Residents in New York City and Yonkers may also be subject to an additional local income tax on top of the state tax. Invesco does not offer tax advice. Please consult your tax professional for information regarding your own personal tax situation.

Municipal Bond Investing in New York

Municipal bonds are attractive to investors because of the tax-exempt income at the federal level. This becomes more attractive when investors can earn tax-exempt income at the state level too. The Invesco Municipal Bond team manages three New York funds: Invesco Rochester® New York Municipals Fund (RMUNX), Invesco Rochester® AMT-Free New York Municipal Fund (OPNYX), and Invesco Rochester® Limited Term New York Municipal Fund (LTNYX).

New York Funding Sources

NYS revenues have grown from \$156 billion in fiscal year 2017 to \$233 billion in FY 2023.

REFINITIV LIPPER FUND AWARDS

2023 WINNER
UNITED STATES

Class Y shares (RMUYX): Best among 25 New York Municipal Debt Funds for the 5-year period and best among 25 New York Municipal Debt Funds for the 10-year period ending 11/30/22 based on consistently strong risk-adjusted performance.

| Standard Performance, as of December 31, 2023 | 1 year | 3 year | 5 year | 10 year | Since Inception |
|---|--------|--------|--------|---------|-----------------|
| Class A shares at NAV (Inception: 5/15/86) | 9.82 | 0.05 | 3.66 | 5.32 | 5.89 |
| Class A shares with max 4.25% load | 5.14 | -1.38 | 2.77 | 4.87 | 5.77 |
| Class Y shares (Inception: 4/28/00) | 10.15 | 0.32 | 3.93 | 5.55 | 5.19 |
| Lipper New York Municipal Debt Funds Category Average | 7.31 | -0.74 | 1.81 | 2.85 | — |

Total Annual Expense Ratios: Class A Shares: 1.14%; Class Y Shares: 0.90%
See current prospectus for more information.

Performance quoted is past performance and cannot guarantee comparable future results; current performance may be lower or higher. Visit [invesco.com/performance](https://www.invesco.com/performance) for the most recent month-end performance. Performance figures reflect reinvested distributions and changes in net asset value (NAV). Investment return and principal value will vary, and you may have a gain or a loss when you sell shares. Class Y shares have no sales charge; therefore, performance is at NAV. Fund performance reflects any applicable fee waivers and/or expense reimbursements. Had the adviser not waived fees and/or reimbursed expenses currently or in the past, returns would have been lower. See current prospectus for more information. As the result of a reorganization on May 24, 2019, the returns of the fund for periods on or prior to May 24, 2019 reflect performance of the Oppenheimer predecessor fund. Share class returns will differ from the predecessor fund due to a change in expenses and sales charges.

30-day SEC Yields %

| | |
|----------------|------|
| Class A Shares | 3.56 |
| Class Y Shares | 3.96 |

30 Day SEC Yield is based on a 30-day period and is computed by dividing the net investment income per share earned during the period by the maximum offering price per share on the last day of the period, as of December 31, 2023.

The 30-day taxable-equivalent SEC yield represents the tax adjusted 30-day SEC yield for investors in the highest individual marginal federal income tax bracket. The 30-day taxable equivalent SEC yields would have been 6.01% for Class A shares and 6.69% for Class Y shares.

Lipper Fund Awards from Refinitiv, ©2023 Refinitiv. All rights reserved. Used under license. The 2023 Lipper Fund Award winners are selected based on the highest risk-adjusted performance among funds within a given category. The calculation periods extend over 36, 60, and 120 months. The highest Lipper Leader for Consistent Return (Effective Return) value within each eligible classification determines the fund classification winner over three, five or 10 years. A high Lipper rating does not necessarily imply that a fund had the best total performance or that the fund achieved positive results for that period. Lipper Inc. is a major independent mutual fund tracking organization. Other share classes may have different performance characteristics.

Fund Facts**RMUNX****>75%**

Allocation to Investment Grade Bonds* is greater than 75%

*Securities rated BBB or higher are considered investment grade securities.

OPNYX**0%**

Allocation to municipal securities subject to the federal alternative minimum tax (AMT).

LTNYX**<5 years**

Dollar-weighted average portfolio maturity** managed to less than 5 years.

**Dollar-weighted average portfolio maturity measures the average time it takes for securities in a debt portfolio to mature, weighted in proportion to the dollar amount invested in the portfolio.

As the result of a reorganization on May 24, 2019, the returns of the fund for periods on or prior to May 24, 2019 reflect performance of the Openheimer predecessor fund. Share class returns will differ from the predecessor fund due to a change in expenses and sales charges.

Past performance cannot guarantee comparable future results.

