

# Invesco Fixed Income Investment-Grade Municipal Strategies

## Invesco's municipal business

- + Five distinct national investment-grade municipal investment styles.
- + The Municipal Fixed Income team manages \$59.7 billion on behalf of our clients and is ranked among the top five municipal bond managers by assets.<sup>1</sup>
- + An integrated, team-based investment process that combines the strength of our fundamental credit research staff with the market knowledge and investment experience of our portfolio managers with an average of over 20 years of industry experience.

## Five distinct investment-grade municipal strategies

We offer five distinct national investment-grade municipal strategies with some important things in common: consistent management, disciplined process and a focus on long-term value.

### Proven investment process

The team's investment process has weathered multiple market cycles, resulting in success across all five strategies. Proprietary credit research, the cornerstone of our investment process, is combined with on-site visits of municipal projects. Portfolio managers make informed decisions by combining experience-based knowledge with market trends to uncover and exploit relative value opportunities.

## Choosing the right investment-grade municipal bond fund

We offer investors a variety of choices to meet their financial goals within their risk tolerance. Invesco offers national investment-grade municipal bond funds that provide a wide range of credit quality, maturities and duration.

**Performance quoted is past performance and cannot guarantee comparable future results; current performance may be lower or higher. Visit [invesco.com/performance](https://www.invesco.com/performance) for the most recent month-end performance. Returns less than one year are cumulative. Performance figures reflect reinvested distributions and changes in net asset value (NAV). Investment return and principal value will vary so that you may have a gain or a loss when you sell shares. Performance shown at NAV does not include applicable front-end sales charges, which would have reduced the performance.** Class A share performance reflects any applicable fee waivers or expense reimbursements. Had fees not been waived and/or expenses reimbursed in the past, returns would have been lower. Returns less than one year are cumulative, all others are annualized. The gross expense ratio on Class A shares for **Invesco Short Term Municipal Fund** is 0.82%, **Invesco Limited Term Municipal Income Fund** is 0.61%, **Invesco Intermediate Term Municipal Income Fund** is 0.89%, **Invesco AMT-Free Municipal Income Fund** is 0.86%, and **Invesco Municipal Income Fund** is 1.05%. Expenses are as of the fund's fiscal year-end as outlined in the fund's current prospectus. As the result of a reorganization on May 24, 2019, the returns of the fund for periods on or prior to May 24, 2019 reflect performance of the Oppenheimer predecessor fund. Share class returns will differ from the predecessor fund due to a change in expenses and sales charges.

**About Risk**

All or a portion of the fund's otherwise tax-free or tax-exempt income may be subject to the federal alternative minimum tax and state and local taxes. There is no guarantee that the fund's income will be exempt from federal and state income taxes.

There is a risk that the Federal Reserve Board (FRB) and central banks may raise the federal funds and equivalent foreign rates. This risk is heightened due to the potential "tapering" of the FRB's quantitative easing program and other similar foreign central bank actions, which may expose fixed income investments to heightened volatility and reduced liquidity, particularly those with longer maturities.

An issuer may be unable to meet interest and/or principal payments, thereby causing its instruments to decrease in value and lowering the issuer's credit rating.

Derivatives may be more volatile and less liquid than traditional investments and are subject to market, interest rate, credit, leverage, counterparty and management risks. An investment in a derivative could lose more than the cash amount invested.

The income you receive from the fund is based primarily on prevailing interest rates, which can vary widely over the short and long term. If interest rates drop, your income from the fund may drop as well.

Interest rate risk refers to the risk that bond prices generally fall as interest rates rise and vice versa.

Junk bonds involve a greater risk of default or price changes due to changes in the issuer's credit quality. The values of junk bonds fluctuate more than those of high quality bonds and can decline significantly over short time periods.

Securities which are in the medium- and lower-grade categories generally offer higher yields than are offered by higher-grade securities of similar maturity, but they also generally involve more volatility and greater risks.

Investing in municipal securities issued by entities having similar characteristics may make the fund more susceptible to fluctuation.

Municipal securities are subject to the risk that legislative or economic conditions could affect an issuer's ability to make payments of principal and/or interest.

**Invesco AMT-Free Municipal Income Fund:** The fund may use leverage to seek to enhance income, which creates the likelihood of greater volatility of the Fund's shares and may also impair the ability to maintain its qualification for federal income tax purposes as a regulated investment company.

**Invesco Short Term Municipal Fund:** Economic problems in certain US states increase the risk of investing in municipal obligations, such as California, New York or Texas, including the risk of potential issuer default, heightens the risk that the prices of municipal obligations, and the fund's net asset value, will experience greater volatility. See the prospectus for more information.

The funds are subject to certain other risks. Please see the prospectus for more information regarding the risks associated with an investment in the fund.

**Before investing, investors should carefully read the prospectus and/or summary prospectus and carefully consider the investment objectives, risks, charges and expenses. For this and more complete information about the fund(s), investors should contact their financial professional for a prospectus and/or summary prospectus or visit [invesco.com/fundprospectus](https://www.invesco.com/fundprospectus).**

Note: Not all products, materials or services available at all firms. Financial professionals, please contact your home office.

This does not constitute a recommendation of any investment strategy or product for a particular investor. Investors should consult a financial professional before making any investment decisions.

All data as of September 30, 2020, unless otherwise stated.

**Option adjusted duration** is a measure, as estimated by the fund's portfolio managers, of a bond fund's price sensitivity to changes in interest rates. It takes into account mortgage prepayments, puts, adjustable coupons and potential call dates.

**SEC yield** is a calculation for determining the amount of portfolio income, excluding non-income items as prescribed by the SEC. Yields are subject to change.
