

Invesco S&P 500® Equal Weight Communication Services ETF

RSPC
Fund description

The Invesco S&P 500® Equal Weight Communication Services ETF (Fund) is based on the S&P 500® Equal Weight Communication Services Plus Index (Index). The Fund will invest at least 90% of its total assets in the securities that comprise the Index. The Index is comprised of common stocks of companies in the Global Industry Classification Standard (GICS) communication services sector within the S&P 500 Index. The Fund and Index will rebalance quarterly after the close of business on the third Friday in March, June, September and December.

Returns less than one year are cumulative. Performance data quoted represents past performance. Past performance is not a guarantee of future results; current performance may be higher or lower than performance quoted. Investment returns and principal value will fluctuate and Shares, when redeemed, may be worth more or less than their original cost. See [invesco.com](https://www.invesco.com) to find the most recent month-end performance numbers. Market returns are based on the midpoint of the bid/ask spread at 4 p.m. ET and do not represent the returns an investor would receive if shares were traded at other times. Please keep in mind that high, double-digit and/or triple-digit returns are highly unusual and cannot be sustained.

Index returns do not represent Fund returns. An investor cannot invest directly in an index.

Neither the underlying Index nor the benchmark indexes charge management fees or brokerage expenses, and no such fees or expenses were deducted from the performance shown; nor do any of the indexes lend securities, and no revenues from securities lending were added to the performance shown. In addition, the results actual investors might have achieved would have differed from those shown because of differences in the timing, amounts of their investments, and fees and expenses associated with an investment in the Fund.

¹The S&P 500® Index is an unmanaged index considered representative of the US stock market.

²The S&P 500 Communication Services Index is a market-cap-weighted index that includes companies in the S&P 500 that are classified as communication services companies.

Investment risks

There are risks involved with investing in ETFs, including possible loss of money. Shares are not actively managed and are subject to risks similar to those of stocks, including those regarding short selling and margin maintenance requirements. Ordinary brokerage commissions apply. The Fund's return may not match the return of the Underlying Index. The Fund is subject to certain other risks. Please see the current prospectus for more information regarding the risk associated with an investment in the Fund.

Investments focused in a particular sector, such as communication services, are subject to greater risk, and are more greatly impacted by market volatility, than more diversified investments.

Stocks of medium-sized companies tend to be more vulnerable to adverse developments, may be more volatile, and may be illiquid or restricted as to resale.

The Fund is non-diversified and may experience greater volatility than a more diversified investment.

Because the Fund may invest in other investment companies, including ETFs and closed-end funds, it's subject to the risks associated with that investment company, including the potential for loss of value of the underlying securities held by the investment company or may become illiquid. The Fund will indirectly pay a proportional share of the fees and expenses of the investment companies in which it invests. ETF or closed-end fund shares may trade at a discount or premium relative to the NAV of its shares and the listing exchange may halt trading of the ETF's or closed-end fund's shares.

Glossary

30 Day SEC Unsubsidized Yield reflects the 30-day yield if the investment adviser were not waiving all or part of its fee or reimbursing the fund for part of its expenses during the period as defined by the guidelines, where applicable, referenced in the current prospectus. Total return would have also been lower in the absence of these temporary reimbursements or waivers.

30 Day SEC Yield is based on a 30-day period and is computed by dividing the net investment income per share earned during the period by the maximum offering price per share on the last day of the period.

Intraday NAV is a symbol representing estimated fair value based on the most recent intraday price of underlying assets.

Weighted Harmonic Average Stock Price-to-Book-Value Ratio (P/B Ratio) is the ratio of a stock's market price to a company's net asset value.

Weighted Harmonic Average Stock Price-to-Earnings Ratio (P/E Ratio) is the share price divided by earnings per share. It is measured on a 12-month trailing basis.

Weighted Average Return on Equity is net income divided by net worth.

Weighted Market Capitalization is the sum of each underlying securities market value.
