Index returns do not represent Fund returns. An investor cannot invest directly in an index. Neither the underlying Index nor the benchmark indexes charge management fees or brokerage expenses, and no such fees or expenses were deducted from the performance shown; nor do any of the indexes lend securities, and no revenues from securities lending were added to the performance shown. In addition, the results actual investors might have achieved would have differed from those shown because of differences in fees and expenses associated with an investment in the Fund and the applicable foreign currency as determined by WM/Reuters closing spot rate as the exchange rate of the U.S. dollar and the applicable foreign currency.

Data beginning 10 years prior to the ending date of September 30, 2023. Fund performance shown at NAV. WM/Reuters Canadian Dollar Closing Spot Rate performance prior to November 13, 2008 reflects the noon buying rate as determined by the Federal Reserve Bank of New York. From November 13, 2008, forward, the performance reflects that of the WM/Reuters Canadian Dollar Closing Spot Rate AND IS NOT INTENDED FOR ANY THIRD PARTY USE. Blended index performance applies only to the Growth of $10,000.

Performance data quoted represents past performance, which is not a guarantee of future results. Investment returns and principal value will fluctuate, and shares, when redeemed, may be worth more or less than their original cost. Current performance may be higher or lower than performance data quoted. See invesco.com for the most recent month-end performance numbers. Fund performance reflects applicable fee waivers, absent which, the performance data quoted would have been lower. Returns less than one year are cumulative. The net asset value (NAV) and market close performance may differ from one another. A major reason for the difference is that timing discrepancies can exist between the NAV, which is calculated using the WM/Reuters closing spot rate, and the market close, which is calculated using closing price (last trade). Market price returns are based on the midpoint of the bid/ask spread at 4 p.m. ET and do not represent the returns an investor would receive if shares were traded at other times. As the result of a reorganization on April 6, 2018, the returns presented reflect performance of the Guggenheim predecessor fund. Invesco is not affiliated with Guggenheim.
**Investment risks**

CurrencyShares are subject to risks similar to those of stocks and may not be suitable for all investors. The value of the Shares relates directly to the value of the Canadian Dollars held by the Trust. Fluctuations in the price of the Canadian Dollars could materially and adversely affect the value of the Shares.

If the Trust incurs expenses in USD, the Trust would be required to sell Canadian Dollars to pay these expenses. The sale of the Trusts Canadian Dollars to pay expenses in USD at a time of low Canadian Dollars prices could adversely affect the value of the Shares.

The Canadian Dollar/USD exchange rate, like foreign exchange rates in general, can be volatile and difficult to predict. This volatility could materially and adversely affect the performance of the Shares. Investment in foreign exchange related products is subject to many factors that contribute to or increase volatility, such as national debt levels and trade deficits, changes in domestic and foreign interest rates, and investors' expectations concerning interest rates, currency exchange rates and global or regional political, economic or financial events and situations.

If interest earned by the Trust does not exceed the Trusts expenses, the Trustee will withdraw Canadian Dollars from the Trust to pay these excess expenses, which will reduce the amount of Canadian Dollars represented by each Share on an ongoing basis and may result in adverse tax consequences for Shareholders.

Substantial sales of Canadian Dollars by the official sector could adversely affect an investment in the Shares. The interest rate paid by the Depository, if any, may not be the best rate available. If the Sponsor determines that the interest rate is inadequate, then its sole recourse is to remove the Depository and terminate the Deposit Accounts.

The Fund is subject to certain other risks. Please see the current prospectus for more information regarding the risks associated with an investment in the Fund.

The Fund is not a mutual fund or any other type of Investment Company within the meaning of the Investment Company Act of 1940, as amended, and is not subject to regulation thereunder.

The Trust has filed a registration statement (including a prospectus) with the SEC for the offering to which this communication relates.
