Invesco Unit Trusts

Select S&P Core Portfolio 2023+3

Invesco equity strategies

The Portfolio seeks above-average total return. The Portfolio seeks to achieve its objective by investing in a portfolio of stocks. The Select S&P Core Portfolio is an enhanced index** unit investment trust that invests in a portfolio of up to twenty well-known stocks, determined through a quantitative model designed by S&P Opco, LLC, a subsidiary of S&P Dow Jones Indices, LLC.

Performance of a hypothetical $10,000 investment

The graph represents a hypothetical $10,000 investment in the trust strategy (not any actual trust) and the S&P 500 Index from 12/31/92 through 06/30/23. The graph assumes the sum of the initial investment ($10,000) and all dividends (including those on stocks trading ex-dividend as of the last day of the year) and appreciation during a year are reinvested at the end of that year.

All strategy performance is hypothetical (not any actual trust) and reflects trust sales charges at the beginning of each calendar year of 1.85% and expenses but not brokerage commissions on stocks or taxes. Past performance is no guarantee of future results. Actual returns will vary from hypothetical strategy returns due to timing differences and because the trust may not be invested equally in all stocks or be fully invested at all times. The hypothetical portfolio for certain years included fewer than 20 stocks that passed all screens. As a result of recent market activity, current performance may vary. In any given year the strategy may lose money or underperform the index. Returns are calculated by taking year-end prices, subtracting them from the prices at the end of the following year (adjusting for any stock splits that might have occurred during the year) and adding dividends received for the period divided by starting price. Average annual total return and total return measure change in the value of an investment plus dividends, assuming quarterly reinvestment of dividends. Average annual total return reflects annualized change while total return reflects aggregate change and is not annualized.

Standard deviation is a measure of volatility that represents the degree to which an investment’s performance has varied from its average performance over a particular period. Standard deviation does not compare the volatility of an investment relative to other investments or the overall stock market. The more an investment’s return varies from the investment’s average return, the more volatile the investment. Standard deviation is based on past performance and is no guarantee of future results.

The Sharpe ratio is a risk-adjusted measure calculated using standard deviation and excess return to determine the Sharpe ratio. A higher Sharpe ratio indicates better historical risk-adjusted performance.

Please keep in mind that high, double-digit and/or triple-digit returns are highly unusual and cannot be sustained. Investors should also be aware that these returns were primarily achieved during favorable market conditions.

See page 2 for the footnotes on the trust specifics.

Trust specifics

Deposit information

Public offering price per unit\(^1\) $10.00

Minimum investment ($250 for IRAs)\(^2\) $1,000.00

Deposit date 07/10/23

Termination date 10/07/24

Distribution dates 25th day of each month

Record dates 10th day of each month

Term of trust 15 months

Symbol ISCBCG

Historical 12 month distributions\(^3\) $0.1377

SCOR233 Sales charge and CUSIPs

Brokerage

Sales charge\(^3\)

Deferred sales charge 1.35%

Creation and development fee 0.50%

Total sales charge 1.85%

Last deferred sales charge payment date 04/10/24

CUSIPs

Cash 46150H-38-4

Reinvest 46150H-39-2

Historical 12 month distribution rate\(^1\) 1.37%

Fee-based

Sales charge\(^3\)

Fee-based sales charge 1.50%

CUSIPs

Fee-based cash 46150H-40-0

Fee-based reinvest 46150H-41-8

Historical 12 month distribution rate\(^1\) (fee-based) 1.40%

Investors in fee-based accounts will not be assessed the deferred sales charge for eligible fee-based purchases and must purchase units with a Fee-based CUSIP.

\(^1\) The historical 12 month distributions per unit and each historical 12 month distribution rate of the securities included in the trust are for illustrative purposes only and are not indicative of the trust’s actual distributions or distribution rate. The historical 12 month distribution per unit amount is based upon the weighted average of the actual distributions paid by the securities included in the trust over the 12 months preceding the trust’s deposit date, and is reduced to account for the effects of fees and expenses which will be incurred when investing in a trust. Each historical 12 month distribution rate is calculated by dividing the historical 12 month distributions amount by the trust’s initial $10 public offering price per unit. There is no guarantee the issuers of the securities included in the trust will declare dividends or distributions in the future. Due to the negative economic impact across many industries caused by the recent COVID-19 outbreak, certain issuers of the securities included in the trust may elect to reduce the amount of, or cancel entirely, dividends and/or distributions paid in the future. As a result, the historical 12 month distribution per unit and each historical 12 month distribution rate will likely be higher, and in some cases significantly higher, than the actual distribution rate achieved by the trust. The distributions paid by the trust, as well as the corresponding rates, may be higher or lower than the figures shown due to certain factors that may include, but are not limited to, a change in the dividends or distributions paid by issuers, actual expenses incurred, currency fluctuations, the sale of trust securities to pay any deferred sales charges, trust fees and expenses, variations in the trust’s per unit price, or with the call, maturity or the sale of securities in the trust. Distributions made by certain securities in the trust may include non-ordinary income.

** An enhanced sector (or “index”) strategy refers to a unit investment trust strategy, sponsored by Invesco Capital Markets, Inc., that seeks to outperform an index by investing in an objectively selected subset of stocks from the same index.
