Disciplined active investment manager delivering cost-efficient, custom solutions

**\$23.9 billion<sup>3</sup>**

Fixed income SMA assets under management across 7 asset classes

**16,681**

Individual client accounts

**30+ years**

Established provider of SMAs

Source: Invesco, As of December 31, 2024

1) AUM includes all assets under advisement, distributed and overseen by Invesco. 2) This data represents Invesco Fixed Income assets globally. 3) This data represents Fixed Income SMA assets within the United States.

# Custom Fixed Income SMAs

Disciplined active investment manager delivering cost-efficient, custom solutions

## Custom SMAs by Invesco

### Customized Framework

SMA framework with multiple options across various asset classes to enable clients to customize their individual portfolio to meet their unique needs.

### Tax-Smart Strategies

Skilled investment teams who generate tax-alpha proactively for clients utilizing advanced analytics.

### Personalized Service

Trusted portfolio management partners and a high-touch, personalized client service group.

## Custom Fixed Income SMAs

### Customized Portfolios

Utilize a thoughtful framework for clients to customize portfolios based on duration, tax situation, liquidity needs, and values.

7 asset classes, 4 duration options, 18 state-specific options

### Disciplined Active Management

Seek to enhance returns through active security selection and sector allocation and implement a passive approach to duration management.

\$23.9 billion in fixed income assets under management

### Technology Automation

Continuous technological improvements to drive scale and create efficient, seamless trade execution.

16,681 custom fixed income client accounts

# Why Government SMAs

Predictable income and maturity stream to limit interest rate risk

## Portfolio Highlights

### Predictable Income

Laddered structure with regular coupon payments and different maturity dates can provide a predictable fixed income stream

### Interest Rate Diversification

Minimize interest rate risk by reinvesting maturing bond proceeds into securities with different yield profiles

### Model Based Process

Model based ladder strategies, where the underlying client portfolio will be rebalanced to the model using the investment team's proprietary trading technology

## Portfolio Targets

<b>Targeted Duration</b>	1.0 Years
<b>Maturity Range</b>	0 to 2 Years
<b>Holdings</b>	24
<b>Reinvestment Schedule</b>	Monthly
<b>Currency</b>	U.S. Dollar
<b>Asset Allocation</b>	100% Government

Source: Invesco, As of December 31, 2024.

Diversification does not guarantee a profit or eliminate the risk of loss. There can be no assurance that any investment process or strategy will achieve its investment objective.

