

Invesco Rochester® AMT-Free New York Municipal Fund

Q1 2026

Key takeaways

1 Fund performance
Invesco Rochester® AMT-Free New York Municipal Fund Class A shares at net asset value (NAV) outperformed its style-specific index, the S&P Municipal Bond New York 5+ Year Investment Grade Index.

2 Seeking attractive opportunities through collaborative management
Invesco Municipal Bond team uses a collaborative management approach. Relying on our size and experience, we seek to identify the best opportunities to achieve potentially better outcomes for shareholders.

3 Analysis focused on creditworthiness
Our team uses a bottom-up fundamental credit process focused on creditworthiness of individual issuers with an overlay of macroeconomic factors to capitalize on market inefficiencies. Our process has been time tested over full market cycles.

Investment objective

The fund seeks tax-free income. The strategy typically seeks investment-grade bonds the income of which is exempt from federal, New York State, and New York City personal income taxes and the federal alternative minimum tax.

Fund facts

Manager perspective and outlook

- The first quarter saw mixed results in the municipal bond market, with investment grade, high yield and taxable municipals delivering returns of -0.18%, 0.71% and 0.43%, respectively.¹ In March, increased supply and geopolitical tensions offset much of the strong performance in the first two months of the quarter.¹
- New municipal issuance reached \$135 billion, 11% higher than the first quarter of 2025. Issuance was likely driven by significant US infrastructure needs, higher supply costs and reduced federal spending.¹
- Municipal mutual funds and exchange-traded funds (ETFs) had strong net inflows over the quarter, totaling approximately \$26 billion.²
- The US Federal Reserve (Fed) kept the federal funds rate steady during the quarter, reiterating its commitment to balancing maximum employment and a 2% inflation target.³
- We believe state and local government budgets remain on solid footing. While there has been a slowdown in credit rating upgrades, they still exceeded downgrades in the first quarter, highlighting in our view strong underlying fundamentals.¹
- Our research team is leveraging its deep credit expertise to actively seek out market dislocations that we believe can enhance shareholder outcomes.
- Looking ahead, we see compelling opportunities in municipals. Steady issuance and ongoing demand for tax-exempt income, combined with high absolute yields and solid fundamentals, support in our view a favorable investment environment.

Portfolio positioning

Yield Curve and Duration Positioning: Overall, we have a constructive outlook on duration and are maintaining the fund's duration exposure, which we believe is opportunistic, following the steepening of the municipal yield curve in 2025. We plan to selectively add longer duration securities to the fund when appropriate, having identified particular value at the long end of the yield curve, specifically in maturities of 15 to 20 years.

Sector Allocations: We maintain an overweight position in revenue bonds relative to state and local general obligation bonds, though we note that pension risks historically associated with general obligation bonds have generally been mitigated over the past several years. Within the revenue bond segment, the fund's largest exposures are in the dedicated tax, tobacco settlement and higher education sectors.

Credit Conditions: We maintain a positive outlook on fundamentals in the municipal market, as credit rating upgrades have continued to outpace downgrades. While various sectors have come under pressure due to reduced federal support and inflation-driven cost pressures, we continue to rely on our extensive bottom-up research capabilities to identify strong credits with attractive yields.

Performance highlights

The first quarter began on a strong note with supportive market technicals and steady inflows. However, in March, rate volatility brought on by geopolitical events and weaker market technicals reversed much of the earlier gains. The Fed held rates steady, following three rate cuts in 2025. Yields on the longer end of the municipal yield curve increased, with 10- and 30-year bond yields rising by 0.36% and 0.23%, respectively.⁴ Overall, higher quality municipal credits generally underperformed during the quarter.

Contributors to performance

Contributors to relative return this quarter included the following:

The fund's security selection in bonds with 5% coupons added to relative performance. The fund's overweights in the higher education and health care sectors also contributed to relative performance.

Detractors from performance

Detractors from relative return this quarter included the following:

An overweight in zero-coupon, long maturity tobacco bonds detracted from relative performance. The fund's security selection among bonds with a 4% coupon also detracted from relative performance.

