

# Invesco Bloomberg MVP Multi-factor ETF

## BMVP

### Fund description

The Invesco Bloomberg MVP Multi-factor ETF (Fund) is based on the Bloomberg MVP Index (Index). The Fund will normally invest at least 90% of its total assets in common stocks that comprise the Index. The Index is comprised of U.S. large-cap companies that exhibit strong fundamental characteristics for momentum (M), value (V), volatility (V) and profitability (P). The Index aims to select approximately 50 companies with the strongest momentum, most muted volatility, inexpensive valuations, and highest profitability through an aggregated sector-neutral MVP score. The Fund and the Index are rebalanced and reconstituted quarterly in January, April, July and October.

**Effective after the close of markets on Aug. 25, 2023, the Fund's name, ticker, underlying index, index provider, investment objective, investment strategy and management fee changed. The Fund's name and ticker changed from Invesco Dynamic Market ETF (ticker: PWC) to the Invesco Bloomberg MVP Multifactor ETF (ticker: BMVP). The Fund's Index Provider changed from ICE Data Indices, LLC to Bloomberg Finance, L.P. and its Underlying Index changed from the Dynamic Market Intellidex Index to the Bloomberg MVP Index; and as a result, the Fund's objective and strategy changed to seek to track the investment results of the new Underlying index by investing at least 90% of its total assets in securities that comprise the new Underlying Index. The Fund's management fee was also reduced from 0.50% to 0.29%. See the prospectus for more information. Effective at the close of markets on July 14, 2023, the Fund will effect a "3 for 1" forward split of its issued and outstanding shares. Please see the prospectus for more information.**

Returns less than one year are cumulative. Performance data quoted represents past performance. Past performance is not a guarantee of future results; current performance may be higher or lower than performance quoted. Investment returns and principal value will fluctuate and Shares, when redeemed, may be worth more or less than their original cost. See [invesco.com](https://www.invesco.com) to find the most recent month-end performance numbers. Market returns are based on the midpoint of the bid/ask spread at 4 p.m. ET and do not represent the returns an investor would receive if shares were traded at other times. Fund performance reflects fee waivers, absent which, performance data quoted would have been lower.

Not a Deposit Not FDIC Insured Not Guaranteed by the Bank May Lose Value Not Insured by any Federal Government Agency. Shares are not individually redeemable and owners of the Shares may acquire those Shares from the Fund and tender those Shares for redemption to the Fund in Creation Unit aggregations only, typically consisting of 10,000 Shares.

Index returns do not represent Fund returns. An investor cannot invest directly in an index.

Neither the underlying Index nor the benchmark indexes charge management fees or brokerage expenses, and no such fees or expenses were deducted from the performance shown; nor do any of the indexes lend securities, and no revenues from securities lending were added to the performance shown. In addition, the results actual investors might have achieved would have differed from those shown because of differences in the timing, amounts of their investments, and fees and expenses associated with an investment in the Fund.

<sup>1</sup>The S&P 500® Index is an unmanaged index considered representative of the US stock market.

<sup>2</sup>Dynamic Market Intellidex Index is a modified equal dollar weighted index composed of 100 stocks selected quarterly from the universe of the two thousand largest stocks by market capitalization based on ICE's proprietary quantitative method.

#### Investment risks

There are risks involved with investing in ETFs, including possible loss of money. Shares are not actively managed and are subject to risks similar to those of stocks, including those regarding short selling and margin maintenance requirements. Ordinary brokerage commissions apply. The Fund's return may not match the return of the Underlying Index. The Fund is subject to certain other risks. Please see the current prospectus for more information regarding the risk associated with an investment in the Fund.

The Fund may engage in frequent trading of its portfolio securities in connection with the rebalancing or adjustment of the Underlying Index.

Investments focused in a particular industry or sector are subject to greater risk, and are more greatly impacted by market volatility, than more diversified investments.

A value style of investing is subject to the risk that the valuations never improve or that the returns will trail other styles of investing or the overall stock markets.

Momentum style of investing is subject to the risk that the securities may be more volatile than the market as a whole or returns on securities that have previously exhibited price momentum are less than returns on other styles of investing.

The Fund may become "non-diversified," as defined under the Investment Company Act of 1940, as amended, solely as a result of a change in relative market capitalization or index weighting of one or more constituents of the Index. Shareholder approval will not be sought when the Fund crosses from diversified to non-diversified status under such circumstances.

There is no assurance that targeting exposure to certain factors will enhance the performance over time, and targeting exposure to certain factors may detract from performance in some market environments. There are no guarantees the specific factor exposures will be achieved.

#### Important information

Typically, security classifications used in calculating allocation tables are as of the last trading day of the previous month.

The Global Industry Classification Standard was developed by and is the exclusive property and a service mark of MSCI, Inc. and Standard & Poor's.

#### Glossary

**30 Day SEC Unsubsidized Yield** reflects the 30-day yield if the investment adviser were not waiving all or part of its fee or reimbursing the fund for part of its expenses. Total return would have also been lower in the absence of these temporary reimbursements or waivers.

**30 Day SEC Yield** is based on a 30-day period and is computed by dividing the net investment income per share earned during the period by the maximum offering price per share on the last day of the period.

**Intraday NAV** is a symbol representing estimated fair value based on the most recent intraday price of underlying assets.

**Weighted Harmonic Average Stock Price-to-Book-Value Ratio (P/B Ratio)** is the ratio of a stock's market price to a company's net asset value.

**Weighted Harmonic Average Stock Price-to-Earnings Ratio (P/E Ratio)** is the share price divided by earnings per share. It is measured on a 12-month trailing basis.

**Weighted Average Return on Equity** is net income divided by net worth.

**Weighted Market Capitalization** is the sum of each underlying securities market value.