## Sector Breakdown (%)

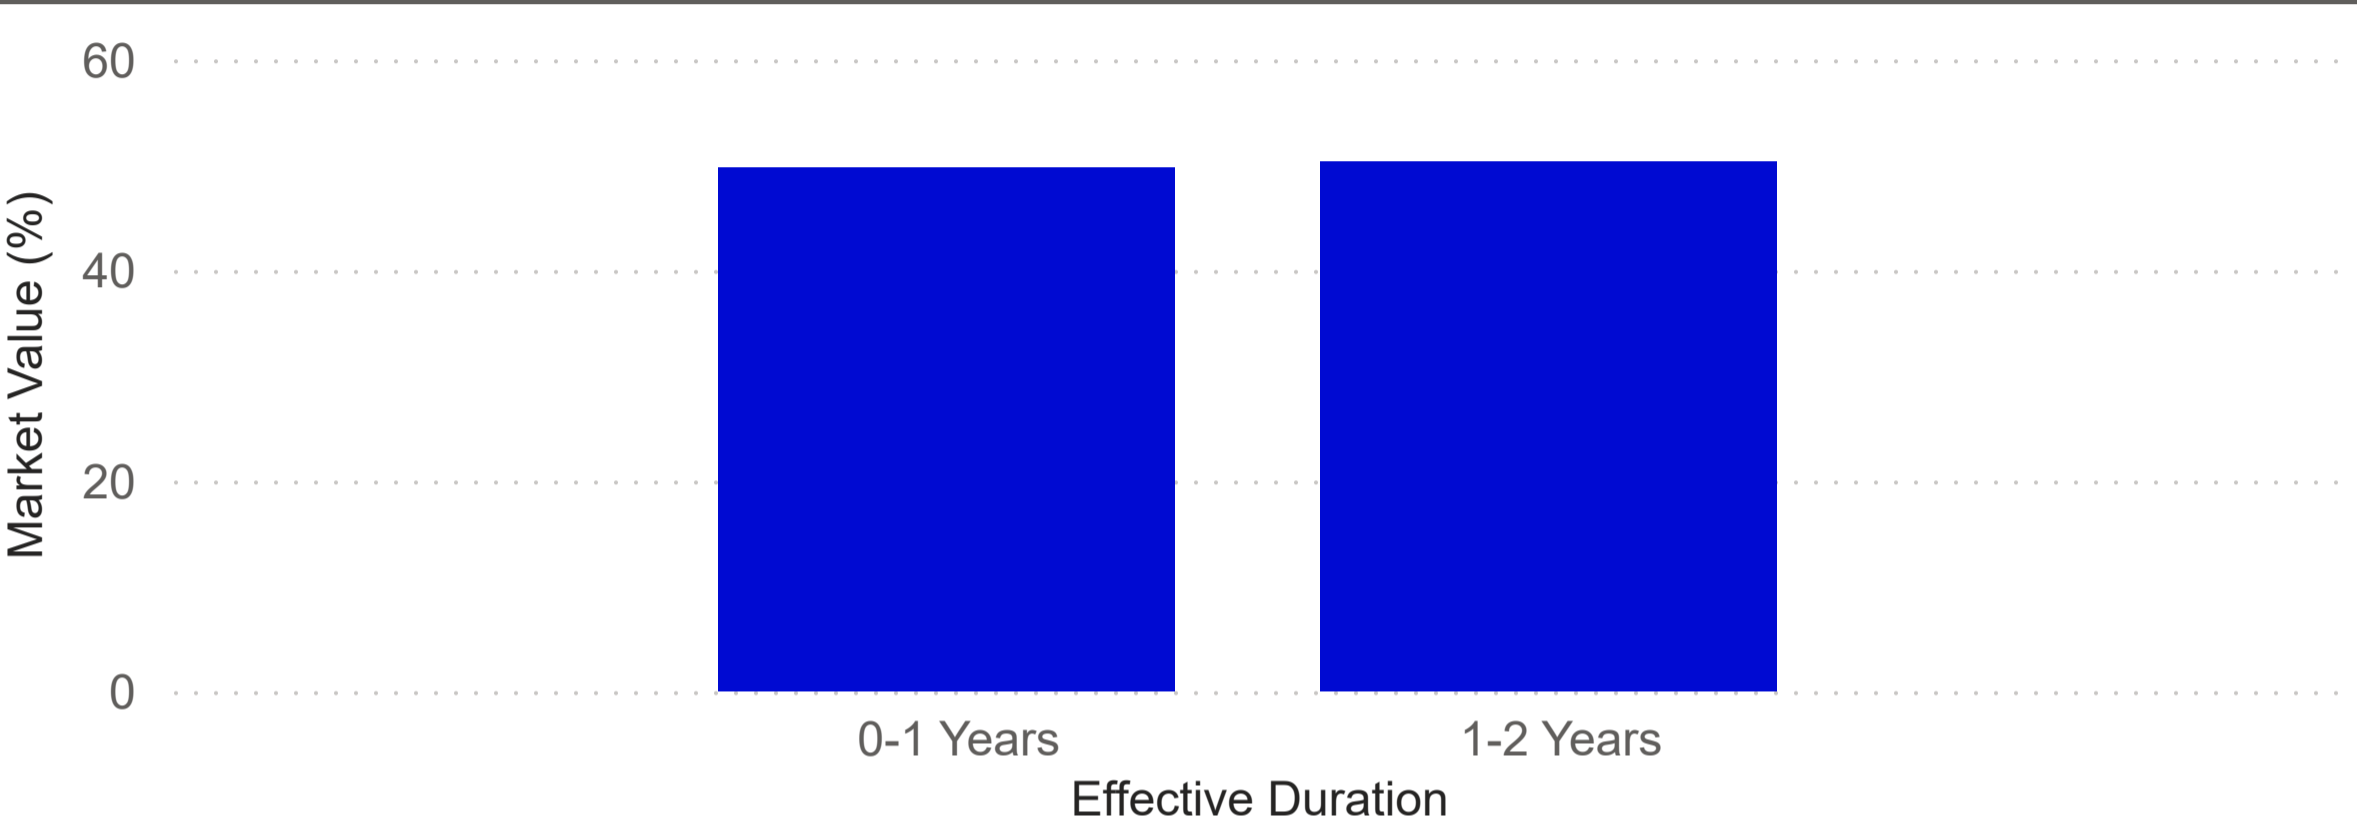

**Source:** Invesco, As of March 14, 2025. Portfolio information and characteristics are based on a representative portfolio as of a point in time and are subject to change. New portfolios opened in this strategy will be managed to the parameters of the same strategy but will not exactly mirror the representative portfolio as of the date of this presentation. Please obtain and review all financial material carefully before investing. Sector breakdown total may not add to 100% and excludes cash. Current income is market value times current yield (coupon divided by market price). Sustainable income is market value times yield to worst.

# Disclosure

## Definitions

**Coupon** - The average rate of the coupons of the bonds in the portfolio, weighted based on each holding size relative to the portfolio.

**Average Credit Rating** - An internal measurement created by Invesco Managed Accounts LLC and is calculated by taking the highest rated of the 3 major rating agencies (S&P, Moody's, and Fitch) at the security level. It is then changed into a numerical value, asset weighted and then calculated to be shown at the portfolio level in Standard & Poor's format. Not-rated securities are not included in the average credit rating calculation.

**Current Yield** - Calculated by dividing the annual coupon payment by the bond's current market price.

**Effective Duration** - Calculation for bonds with embedded options that takes into account that expected cash flows fluctuate as interest rates change. This figure is expressed in years.

**Taxable Equivalent Yield (TEY)** - Is the return that a tax-exempt bond needs to possess for its yield to equal the yield on a comparable taxable bond. This is a tool investors can use to compare the returns between a tax-free and taxable bond alternative. It is calculated by taking the tax-free bond yield and dividing it by one minus the tax rate.

**High Yield Bonds** - Rated below investment grade, as defined by S&P BB or below. High yield securities involve greater risk and are less liquid than higher grade issuers. Changes in general economic conditions, financial conditions of the issuers and in interest rates may adversely impact the ability of issuers to make timely payments of interest and principal.

**Yield to Maturity** - The yield an investor would receive if all bonds were held to maturity.

**Yield to Worst** - The lowest possible yield an investor can receive on a bond without the issuer defaulting.