Standardized performance (%) as of March 31, 2026

		Quarter	YTD	1 Year	3 Years	5 Years	10 Years	Since Inception

Class Y shares inception: 01/31/11	NAV	0.12	0.12	3.26	2.75	0.41	2.80	4.35
S&P Municipal Bond New York 5+ Year Investment Grade Index (USD)		-0.18	-0.18	4.53	2.85	0.75	2.09	-
Total return ranking vs. Morningstar Muni New York Long category (Class A shares at NAV)		-	-	77% (58 of 77)	81% (62 of 76)	76% (57 of 75)	7% (5 of 58)	-

Expense ratios per the current prospectus: Class A: Net: 1.19%, Total: 1.19%; Class R6: Net: 0.91%, Total: 0.91%; Class Y: Net: 0.95%, Total: 0.95%.

Performance quoted is past performance and cannot guarantee comparable future results; current performance may be lower or higher. Visit [invesco.com](https://www.invesco.com) for the most recent month-end performance. Performance figures reflect reinvested distributions and changes in net asset value (NAV). Investment return and principal value will vary so that you may have a gain or a loss when you sell shares. Returns less than one year are cumulative; all others are annualized. Class R6, and Class Y shares have no sales charge; therefore, performance is at NAV. Performance shown prior to the inception date of Class R6 shares is that of Class A shares and includes the 12b-1 fees applicable to Class A shares. As the result of a reorganization on May 24, 2019, the returns of the fund for periods on or prior to May 24, 2019 reflect performance of the Oppenheimer predecessor fund. Share class returns will differ from the predecessor fund due to a change in expenses and sales charges. Index source: RIMES Technologies Corp. Had fees not been waived and/or expenses reimbursed in the past, returns would have been lower. Performance shown at NAV does not include the applicable front-end sales charge, which would have reduced the performance.

Class Y and R6 shares have no sales charge; therefore performance is at NAV. Class Y shares are available only to certain investors. Class R6 shares are closed to most investors. Please see the prospectus for more details.

Unless otherwise specified, all information is as of 03/31/26. Unless stated otherwise, Index refers to S&P Municipal Bond New York 5+ Year Investment Grade Index (USD).

S&P Municipal Bond New York 5+ Year Investment Grade Index is a sub-set of the broad S&P Municipal Bond Index. This index of market value-weighted investment grade U.S. municipal bonds seeks to measure the performance of New York issued U.S. municipals whose maturities are greater than or equal to 5 years. An investment cannot be made directly in an index.

The Global Industry Classification Standard was developed by and is the exclusive property and service mark of MSCI, Inc. and Standard & Poor's.

About Risk

The Fund may invest in privately issued securities, including 144A securities which are restricted (i.e. not publicly traded). The liquidity market for Rule 144A securities may vary, as a result, delay or difficulty in selling such securities may result in a loss to the Fund.

The Fund may use leverage to seek to enhance income, which creates the likelihood of greater volatility of the Fund's shares and may also impair the ability to maintain its qualification for federal income tax purposes as a regulated investment company.

An issuer may be unable to meet interest and/or principal payments, thereby causing its instruments to decrease in value and lowering the issuer's credit rating.

Derivatives may be more volatile and less liquid than traditional investments and are subject to market, interest rate, credit, leverage, counterparty, and management risks. An investment in a derivative could lose more than the cash amount invested.

Interest rate risk refers to the risk that bond prices generally fall as interest rates rise and vice versa.

Inverse floating rate obligations may be subject to greater price volatility than a fixed income security with similar qualities. When short-term interest rates rise, they may decrease in value and produce less or no income and are subject to risks similar to derivatives.

Junk bonds have greater risk of default or price changes due to changes in the issuer's credit quality. Junk bond values fluctuate more than high quality bonds and can decline significantly over a short time.

Leverage created from borrowing or certain types of transactions or instruments may impair liquidity, cause positions to be liquidated at an unfavorable time, lose more than the amount invested, or increase volatility.

The investment techniques and risk analysis used by the portfolio managers may not produce the desired results.

The Fund invests in obligations, exempt from regular federal individual income taxes, of the governments of U.S. territories, commonwealths and possessions such as Puerto Rico, the U.S. Virgin Islands, Guam and the Northern Mariana Islands. As result, the Fund may be adversely affected by local political, economic, social and environmental conditions and developments, including natural disasters affecting such obligations. Certain municipalities the Fund invests in, such as Puerto Rico, have significant financial difficulties, including risk of default, insolvency or bankruptcy; and may be subject to credit rating downgrades affecting the payment of principal and interest, the market values and marketability of such municipal obligations.

