35% three stars, the next 22.5% two stars and the bottom 10% one star. Ratings for other share classes may differ due to different performance characteristics.

Top countries	(% of total net assets)
Colombia	13.05
Indonesia	10.51
South Africa	8.77
India	8.19

AA	1.18	Not Rated	2.327.47
A	16.04		
BBB	47.35		

Ratings source: Standard & Poor's, Moody's or Fitch, as applicable. A credit rating is an assessment provided by a nationally recognized statistical rating organization (NRSRO) of the creditworthiness of an issuer with respect to debt obligations, including specific securities, money market instruments or other debts. Ratings are measured on a scale that generally ranges from AAA (highest) to D (lowest); ratings are subject to change without notice. If securities are rated differently by the rating agencies, the higher rating is applied. Not Rated indicates the debtor was not rated and should not be interpreted as indicating low quality. A negative in Cash indicates fund activity that has accrued or is pending settlement. For more information on the rating methodology, please visit www.standardandpoors.com and select 'Understanding Ratings' under Rating Resources on the homepage; www.moodys.com and select 'Rating Methodologies' under Research and Ratings on the homepage; www.fitchratings.com and select 'Ratings Definitions' on the homepage.

About risk

An issuer may be unable to meet interest and/or principal payments, thereby causing its instruments to decrease in value and lowering the issuer's credit rating.

Derivatives may be more volatile and less liquid than traditional investments and are subject to market, interest rate, credit, leverage, counterparty and management risks. An investment in a derivative could lose more than the cash amount invested.

The risks of investing in securities of foreign issuers, including emerging markets, can include fluctuations in foreign currencies, political and economic instability, and foreign taxation issues.

Junk bonds have greater risk of default or price changes due to changes in the issuer's credit quality. Junk bond values fluctuate more than high quality bonds and can decline significantly over a short time.

Interest rate risk refers to the risk that bond prices generally fall as interest rates rise and vice versa.

The fund is considered non-diversified and may experience greater volatility than a more diversified investment.

The fund is subject to certain other risks. Please see the current prospectus for more information regarding the risks associated with an investment in the fund.

Before investing, investors should carefully read the prospectus and/or summary prospectus and carefully consider the investment objectives, risks, charges and expenses. For this and more complete information about the fund(s), investors should ask their advisors for a prospectus/summary prospectus or visit invesco.com/fundprospectus.
