

# Invesco Strategic Active 60/40 Portfolio

## Why invest in this portfolio

- 1 Leading active management**  
Allocates to managers that have demonstrated consistency of excess returns over time.
- 2 Strategic approach**  
A robust, actively managed portfolio with less frequent rebalancing.
- 3 Diversified**  
Broad exposure to diversified drivers of risk and return, across asset classes.

## Portfolio characteristics

Weighted average expense ratio	0.62%
Number of holdings	11
Weighted average 12 month yield	13.98%

## Portfolio mix

U.S. Equity	42.1
U.S. Fixed Income	38.0
International Equity	17.9
Cash	2.0

## Portfolio objective

The Invesco Strategic Active Portfolios utilize strategic long-term asset class allocations to produce diversified portfolios that aim to outperform the benchmark throughout a full market cycle. With multiple risk levels in the suite, there are a range of potential solutions to suit an investor's risk profile and return objective.

**NOT A DEPOSIT | NOT FDIC-INSURED | NOT GUARANTEED BY THE BANK | MAY LOSE VALUE | NOT INSURED BY ANY FEDERAL GOVERNMENT AGENCY**

Invesco may rebalance the portfolio on a more frequent basis than noted if necessary due to changing market conditions.

The model portfolio expense ratio is a weighted average net expense ratio of the underlying holdings. The expenses do not include transaction costs.

Brokerage commissions may or may not apply.

The weighted average 12 month yield represents the average income generated by the portfolio's holdings over the past 12 months, weighted by each holding's size in the portfolio. Yield reflects underlying fund fees and expenses but does not reflect advisory fees, brokerage commissions, or additional investor costs.

All material presented is compiled from sources believed to be reliable and current, but accuracy cannot be guaranteed. This is not to be construed as an offer to buy or sell any financial instruments and should not be relied upon as the sole factor in an investment making decision. As with all investments there are associated inherent risks. This should not be considered a recommendation to purchase any investment product. This does not constitute a recommendation of any investment strategy for a particular investor. Investors should consult a financial professional before making any investment decisions if they are uncertain whether an investment is suitable for them. Please obtain and review all financial material carefully before investing. Factor investing is an investment strategy in which securities are chosen based on certain characteristics and attributes. Where cash is shown, it is for the model level. It does not include possible amounts held within each underlying fund. There can be no assurance that any investment process or strategy will achieve its investment objective. Asset allocation and diversification do not guarantee a profit or eliminate the risk of loss.

The inception date for this portfolio is September 30, 2018. Returns for 2018 are from September 30, 2018 (inception) through December 31, 2018. Past performance does not guarantee future results. An investment cannot be made directly in an index. Returns greater than 1 year are annualized. "Pure" gross of fees returns reflect the deduction of trading costs but do not reflect any other expenses, outside of the operational expenses, and are supplemental to net returns. See notes on page 3. The benchmark for this portfolio is the Invesco HCB Multi Asset 60/40 StratAct Linked Index.

All investing involves risks. Understanding these risks is essential for making informed investment decisions. Equities may fluctuate in value due to company-specific events or broader market conditions, as well as economic, political, or social developments in the US or abroad. Bonds carry risks related to interest rates, inflation, and credit quality; high-yield bonds, in particular, may experience greater market fluctuations and a higher risk of loss of income and principal compared to higher-rated bonds. Investments in foreign securities, including American Depositary Receipts (ADRs), involve additional risks such as foreign currency fluctuations and potential volatility caused by adverse political, economic, or other developments, with these risks being more pronounced in emerging markets. Concentrating investments in a single industry or sector can increase risk due to lack of diversification. Real estate securities are subject to changes in the value of underlying properties, economic conditions, interest rate fluctuations, and risks associated with renting properties, such as tenant defaults. Commodities investments face risks from market price volatility, regulatory and interest rate changes, credit risk, economic shifts, and adverse political or financial factors. Managed futures are speculative and involve a high degree of risk. Exchange-Traded Funds (ETFs) carry risks that may affect their price, yield, total return, and ability to meet investment objectives; ETF shares may trade at a premium or discount to their net asset value (NAV) and may incur management fees, transaction costs, or other expenses. Mutual funds are also subject to investment risks, including the possible loss of principal, and their investment return and principal value will fluctuate, meaning that shares redeemed may be worth more or less than the original cost.

## Invesco Strategic Active 60/40 Portfolio Wrap Composite

Year	"Pure" gross return* (%)	Net return (%)	Invesco HCB Multi Asset 60/40 StratAct Linked Index return (%)	Composite dispersion (%)	Composite 3-year annualized standard deviation (%)	Benchmark 3-year annualized standard deviation (%)	Number of accounts	Composite assets (\$ millions)	Total firm assets (\$ billions)	Wrap assets (%)

### Annualized compound returns as of Dec. 31, 2025

Period	"Pure" gross return* (%)	Net return (%)	Invesco HCB Multi Asset 60/40 StratAct Linked Index return (%)
1 year	11.65	8.37	15.80
3 year	12.39	9.09	14.25
5 year	5.17	2.07	6.69
Since Inception (09/30/2018)	6.59	3.46	7.81

Performance greater than 1 year is annualized. \* "Pure" gross of fees returns reflect the deduction of trading costs but do not reflect any other expenses, outside of the operational expenses, and are supplemental to net returns. See note below.  
Returns for 2018 are from September 30, 2018 (inception) through December 31, 2018.