A credit rating is an assessment provided by a nationally recognized statistical rating organization (NRSRO) of the creditworthiness of an issuer with respect to debt obligations, including specific securities, money market instruments or other debts. Ratings are measured on a scale that generally ranges from AAA (highest) to D (lowest); ratings are subject to change without notice. NR indicates the debtor was not rated, and should not be interpreted as indicating low quality. For more information on rating methodologies, please visit the following NRSRO websites: www.standardandpoors.com and select 'Understanding Ratings' under Rating Resources on the homepage; www.moodys.com and select 'Rating Methodologies' under Research and Ratings on www.fitchratings.com and select 'Ratings Definitions' on the homepage.

Invesco Rochester® New York Municipals Fund: Interest rate risk refers to the risk that bond prices generally fall as interest rates rise and vice versa. **An issuer** may be unable to meet interest and/or principal payments, thereby causing its instruments to decrease in value and lowering the issuer's credit rating. **The values of junk bonds** fluctuate more than those of high quality bonds and can decline significantly over short time periods. **Inverse floating rate obligations** may be subject to greater price volatility than a fixed income security with similar qualities. When short-term interest rates rise, they may decrease in value and produce less or no income and are subject to risks similar to derivatives. **If interest rates fall**, callable security issuers may call or prepay their securities before maturity, causing the fund to reinvest proceeds in securities with lower interest rates and reducing fund income and distributions. **Derivatives may be more volatile** and less liquid than traditional investments and are subject to market, interest rate, credit, leverage, counterparty and management risks. An investment in a derivative could lose more than the cash amount invested. **The Fund invests a substantial portion of its assets in New York (NY)** municipal securities, and will have greater exposure to negative political, economic, regulatory or other factors within the state. Unfavorable developments in any economic sector may have a substantial impact on the overall NY municipal market. Certain issuers of NY municipal bonds have experienced serious financial difficulties in the past, and reoccurrence of these difficulties may impair the ability of such issuers to pay principal or interest on their obligations. **Municipal securities** have the risk that legislative or economic conditions could affect an issuer's ability to make principal and/or interest payments. **The Fund may invest** in municipal securities issued by entities having similar characteristics, which may make the Fund more susceptible to fluctuation. **Based on a Master Settlement Agreement ("MSA")** with 46 states and six other US jurisdictions, large US tobacco manufacturers have agreed to make annual payments to government entities in exchange for the release of all litigation claims. Several states have sold bonds backed by those future payments, including (i) bonds that make payments only from a state's interest in the MSA and (ii) bonds that make payments from both the MSA revenue and from an "appropriation pledge" by the state which requires the state to pass a specific periodic appropriation to make the payments and is generally not an unconditional guarantee of payment by a state. Settlement payments are based on factors, including, but not limited to, annual domestic cigarette shipments, cigarette consumption, inflation and the financial capability of participating tobacco companies. Payments could be reduced if consumption decreases, if market share is lost to non-MSA manufacturers, or if there is a negative outcome in litigation regarding the MSA, including challenges by participating tobacco manufacturers regarding the amount of annual payments owed under the MSA. **There is no guarantee** that the Fund's income will be exempt from federal and state income taxes. **All or a portion** of the Fund's otherwise tax-exempt income may be subject to the federal alternative minimum tax. **The investment techniques** and risk analysis used by the portfolio managers may not produce the desired results. **The Fund is subject to certain other risks.** Please see the current prospectus for more information regarding the risks associated with an investment in the Fund.

