The performance quoted is past performance and is not a guarantee of future results. Investment returns and principal value of an investment will fluctuate so that an account owner's units, when redeemed, may be worth more or less than their original cost. Current performance may be higher or lower than the performance data shown. For up-to-date month-end performance information please call 877 615 4116, or visit collegebound529.com. Performance figures reflect reinvested distributions of the underlying security and changes in net asset value (NAV). Performance shown at NAV for Class RZ units does not include applicable front-end sales charges, which would have reduced the performance. Class RA units have no sales charge; therefore, performance is at NAV. Returns less than one year are cumulative; all others are annualized. Index returns do not reflect any fees, expenses, or sales charges.

About risk

Risks of the Underlying Holding

Derivatives may be more volatile and less liquid than traditional investments and are subject to market, interest rate, credit, leverage, counterparty and management risks. An investment in a derivative could lose more than the cash amount invested.

Because the underlying fund operates as a passively managed index fund, adverse performance of a particular stock ordinarily will not result in its elimination from the underlying fund's portfolio. Ordinarily, the Adviser will not sell the underlying fund's portfolio securities except to reflect changes in the stocks that comprise the Index, or as may be necessary to raise cash to pay underlying fund shareholders who sell underlying

fund shares.

The Fund's value may be affected by changes in the stock markets. Stock markets may experience significant short-term volatility and may fall or rise sharply at times. Adverse events in any part of the equity or fixed-income markets may have unexpected negative effects on other market segments. Different stock markets may behave differently from each other and U.S. stock markets may move in the opposite direction from one or more foreign stock markets.

The portfolio is subject to certain other risks. Please see the current Program Description for more information regarding the risks associated with an investment in the portfolio.