Invesco Worldwide claims compliance with the Global Investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS standards. Invesco Worldwide has been independently verified for the periods 1st January 2003 through 31st December 2024. The verification reports are available upon request. A firm that claims compliance with the GIPS standards must establish policies and procedures for complying with all the applicable requirements of the GIPS standards. Verification provides assurance on whether the firm's policies and procedures related to composite and pooled fund maintenance, as well as the calculation, presentation, and distribution of performance, have been designed in compliance with the GIPS standards and have been implemented on a firm-wide basis. Verification does not provide assurance on the accuracy of any specific performance report. GIPS® is a registered trademark of CFA Institute. CFA Institute does not endorse or promote this organization, nor does it warrant the accuracy or quality of the content contained herein.

For purposes of compliance with Global Investment Performance Standards (GIPS®), "Invesco Worldwide" refers collectively to all direct or indirect subsidiaries of Invesco Ltd. that provide discretionary investment advice with the exception of the following entities: Invesco Investment Management Ltd., Invesco Investment Advisers LLC, Invesco Asset Management Australia (Holdings) Ltd., Invesco Global Real Estate Asia Pacific, Inc., IRE (Cayman) Ltd., Invesco Senior Secured Management, Inc., Invesco Private Capital, Inc., and Invesco Capital Management LLC. Invesco Great Wall Fund Management Company Limited is compliant with GIPS but is not part of Invesco Worldwide.

The Invesco Strategic Active 60/40 Portfolio Wrap Composite includes all discretionary accounts styled after the Invesco Strategic Active 60/40 Model Portfolio. The strategy seeks to provide a balanced approach that emphasizes stocks for capital growth and income to temper volatility. Each target risk model portfolio attempts to provide long-term outperformance over its benchmark through a combination of top-down allocation decisions and effective selection of underlying funds. For periods beginning December 1, 2023, the composite is composed of 100% non-fee paying discretionary wrap accounts. Prior to December 1, 2023, the composite was composed of 100% non-fee paying discretionary institutional accounts. The historical performance results are those of the Invesco Strategic Active 60/40 Institutional Composite. The composite is managed in comparison to, not duplication of, the benchmark. The composite was created in October 2018.

The Invesco HCB Multi Asset 60/40 StratAct Linked Index is comprised of 48% MSCI ACWI All Cap Net Return Index / 12% Russell 3000 Index / 4% Bloomberg Short Treasury Index / 30% Bloomberg US Aggregate Bond Index / 4% Bloomberg US Corporate High Yield Index / 2% JP Morgan EMBI Global Diversified Index; and is rebalanced daily. Prior to October 1, 2024, the benchmark was comprised of 60% of the MSCI All Country World Index (ACWI) Net Return (NR) and 40% of the Bloomberg U.S. Aggregate Total Return (TR) Index Unhedged. The 40% Bloomberg Global Aggregate Index (Hedged USD) was being used prior to September 28, 2020. This change was made to switch the fixed income component of the custom benchmark to Bloomberg U.S. Aggregate Index (from Bloomberg Global Aggregate Index) due to the portfolios becoming more US-centric. The benchmark is used for comparative purposes only and generally reflects the risk or investment style of the product. For comparison purposes the index is fully invested, which includes the reinvestment of income. The returns for the index do not include any transaction costs, management fees or other costs.

"Pure" gross of fees returns reflect the deduction of trading costs but do not reflect any other expenses, outside of the operational expenses, and are supplemental to net returns. Performance results are presented both net and gross of total wrap fees. For periods beginning March 1, 2024, the net returns reflect the deduction of the maximum total wrap fee, which is currently 3.00% per annum or 0.250% monthly, from the "pure" gross return. Prior to March 1, 2024, the net returns reflect the deduction of the maximum total wrap fee of 1.50% per annum or 0.125% monthly, from the "pure" gross return. Effective March 1, 2024, the model fee has been retroactively changed for all periods since inception to 3.00%. A model fee is the highest wrap fee a client could pay (3.00% annually as charged by the program sponsor). The total wrap fee includes all charges for trading costs, portfolio management, custody and other administrative fees. The standard wrap fee schedule currently in effect is as follows: 3.00% on total assets. Actual fees may vary depending on, among other things, the applicable fee schedule and portfolio size. The dispersion of annual "pure" gross returns is measured by the equal-weighted standard deviation of account's "pure" gross returns included in the composite for the full year. For periods with five or fewer accounts included for the entire year, dispersion is not presented as it is not considered meaningful. The three-year annualized ex post standard deviation measures the variability of the monthly "pure" gross returns of the composite and the benchmark over the preceding 36 months. The standard deviation is not presented where there is less than 36 months of performance history. Past performance is not indicative of future results. As with any investment vehicle there is always the potential for gains as well as the possibility of losses.

All returns are expressed in U.S. dollars and are gross of nonreclaimable withholding tax, if applicable.

The following are available on request: \* Policies for valuing investments, calculating performance and preparing GIPS reports \* List of composite descriptions \* List of limited distribution pooled fund descriptions \* List of broad distribution pooled funds.

Invesco acquired Massachusetts Mutual Life Insurance Company's asset management affiliate OppenheimerFunds on May 24, 2019. Composite assets and returns prior to September 2019 represent results while it was part of OppenheimerFunds. OFI Global was GIPS verified by another firm through December 31, 2018.

In September 2023 the composite changed names from the Invesco Pinnacle Series: MF Plus 60 SMA Wrap Composite to the Invesco Strategic Active 60/40 Portfolio Wrap Composite. Consequently, the custom index name changed from the Invesco MF Plus 60/40 Custom Index to the Invesco Strategic Active 60/40 Custom Index.