Invesco Rochester® AMT-Free New York Municipal Fund: Interest rate risk refers to the risk that bond prices generally fall as interest rates rise and vice versa. **An issuer** may be unable to meet interest and/or principal payments, thereby causing its instruments to decrease in value and lowering the issuer's credit rating. **Junk bond values** fluctuate more than high quality bonds and can decline significantly over a short time. **The Fund may use leverage** to seek to enhance income, which creates the likelihood of greater volatility of the fund's shares and may also impair the ability to maintain its qualification for federal income tax purposes as a regulated investment company. **Derivatives may be more volatile** and less liquid than traditional investments and are subject to market, interest rate, credit, leverage, counterparty and management risks. An investment in a derivative could lose more than the cash amount invested. **Inverse floating rate obligations** may be subject to greater price volatility than a fixed income security with similar qualities. When short-term interest rates rise, they may decrease in value and produce less or no income and are subject to risks similar to derivatives. **Leverage created from borrowing** or certain types of transactions or instruments may impair liquidity, cause positions to be liquidated at an unfavorable time, lose more than the amount invested, or increase volatility. **Municipal securities** have the risk that legislative or economic conditions could affect an issuer's ability to make principal and/or interest payments. **The Fund may invest** in municipal securities issued by entities having similar characteristics, which may make the Fund more susceptible to fluctuation. **Because the Fund invests** primarily in a portfolio of one state's municipal securities, the Fund is more susceptible to political, economic, regulatory or other factors affecting that state than a Fund that does not limit its investments to such issuers. **Based on a Master Settlement Agreement ("MSA")** with 46 states and six other US jurisdictions, large US tobacco manufacturers have agreed to make annual payments to government entities in exchange for the release of all litigation claims. Several states have sold bonds backed by those future payments, including (i) bonds that make payments only from a state's interest in the MSA and (ii) bonds that make payments from both the MSA revenue and from an "appropriation pledge" by the state which requires the state to pass a specific periodic appropriation to make the payments and is generally not an unconditional guarantee of payment by a state. Settlement payments are based on factors, including, but not limited to, annual domestic cigarette shipments, cigarette consumption, inflation and the financial capability of participating tobacco companies. Payments could be reduced if consumption decreases, if market share is lost to non-MSA manufacturers, or if there is a negative outcome in litigation regarding the MSA, including challenges by participating tobacco manufacturers regarding the amount of annual payments owed under the MSA. **There is no guarantee** that the Fund's income will be exempt from federal and state income taxes. **The investment techniques** and risk analysis used by the portfolio managers may not produce the desired results. **The Fund is subject to certain other risks.** Please see the current prospectus for more information regarding the risks associated with an investment in the Fund.

Invesco Rochester® Limited Term New York Municipal Fund: Interest rate risk refers to the risk that bond prices generally fall as interest rates rise and vice versa. **An issuer** may be unable to meet interest and/or principal payments, thereby causing its instruments to decrease in value and lowering the issuer's credit rating. **Junk bond values** fluctuate more than high quality bonds and can decline significantly over a short time. **All or a portion** of the Fund's otherwise tax-exempt income may be subject to the federal alternative minimum tax. **There is no guarantee** that the Fund's income will be exempt from federal and state income taxes. **The Fund may use leverage** to seek to enhance income, which creates the likelihood of greater volatility of the Fund's shares and may also impair the ability to maintain its qualification for federal income tax purposes as a regulated investment company. **Derivatives may be more volatile** and less liquid than traditional investments and are subject to market, interest rate, credit, leverage, counterparty and management risks. An investment in a derivative could lose more than the cash amount invested. **Inverse floating rate obligations** may be subject to greater price volatility than a fixed income security with similar qualities. When short-term interest rates rise, they may decrease in value and produce less or no income and are subject to risks similar to derivatives. **Leverage created from borrowing** or certain types of transactions or instruments may impair liquidity, cause positions to be liquidated at an unfavorable time, lose more than the amount invested, or increase volatility. **Municipal securities** have the risk that legislative or economic conditions could affect an issuer's ability to make principal and/or interest payments. **The Fund may invest** in municipal securities issued by entities having similar characteristics, which may make the Fund more susceptible to fluctuation. **The Fund may invest in privately issued securities**, including 144A securities which are restricted (i.e. not publicly traded). The liquidity market for Rule 144A securities may vary, as a result, delay or difficulty in selling such securities may result in a loss to the Fund. **Because the Fund invests** primarily in a portfolio of one state's municipal securities, the Fund is more susceptible to political, economic, regulatory or other factors affecting that state than a Fund that does not limit its investments to such issuers. **The Fund will invest in bonds with short- or intermediate-term (five years or less) maturity** which may have additional risks, including interest rate changes over the life of the bond. The average maturity of the Fund's investments will affect the volatility of the Fund's share price. **Based on a Master Settlement Agreement ("MSA")** with 46 states and six other US jurisdictions, large US tobacco manufacturers have agreed to make annual payments to government entities in exchange for the release of all litigation claims. Several states have sold bonds backed by those future payments, including (i) bonds that make payments only from a state's interest in the MSA and (ii) bonds that make payments from both the MSA revenue and from an "appropriation pledge" by the state which requires the state to pass a specific periodic appropriation to make the payments and is generally not an unconditional guarantee of payment by a state. Settlement payments are based on factors, including, but not limited to, annual domestic cigarette shipments, cigarette consumption, inflation and the financial capability of participating tobacco companies. Payments could be reduced if consumption decreases, if market share is lost to non-MSA manufacturers, or if there is a negative outcome in litigation regarding the MSA, including challenges by participating tobacco manufacturers regarding the amount of annual payments owed under the MSA. **The investment techniques** and risk analysis used by the portfolio managers may not produce the desired results. **The Fund is subject to certain other risks.** Please see the current prospectus for more information regarding the risks associated with an investment in the Fund.
