Market overview

- + For the third quarter of 2022, the Bloomberg Municipal Bond Index and the Bloomberg High Yield Municipal Bond Index returned -3.46% and -4.83%, respectively, while the Bloomberg Taxable Municipal Index returned -6.18%.² These negative results reflect investors' ongoing concerns about inflation, volatility and the Federal Reserve's (Fed) monetary tightening. Continuing its efforts to stem inflation, the Fed raised the federal funds rate by 0.75% twice during the quarter, in July and again in September, bringing the target rate to 3.25%, the highest since 2008.³ With five rate increases so far in 2022, this is the Fed's most aggressive monetary policy since the 1980s.
- + On August 16th, President Biden signed into law the Inflation Reduction Act of 2022, which aims to lower costs for families, create jobs and reduce the deficit while addressing climate change. The act imposes a 15% minimum tax on companies that report over \$1 billion in profits to shareholders in an effort to ensure that large, profitable companies pay a minimum amount of tax.
- + As of quarter end, the yield ratio between 30-year AAA municipals and 30-year Treasuries (the M/T yield ratio) was 104%, 5% higher than its long-term average and 26% higher than the beginning of 2022. When M/T ratios are higher than historical averages, municipal bonds are considered inexpensive compared to Treasuries. Under normal market conditions, these levels typically spur demand from crossover buyers such as hedge funds, banks and insurance companies. However, due to heightened macroeconomic concerns, that was not the case this quarter. Rather, municipal fund outflows continued, totaling approximately \$94 billion year-to-date.⁴
- + New municipal issuance was \$90.5 billion in the third quarter, down 32.5% from the same period in 2021, with tax-exempt supply accounting for \$80.2 billion of the total.⁵ Taxable municipal issuance fell 70% compared to the third quarter of 2021.⁵ Municipal borrowers have been reluctant to issue new bonds or advance refund existing bonds given higher interest rates.
- + Despite various headwinds, municipal credit fundamentals are strong and continue to improve, as evidenced by S&P ratings, where upgrades exceeded downgrades by a 3:1 ratio in the last two quarters.⁶ This favorable dynamic likely stems from the benefits of various fiscal stimulus programs, as well as higher revenues collected by state and local governments.

Positioning and outlook

- + We believe the valuable benefits of municipal bonds, including tax-exempt income, low correlations to other asset classes and low default rates, will eventually prevail over current market volatility and economic uncertainty. We continue to rely on our experienced portfolio managers and credit analysts to weather the challenges while identifying marketplace opportunities to add long-term value for shareholders.

Performance highlights

- + Invesco AMT-Free Municipal Income Fund Class A shares at net asset value (NAV) returned -4.10% for the third quarter, compared to its style-specific benchmark, the S&P Municipal Bond 5+ Year Investment Grade Index, which returned -4.13%. (Please see the investment results table on page 2 for fund and index performance.)

Contributors to performance

- + Underweight allocations to issues rated AA and higher added to relative return during the quarter.
- + Security selection in local general obligation and higher education bonds contributed to relative performance.
- + Underweight allocations to bonds domiciled in California and New York also added to relative return.

Detractors from performance

- + An overweight allocation to non-rated bonds detracted from relative return during the quarter.
- + Overweight allocations to the tobacco settlement and dedicated tax sectors also detracted from relative performance.
- + Overweight exposure to bonds domiciled in New Jersey detracted from relative results.

Performance quoted is past performance and cannot guarantee comparable future results; current performance may be lower or higher. Visit [invesco.com/performance](https://www.invesco.com/performance) for the most recent month-end performance.

Performance figures reflect reinvested distributions and changes in net asset value (NAV). Investment return and principal value will vary, and you may have a gain or a loss when you sell shares. No contingent deferred sales charge (CDSC) will be imposed on redemptions of Class C shares following one year from the date shares were purchased. Performance shown at NAV does not include applicable CDSC or front-end sales charges, which would have reduced the performance. Class Y shares have no sales charge; therefore, performance is at NAV. Returns less than one year are cumulative; all others are annualized. Fund performance reflects any applicable fee waivers and/or expense reimbursements. Had the adviser not waived fees and/or reimbursed expenses currently or in the past, returns would have been lower. See current prospectus for more information. Index returns do not reflect any fees, expenses, or sales charges. As the result of a reorganization on May 24, 2019, the returns of the fund for periods on or prior to May 24, 2019 reflect performance of the Oppenheimer predecessor fund. Share class returns will differ from the predecessor fund due to a change in expenses and sales charges.

