Effective on or about June 25, 2021, Class RA and Class RZ units are closed to new investors. Existing Account Owners holding Class RA and Class RZ units are permitted to make additional investments in those classes, respectively. See the Program Description for more information.

Asset allocation/diversification does not guarantee a profit or eliminate the risk of loss.

A target date portfolio identifies a specific time at which investors are expected to begin making withdrawals. The principal value of the portfolio is not guaranteed at any time, including at the target date.

The Custom Invesco CollegeBound Today Index is composed of Bloomberg U.S. Aggregate Bond Index and Bloomberg U.S. Treasury Bellwethers (3M) Index. The composition of the index may change based on the portfolio's target asset allocation. Therefore, the current composition of the index does not reflect its historical composition and will likely be altered in the future to better reflect the portfolio's objective. An investment cannot be made in an index.

## About risk

The portfolio is subject to the risks of the underlying investments. Market fluctuations may change the target weightings in the underlying investments and certain factors may cause the fund to withdraw its investments therein at a disadvantageous time.

In general, stock values fluctuate, sometimes widely, in response to activities specific to the company as well as general market, economic and political conditions.

An issuer may be unable to meet interest and/or principal payments, thereby causing its instruments to decrease in value and lowering the issuer's credit rating.

Derivatives may be more volatile and less liquid than traditional investments and are subject to market, interest rate, credit, leverage, counterparty and management risks. An investment in a

derivative could lose more than the cash amount invested.

Interest rate risk refers to the risk that bond prices generally fall as interest rates rise and vice versa.

There are risks that a wrap contract issuer may default which could result in loss of principal. Cost incurred to buy wrap contracts reduces Portfolio performance. New wrap contracts may have less favorable terms or higher costs. Poor market value performance may lead to constrained Portfolio investments and reduce performance. Termination of a wrap contract could result in loss of book value coverage.

The portfolio is subject to certain other risks. Please see the current Program Description for more information regarding the risks associated with an investment in the portfolio.

FOR RHODE ISLAND INVESTOR USE ONLY

***Before you invest, consider whether your or the beneficiary's home state offers any state tax or other state benefits such as financial aid, scholarship funds, and protection from creditors that are only available for investments in that state's qualified tuition program.***