The Fund may invest in municipal securities issued by entities having similar characteristics, which may make the fund more susceptible to fluctuation.

Municipal securities have the risk that legislative or economic conditions could affect an issuer's ability to make principal and/or interest payments.

Because the Fund invests primarily in a portfolio of one state's municipal securities, the Fund is more susceptible to political, economic, regulatory or other factors affecting that state than a Fund that does not limit its investments to such issuers.

There is no guarantee that the Fund's income will be exempt from federal and state income taxes.

Based on a Master Settlement Agreement ("MSA") with 46 states and six other US jurisdictions, large US tobacco manufacturers have agreed to make annual payments to government entities in exchange for the release of all litigation claims. Several states have sold bonds backed by those future payments, including (i) bonds that make payments only from a state's interest in the MSA and (ii) bonds that make payments from both the MSA revenue and from an "appropriation pledge" by the state which requires the state to pass a specific periodic appropriation to make the payments and is generally not an unconditional guarantee of payment by a state. Settlement payments are based on factors, including, but not limited to, annual domestic cigarette shipments, cigarette consumption, inflation and the financial capability of participating tobacco companies. Payments could be reduced if consumption decreases, if market share is lost to non-MSA manufacturers, or if there is a negative outcome in litigation regarding the MSA, including challenges by participating tobacco manufacturers regarding the amount of annual payments owed under the MSA.

The Fund is subject to certain other risks. Please see the current prospectus for more information regarding the risks associated with an investment in the Fund.

Ratings source: Standard & Poor's, Moody's or Fitch, as applicable. A credit rating is an assessment provided by a nationally recognized statistical rating organization (NRSRO) of the creditworthiness of an issuer with respect to debt obligations, including specific securities, money market instruments or other debts. Ratings are measured on a scale that generally ranges from AAA (highest) to D (lowest); ratings are subject to change without notice. Not Rated (NR) indicates the debtor was not rated and should not be interpreted as indicating low quality. A negative in Cash indicates fund activity that has accrued or is pending settlement. Pre-Refunded/Escrowed to Maturity (Prerefunded/ETM) bonds are issues backed by an escrow account, invested in US Treasuries, which is used to pay bondholders. Other includes bonds rated below single B and bonds currently not paying a coupon. For more information on rating methodologies, please visit the following NRSRO websites: www.standardandpoors.com and select 'Understanding Credit Ratings' under Rating Resources 'About Ratings' on the homepage; <https://ratings.moody.io/ratings> and select 'Understanding Ratings' on the homepage; www.fitchratings.com and select 'Ratings Definitions Criteria' under 'Resources' on the homepage. Then select 'Rating Definitions' under 'Resources' on the 'Contents' menu.

The fund holdings are organized according to the Global Industry Classification Standard, which was developed by and is the exclusive property and service mark of MSCI Inc. and Standard & Poor's.

* **30-day SEC yield** is based on a 30-day period and is computed by dividing the net investment income per share earned during the period by the maximum offering price per share on the last day of the period. **30-day SEC unsubsidized yield** reflects the 30-day yield if the investment adviser were not waiving all or part of its fee or reimbursing the fund for part of its expenses. Total return would have also been lower in the absence of these temporary reimbursements or waivers. **Option adjusted duration** is a measure, as estimated by the fund's portfolio managers, of a bond fund's price sensitivity to changes in interest rates. It takes into account mortgage prepayments, puts, adjustable coupons and potential call dates. **Tax equivalent 30-day SEC yield** quoted above is based on the 2026 top federal tax rate of 40.8%, including the 3.8% tax on earned income under the Patient Protection and Affordable Care Act, as applicable. Had fees not been waived and/or expenses reimbursed, the yield would have been lower. **Weighted average maturity** is a measure, as estimated by the fund's portfolio managers, of the length of time the average security in a bond fund will mature or be redeemed by its issuer. It takes into account mortgage prepayments, puts, adjustable coupons and potential call dates.
