

# Invesco Active U.S. Real Estate ETF

PSR

## Fund description

The Invesco Active U.S. Real Estate ETF is an actively managed exchange-traded fund (ETF) that structures and selects its investments primarily from a universe of securities that are included within the FTSE NAREIT All Equity REITs Index at the time of purchase. The selection methodology uses quantitative and statistical metrics to identify attractively priced securities and manage risk. The Fund seeks to achieve high total return through growth of capital and current income by investing principally in equity real estate investment trusts (REITs). Portfolio management generally conducts a security and portfolio evaluation monthly.

Returns less than one year are cumulative. Performance data quoted represents past performance. Past performance is not a guarantee of future results; current performance may be higher or lower than performance quoted. Investment returns and principal value will fluctuate and Shares, when redeemed, may be worth more or less than their original cost. See [invesco.com](http://invesco.com) to find the most recent month-end performance numbers. Market returns are based on the midpoint of the bid/ask spread at 4 p.m. ET and do not represent the returns an investor would receive if shares were traded at other times. Fund performance reflects fee waivers, absent which, performance data quoted would have been lower.

## Fund inception: November 20, 2008

Not a Deposit Not FDIC Insured Not Guaranteed by the Bank May Lose Value Not Insured by any Federal Government Agency.

Shares are not individually redeemable and owners of the Shares may acquire those Shares from the Fund and tender those Shares for redemption to the Fund in Creation Unit aggregations only, typically consisting of 10,000 Shares.

Index returns do not represent Fund returns. An investor cannot invest directly in an index.

Neither the underlying Index nor the benchmark indexes charge management fees or brokerage expenses, and no such fees or expenses were deducted from the performance shown; nor do any of the indexes lend securities, and no revenues from securities lending were added to the performance shown. In addition, the results actual investors might have achieved would have differed from those shown because of differences in the timing, amounts of their investments, and fees and expenses associated with an investment in the Fund.

#### Investment risks

The Fund is non-diversified and may experience greater volatility than a more diversified investment.

There are risks involved with investing in ETFs, including possible loss of money. Actively managed ETFs do not necessarily seek to replicate the performance of a specified index. Actively managed ETFs are subject to risks similar to stocks, including those related to short selling and margin maintenance. Ordinary brokerage commissions apply. The Fund's return may not match the return of the Index. The Fund is subject to certain other risks. Please see the current prospectus for more information regarding the risk associated with an investment in the Fund.

REITs are pooled investment vehicles that trade like stocks and invest substantially all of their assets in real estate and may qualify for special tax considerations. REITs are subject to risks inherent in the direct ownership of real estate. A company's failure to qualify as a REIT under federal tax law may have adverse consequences to the REIT's shareholders. REITs may have expenses, including advisory and administration, and REIT shareholders will incur a proportionate share of the underlying expenses.

Investments focused in a particular sector, such as real estate, are subject to greater risk, and are more greatly impacted by market volatility, than more diversified investments.

Stocks of small and mid-sized companies tend to be more vulnerable to adverse developments, may be more volatile, and may be illiquid or restricted as to resale.

The investment techniques and risk analysis used by the portfolio managers may not produce the desired results.

Environmental, Social and Governance (ESG) considerations may vary across investments and issuers, and not every ESG factor may be identified or evaluated for investment. The Fund will not be solely based on ESG considerations; therefore, issuers may not be considered ESG-focused companies. ESG factors may affect the Fund's exposure to certain companies or industries and may not work as intended. The Fund may underperform other funds that do not assess ESG factors or that use a different methodology to identify and/or incorporate ESG factors. ESG is not a uniformly defined characteristic and as a result, information used by the Fund to evaluate such factors may not be readily available, complete or accurate, and may vary across providers and issuers. There is no guarantee that ESG considerations will enhance Fund performance.

#### Important information

Typically, security classifications used in calculating allocation tables are as of the last trading day of the previous month.

The Global Industry Classification Standard was developed by and is the exclusive property and a service mark of MSCI, Inc. and Standard & Poor's.

This does not constitute a recommendation of any investment strategy or product for a particular investor. Investors should consult a financial professional before making any investment decisions.

**Before investing, investors should carefully read the prospectus and consider the investment objectives, risks, charges and expenses. #### Glossary

**30 Day SEC Yield** is based on a 30-day period and is computed by dividing the net investment income per share earned during the period by the maximum offering price per share on the last day of the period.

**Intraday NAV** is a symbol representing estimated fair value based on the most recent intraday price of underlying assets.

**30 Day SEC Unsubsidized Yield** reflects the 30-day yield if the investment adviser were not waiving all or part of its fee or reimbursing the fund for part of its expenses during the period as defined by the guidelines, where applicable, referenced in the current prospectus. Total return would have also been lower in the absence of these temporary reimbursements or waivers.