1 Ratings source: Standard & Poor's, Moody's or Fitch, as applicable. A credit rating is an assessment provided by a nationally recognized statistical rating organization (NRSRO) of the creditworthiness of an issuer with respect to debt obligations, including specific securities, money market instruments or other debts. Ratings are measured on a scale that generally ranges from AAA (highest) to D (lowest); ratings are subject to change without notice. If securities are rated differently by the rating agencies, the higher rating is applied. Not Rated indicates the debtor was not rated and should not be interpreted as indicating low quality. A negative in Cash indicates fund activity that has accrued or is pending settlement. For more information on the rating methodology, please visit www.standardandpoors.com and select 'Understanding Ratings' under Rating Resources on the homepage; www.moodys.com and select 'Rating Methodologies' under Research and Ratings on the homepage; www.fitchratings.com and select 'Ratings Definitions' on the homepage.

Class Y shares are available only to certain investors. See the prospectus for more information.

Asset allocation/diversification does not guarantee a profit or eliminate the risk of loss.

The fund holdings are organized according to the Global Industry Classification Standard, which was developed by and is the exclusive property and service mark of MSCI Inc. and Standard & Poor's.

S&P Municipal Bond 5+ Year Investment Grade Index is a sub-set of the broad S&P Municipal Bond Index. This index of market value-weighted investment grade U.S. municipal bonds seeks to measure the performance U.S. municipals whose maturities are greater than or equal to 5 years. An investment cannot be made directly in an index.

The Bloomberg Municipal Bond Index is an unmanaged index considered representative of the tax-exempt bond market. An investment cannot be made directly in an index.

The Bloomberg Municipal High Yield Bond Index is an unmanaged index considered representative of noninvestment-grade bonds. An investment cannot be made directly in an index.

Option adjusted duration is a measure, as estimated by the fund's portfolio managers, of a bond fund's price sensitivity to changes in interest rates. It takes into account mortgage prepayments, puts, adjustable coupons and potential call dates. **Weighted average maturity (WAM)** is a measure, as estimated by the fund's portfolio managers, of the length of time the average security in a bond fund will mature or be redeemed by its issuer. It takes into account mortgage prepayments, puts, adjustable coupons and potential call dates.

About risk

All or a portion of the fund's otherwise tax-exempt income may be subject to the federal alternative minimum tax.

The fund may use leverage to seek to enhance income, which creates the likelihood of greater volatility of the fund's shares and may also impair the ability to maintain its qualification for federal income tax purposes as a regulated investment company.

An issuer may be unable to meet interest and/or principal payments, thereby causing its instruments to decrease in value and lowering the issuer's credit rating.

Derivatives may be more volatile and less liquid than traditional investments and are subject to market, interest rate, credit, leverage, counterparty and management risks. An investment in a derivative could lose more than the cash amount invested.

Junk bonds have greater risk of default or price changes due to changes in the issuer's credit quality. Junk bond values fluctuate more than high quality bonds and can decline significantly over a short time.

Interest rate risk refers to the risk that bond prices generally fall as interest rates rise and vice versa.

Inverse floating rate obligations may be subject to greater price volatility than a fixed income security with similar qualities. When short-term interest rates rise, they may decrease in value and produce less or no income and are subject to risks similar to derivatives.

Municipal securities have the risk that legislative or economic conditions could affect an issuer's ability to make principal and/or interest payments.

Certain of the municipalities in which the Fund invests, including Puerto Rico, currently experience significant financial difficulties. Puerto Rico's economic problems increase the risk of investing in Puerto Rican municipal obligations, including the risk of potential issuer default, heightens the risk that the prices of Puerto Rican municipal obligations, and the Fund's net asset value, will experience greater volatility. See the prospectus for more information.

The fund is subject to certain other risks. Please see the current prospectus for more information regarding the risks associated with an investment in the fund.

Before investing, investors should carefully read the prospectus and/or summary prospectus and carefully consider the investment objectives, risks, charges and expenses. For this and more complete information about the fund(s), investors should ask their financial professionals for a prospectus/summary prospectus or visit invesco.com/fundprospectus.
