

Alpha Generation and Diversification Within Equities

Invesco Oppenheimer Global Opportunities Fund

A: OPGIX Y: OGIYX R6: OGIX

Looking for a high conviction alpha generator for your clients' portfolios? Invesco Oppenheimer Global Opportunities Fund has historically provided one of the strongest returns of any product in its category¹ over the past 20 years. The fund's benchmark agnostic approach can complement your current portfolios through its combination of low correlation to traditional equity indices and historically strong returns.

Differentiated Portfolio

¹ Morningstar World Small/Mid Stock category.

² Active Share: Proportion of stock holdings in a mutual fund's composition that was different from the composition found in its benchmark. High active share does not guarantee outperformance.

The MSCI All Country World Index (MSCI ACWI) is an index considered representative of stock markets of developed and emerging markets. An investment cannot be made directly in an index. No guarantee these outcomes will be achieved.

³ Correlation expresses the strength of relationship between distributions of returns between two data series. Correlation is always between +1 and -1, with a correlation of +1 expressing a perfect correlation, meaning that the two series being compared behave exactly the same, a correlation of -1 meaning the two series behave exactly the opposite and a correlation of zero meaning movements between the two series are random.

⁴ Results depict data from 10/1/99 to 9/30/19. Standard deviation is a statistical measure of the degree to which the performance of a portfolio varies from its average performance during a specified period. The higher the standard deviation, the greater the volatility of the portfolio's performance returns relative to its average return.

Changes in the value of two investments or asset classes may not track or offset each other in the manner anticipated by the portfolio managers, which may inhibit their risk allocation process from achieving its investment objective. **Past performance is not a guarantee of future results.**

Investing in Structural Growth Opportunities

A: OPGIX Y: OGIYX R6: OGIX

We invest in emergent growth companies that are leading the way in transformational technologies and patent-protected intellectual property. We will continue to invest across the world in companies with current attractive valuations that we believe have the potential to grow into large, highly profitable businesses in the future, wherever they may be located. With a 20-year track record of success and benchmark agnostic approach, Global Opportunities Fund is a diversified way to help clients grow their wealth over the long term.

Morningstar Rating™

Class A Shares rated 4 stars overall by Morningstar among 125 World Small/Mid Stock funds. Morningstar measures risk-adjusted returns. The overall rating is a weighted average based on the fund's 3-, 5- and 10- year rating as of 9/30/19.⁵

21st Century Growth Opportunities Found Across Specific Themes

We think specific structural changes across the globe are fueling growth—Mass Affluence, New Technology, Restructuring, and Aging populations. Within these broad trends, we find that certain themes will provide the most promising opportunities. Our flexible, high-conviction approach enables us to focus on themes such as:

Immunotherapy

Electric Vehicles

Drug Delivery

Low Power Semiconductors

E-Commerce

Average Annual Total Returns and Expense Ratios (%) as of 9/30/19

	1 Year	3 Year	5 Year	10 Year	15 Year	20 Year	Life

Annual Expense Ratios: Gross: A Shares: 1.10%/ R6 Shares: 0.69%/ Y Shares: 0.85%. Class A inception date is 10/22/90. Class R6 inception date is 1/27/12. Class Y inception date is 2/1/01.

Performance quoted is past performance, and cannot guarantee comparable future results. Current performance and or expenses may be higher or lower. Visit invesco.com for the most recent month-end performance. Investment returns and principal value will vary; you may have a gain or loss when you sell shares. Performance figures reflect reinvested distributions and changes in share price and the effect of the max. sales charge unless otherwise stated. Class A (with sales charge) returns reflect a 5.50% max. sales charge. Class R6 and Y shares are not subject to sales charge. As the result of a reorganization on May 24, 2019, the returns of the fund for periods on or prior to May 24, 2019 reflect performance of the Oppenheimer predecessor fund. Share class returns will differ from the predecessor fund due to a change in expenses and sales charges. Class I shares were reorganized into Class R6 shares. R6 shares are primarily intended for retirement plans that meet certain standards and for institutional investors. Y shares are generally intended for certain investors, such as wrap-fee based programs or commissionable brokerage platforms that charge sales commission.

⁵ Morningstar ratings are based on a risk-adjusted return measure that accounts for variation in a fund's monthly performance, placing more emphasis on the downward variations and rewarding consistent performance. Open-end mutual funds and exchange-traded funds are considered a single population for comparison purposes. Ratings are calculated for funds with at least a three year history. The overall rating is derived from a weighted average of three-, five- and 10-year rating metrics, as applicable, excluding sales charges and including fees and expenses. Had fees not been waived and/or expenses reimbursed currently or in the past, the Morningstar rating would have been lower. Class A shares received 4 stars for the overall, 3 stars for the three years, 5 stars for the five years and 4 stars for the 10 years. The fund was rated among 125, 125, 94 and 57 funds within the Morningstar World Small/Mid Category of the overall period, three, five and 10 years, respectively. Morningstar ratings are as of September 30, 2019, the most recent data available, and are subject to change every month. The top 10% of funds in a category receive five stars, the next 22.5% four stars, the next 35% three stars, the next 22.5% two stars and the bottom 10% one star. Ratings for other share classes may differ due to different performance characteristics.

⁶ Source: Morningstar Inc. Morningstar rankings are based on total return, excluding sales charges and including fees and expenses versus all funds in the Morningstar category. Open-end mutual funds and exchange-traded funds are considered a single population for comparison purposes. Had fees not been waived and/or expenses reimbursed currently or in the past, the ranking would have been lower.

About Risks: In general, stock values fluctuate, sometimes widely, in response to activities specific to the company as well as general market, economic and political conditions. The risks of investing in securities of foreign issuers, including emerging market issuers, can include fluctuations in foreign currencies, political and economic instability, and foreign taxation issues. Stocks of small and mid-sized companies tend to be more vulnerable to adverse developments, may be more volatile, and may be illiquid or restricted as to resale. Interest rate risk refers to the risk that bond prices generally fall as interest rates rise and vice versa. An issuer may be unable to meet interest and/or principal payments, thereby causing its instruments to decrease in value and lowering the issuer's credit rating. Junk bonds involve a greater risk of default or price changes due to changes in the issuer's credit quality. The values of junk bonds fluctuate more than those of high-quality bonds and can decline significantly over short time periods. The fund is subject to certain other risks. Please see the current prospectus for more information regarding the risks associated with an investment in the fund.

This does not constitute a recommendation of any investment strategy or product for a particular investor. Investors should consult a financial professional before making any investment decisions.
