

Invesco CollegeBound 2041-2042 Portfolio

Age-based

Investment objective

The portfolio seeks to achieve capital appreciation, income and preservation of capital as appropriate for its proximity to its target date. The target date is the year which corresponds to the potential college enrollment year of the beneficiary. The objective of the portfolio becomes more focused on capital preservation and income as it approaches its target date.

Portfolio management

Jeffrey Bennett, Scott Hixon, Alessio de Longis

Portfolio information

CUSIPS	A:76223R242	C:76223R234 I:76223R226
Total net assets	\$5,799,658	
Total number of holdings	17	

Expense ratios (%)

Class A units	0.82
Class C units	1.57
Class I units	0.57
Total annual asset-based fee per the current Program Description.	

Asset allocation (%)

■ US equities	53.79
■ Global equities	31.34
■ Fixed income	14.87

Current allocations may differ.

The asset class allocation of the portfolio adjusts automatically over time, becoming more conservative as college enrollment approaches.

Performance of a \$10,000 investment

Investment results

Average annual total returns (%) as of March 31, 2024

Quarter	2.82	6.55	5.43	6.43	6.63	6.64

The performance quoted is past performance and is not a guarantee of future results. Investment returns and principal value of an investment will fluctuate so that an account owner's units, when redeemed, may be worth more or less than their original cost. Current performance may be higher or lower than the performance data shown. For up-to-date month-end performance information please call 877 615 4116, or visit collegebound529.com. Performance figures reflect reinvested distributions of the underlying securities and changes in net asset value (NAV). No contingent deferred sales charge (CDSC) will be imposed on redemptions of Class C units following one year from the date units were purchased. Performance shown at NAV does not include applicable CDSC or front-end sales charges, which would have reduced the performance. Class I units have no sales charge; therefore, performance is at NAV. Returns less than one year are cumulative; all others are annualized. Index returns do not reflect any fees, expenses, or sales charges.

Calendar year total returns (%)

Class A units at NAV

2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	YTD
-	-	-	-	-	-	-	-	-4.11	12.77	6.55

Class I units are available only to certain investors. See the Program Description for more information.

Asset allocation/diversification does not guarantee a profit or eliminate the risk of loss.

A target date portfolio identifies a specific time at which investors are expected to begin making withdrawals. The principal value of the portfolio is not guaranteed at any time, including at the target date.

The Custom Invesco CollegeBound 2041-2042 Index is composed of the following indexes: Russell 1000 Index, the MSCI EAFE® Index, the Bloomberg U.S. Aggregate Bond Index and the Bloomberg U.S. Treasury Bellwethers (3M) Index. The Russell 1000 Index is a trademark/service mark of the Frank Russell Co. Russell ® is a trademark of the Frank Russell Co. The index composition may change based on the portfolio's target asset allocation. Therefore, the current index composition doesn't reflect its historical composition and will likely be altered in the future to better reflect portfolio's objective. An investment cannot be made directly in an index.

About risk

The portfolio is subject to the risks of the underlying investments. Market fluctuations may change the target weightings in the underlying investments and certain factors may cause the fund to withdraw its investments therein at a disadvantageous time.

In general, stock values fluctuate, sometimes widely, in response to activities specific to the company as well as general market, economic and political conditions.

An issuer may be unable to meet interest and/or principal payments, thereby causing its instruments to decrease in value and lowering the issuer's credit rating.

Derivatives may be more volatile and less liquid than traditional investments and are subject to market, interest rate, credit, leverage, counterparty and management risks. An investment in a derivative could lose more than the cash amount invested.

An investment in exchange-traded funds (ETFs) may trade at a discount to net asset value, fail to develop an active trading market, halt trading on the listing exchange, fail to track the referenced index, or hold troubled securities. ETFs may involve duplication of management fees and certain other expenses. Certain of the ETFs the fund invests in are leveraged, which can magnify any losses on those investments.

The risks of investing in securities of foreign issuers, including emerging markets, can include fluctuations in foreign currencies, political and economic instability, and foreign taxation issues.

Growth stocks tend to be more sensitive to

changes in their earnings and can be more volatile.

Interest rate risk refers to the risk that bond prices generally fall as interest rates rise and vice versa.

Junk bonds involve a greater risk of default or price changes due to changes in the issuer's credit quality. The values of junk bonds fluctuate more than those of high quality bonds and can decline significantly over short time periods.

Stocks of small and medium-sized companies tend to be more vulnerable to adverse developments, may be more volatile, and may be illiquid or restricted as to resale.

A value style of investing is subject to the risk that the valuations never improve or that the returns will trail other styles of investing or the overall stock markets.

The portfolio is subject to certain other risks. Please see the current Program Description for more information regarding the risks associated with an investment in the portfolio.

The use of environmental, social and governance (ESG) factors to exclude certain investments for non-financial reasons may limit market opportunities available to portfolios not using these criteria. Further, information used to evaluate ESG factors may not be readily available, complete or accurate, which could negatively impact the ability to apply ESG standards.

The Portfolio may invest in municipal securities issued by entities having similar characteristics, which may make the Portfolio more susceptible to fluctuation.

Before you invest, consider whether your or the beneficiary's home state offers any state tax or other state benefits such as financial aid, scholarship funds, and protection from creditors that are only available for investments in that state's qualified tuition program.
