Invesco Unit Trusts

Closed-End Strategy: Master Municipal Income Portfolio—National Series 2022-4
A closed-end strategy unit trust

Objective

The Portfolio seeks to provide current income exempt from federal income tax and the potential for capital appreciation. The Portfolio seeks to achieve its objective by investing in a portfolio consisting of common stock of closed-end investment companies (known as “closed-end funds”). These closed-end funds generally seek to invest in federal tax-exempt municipal bonds. Income may be subject to the alternative minimum tax and state and local taxes.

Portfolio composition (As of the business day before deposit date)

Historical 12 month distribution rate† (fee-based) 5.65%

1 The historical 12 month distributions per unit and each historical 12 month distribution rate of the securities included in the trust are for illustrative purposes only and are not indicative of the trust's actual distributions or distribution rate. The historical 12 month distributions per unit amount is based upon the weighted average of the actual distributions paid by the securities included in the trust over the 12 months preceding the trust's deposit date, and is reduced to account for the effects of fees and expenses which will be incurred when investing in a trust. Each historical 12 month distribution rate is calculated by dividing the historical 12 month distributions amount by the trust's initial $10 public offering price per unit. There is no guarantee the issuers of the securities included in the trust will declare dividends or distributions in the future. Due to the negative economic impact across many industries caused by the recent COVID-19 outbreak, certain issuers of the securities included in the trust may elect to reduce the amount of, or cancel entirely, dividends and/or distributions paid in the future. As a result, the historical 12 month distributions per unit and each historical 12 month distribution rate will likely be higher, and in some cases significantly higher, than the actual distribution rate achieved by the trust. The distributions paid by the trust, as well as the corresponding rates, may be higher or lower than the figures shown due to certain factors that may include, but are not limited to, a change in the dividends or distributions paid by issuers, actual expenses incurred, currency fluctuations, the sale of trust securities to pay any deferred sales charges, trust fees and expenses, variations in the trust's per unit price, or with the call, maturity or the sale of securities in the trust. Distributions made by certain securities in the trust may include non-ordinary income.

See page 2 for the footnotes on trust specifics.
About risk
There is no assurance the trust will achieve its investment objective. An investment in this unit investment trust is subject to market risk, which is the possibility that the market values of securities owned by the trust will decline and that the value of trust units may therefore be less than what you paid for them. Recently, an outbreak of a respiratory disease caused by a novel coronavirus, COVID-19, has spread globally in a short period of time, resulting in the disruption of, and delays in, production and supply chains and the delivery of healthcare services and processes, as well as the cancellation of organized events and educational institutions, quarantines, a decline in consumer demand for certain goods and services, and general concern and uncertainty. COVID-19 and its effects have contributed to increased volatility in global markets, severe losses, liquidity constraints, and lowered yields. The duration of such effects cannot yet be determined but could be present for an extended period of time and may adversely affect the value of your Units. This trust is unmanaged and its portfolio is not intended to change during the trust's life except in limited circumstances. Accordingly, you can lose money investing in this trust. The trust should be considered as part of a long-term investment strategy and you should consider your ability to pursue it by investing in successive trusts, if available. You will realize tax consequences associated with investing from one series to the next.

Invesco and its representatives do not provide tax advice. You should consult your tax adviser for further information on tax implications.

The value of fixed income securities in the closed-end funds will generally fall if interest rates rise. In a low interest rate environment risks associated with rising rates are heightened. The negative impact on fixed income securities from any interest rate increases could be swift and significant. No one can predict whether interest rates will rise or fall in the future.

The financial condition of an issuer may worsen or its credit ratings may drop, resulting in a reduction in the value of your Units. This may occur at any point in time, including during the initial offering period.

The Portfolio invests in shares of closed-end funds. Shares of these funds tend to trade at a discount from their net asset value in the secondary market and the net asset value of the shares may decrease. Closed-end funds are subject to risks related to factors such as management’s ability to achieve a fund's objective, market conditions affecting a fund's investments and use of leverage. You will bear not only your share of the Portfolio's expenses, but also the expenses of the underlying funds. By investing in other funds, the Portfolio incurs greater expenses than you would incur if you invested directly in the funds.

You could experience dilution of your investment if the size of the Portfolio is increased as Units are sold. There is no assurance that your investment will maintain its proportionate share in the Portfolio's profits and losses.

A security issuer may be unable to make payments of interest, dividends or principal in the future. This may reduce the level of dividends a closed-end fund pays which would reduce your income and cause the value of your units to fall.

The Portfolio is concentrated in closed-end funds that invest in municipal bonds. Municipal bonds are typically long-term fixed rate debt obligations issued by a municipality or agency thereof, and as a result are generally subject to the various economic, political and other such risks that may affect an issuer. Like other fixed income securities, municipal bonds generally decline in value with increases in interest rates. The market for municipal bonds is generally less liquid than for other securities and therefore the price of municipal bonds may be more volatile and subject to greater price fluctuations than securities with greater liquidity.

Certain of the closed-end funds may invest in high-yield bonds. High-yield bonds are generally below investment grade quality (“junk” bonds). Securities rated “BBB-” by Standard & Poor’s or below “Baa3” by Moody’s are considered to be below investment grade. Investing in such bonds should be viewed as speculative and you should review your ability to assume the risks associated with investments which utilize such bonds. Junk bonds are subject to numerous risks including higher interest rates, economic recession, deterioration of the junk bond market, possible downgrades and defaults of interest and/or principal. Junk bond prices tend to fluctuate more than higher rated bonds and are affected by short-term credit developments to a greater degree.

The Portfolio, through its investments in various closed-end funds, may have significant exposure to certain market sectors. Accordingly, the Portfolio may be more susceptible to economic, political and other occurrences influencing those sectors.

Before investing, investors should carefully read the prospectus and consider the investment objectives, risks, charges and expenses. For this and more complete information about the trust(s), investors should ask their financial professional(s) for a prospectus or download one at invesco.com/uit.

This does not constitute a recommendation of any investment strategy or product for a particular investor. Investors should consult a financial professional before making any investment decisions.

Invesco unit investment trusts are distributed by the Sponsor, Invesco Capital Markets, Inc. and broker dealers including Invesco Distributors, Inc. Both firms are indirect, wholly owned subsidiaries of Invesco Ltd.
