3 Years	2.83	4.25	3.41	3.41	4.49	4.03
1 Year	6.54	11.02	9.01	10.01	11.26	8.72
Quarter	-3.48	0.54	-0.72	0.28	0.54	0.18

The performance quoted is past performance and is not a guarantee of future results. Investment returns and principal value of an investment will fluctuate so that an account owner's units, when redeemed, may be worth more or less than their original cost. Current performance may be higher or lower than the performance data shown. For up-to-date month-end performance information please call 877 615 4116, or visit collegebound529.com. Performance figures reflect reinvested distributions of the underlying security and changes in net asset value (NAV). No contingent deferred sales charge (CDSC) will be imposed on redemptions of Class C units following one year from the date units were purchased. Performance shown at NAV does not include applicable CDSC or front-end sales charges, which would have reduced the performance. Class I units have no sales charge; therefore, performance is at NAV. Returns less than one year are cumulative; all others are annualized. Index returns do not reflect any fees, expenses, or sales charges.

Calendar year total returns (%)

Class A units at NAV

2009	2010	2011	2012	2013	2014	2015	2016	2017	2018	2019
-	-	-	-	-	-	-	-2.20	4.91	-2.73	11.02

Inception year is 2016. Return for inception year 2016 is a partial-year return.

Class I units are available only to certain investors. See the Program Description for more information. The Bloomberg Barclays U.S. Aggregate Index is an unmanaged index considered representative of the US investment-grade, fixed-rate bond market. An investment cannot be made directly in an index.

Effective duration is a modified duration calculation which incorporates the expected duration-shortening effect of an issuer's embedded call provision.

Top holdings		Quality breakdown	
(% of total net assets)		(% of total net assets)	
"United States Treasury Note/Bond (1.75) 31/02/2024"	2.77	Cash	5.22

Fannie Mae Pool (2.50) 01/01/2034	1.04	Data shown is that of the underlying fund.	
AT&T Inc (5.15) 15/02/2050	0.99	Ratings source: Standard & Poor's, Moody's or Fitch, as applicable. A credit rating is an assessment provided by a nationally recognized statistical rating organization (NRSRO) of the creditworthiness of an issuer with respect to debt obligations, including specific securities, money market instruments or other debts. Ratings are measured on a scale that generally ranges from AAA (highest) to D (lowest); ratings are subject to change without notice. If securities are rated differently by the rating agencies, the higher rating is applied. Not Rated indicates the debtor was not rated and should not be interpreted as indicating low quality. A negative in Cash indicates fund activity that has accrued or is pending settlement. For more information on the rating methodology, please visit www.standardandpoors.com and select 'Understanding Ratings' under Rating Resources on the homepage; www.moodys.com and select 'Rating Methodologies' under Research and Ratings on the homepage; www.fitchratings.com and select 'Ratings Definitions' on the homepage.	
"United States Treasury Note/Bond (1.75) 31/12/2026"	0.98	About risk	
Freddie Mac Multifamily Structured Pass Through Certificates (3.42) 25/02/2029	0.93	Risks of the Underlying Holding	
Holdings are that of the underlying fund, subject to change and are not buy/sell recommendations.		An issuer may be unable to meet interest and/or principal payments, thereby causing its instruments to decrease in value and lowering the issuer's credit rating.	
Holdings statistics		Derivatives may be more volatile and less liquid than traditional investments and are subject to market, interest rate, credit, leverage, counterparty and management risks. An investment in a derivative could lose more than the cash amount invested.	
Effective duration	5.84	The risks of investing in securities of foreign issuers, including emerging markets, can include fluctuations in foreign currencies, political and economic instability, and foreign taxation issues.	
"Weighted Average Effective Maturity (years)"	8.72	Interest rate risk refers to the risk that bond prices generally fall as interest rates rise and vice versa.	
Data shown is that of the underlying fund.		Junk bonds involve a greater risk of default or price changes due to changes in the issuer's credit quality. The values of junk bonds fluctuate more than those of high quality bonds and can decline significantly over short time periods.	

NOT FDIC INSURED | MAY LOSE VALUE | NO BANK GUARANTEE

Before you invest, consider whether your or the beneficiary's home state offers any state tax or other state benefits such as financial aid, scholarship funds, and protection from creditors that are only available for investments in that state's qualified tuition program.
