Performance quoted is past performance and cannot guarantee comparable future results; current performance may be lower or higher. Visit invesco.com/performance for the most recent month-end performance. Performance figures reflect reinvested distributions and changes in net asset value (NAV). Investment return and principal value will vary, and you may have a gain or a loss when you sell shares. Class A shares at NAV are available only to certain investors and have no sales charge; therefore, performance is at NAV. Class Y shares have no sales charge; therefore, performance is at NAV. Class R shares have no sales charge; therefore, performance is at NAV. Class R5 shares have no sales charge; therefore, performance is at NAV. Returns less than one year are cumulative; all others are annualized. Performance shown prior to the inception date of Class R6 shares is that of Class A shares and includes the 12b-1 fees applicable to Class A shares. Class R6 shares have no sales charge; therefore, performance is at NAV. Fund performance reflects any applicable fee waivers and/or expense reimbursements. Had the adviser not waived fees and/or reimbursed expenses currently or in the past, returns would have been lower. See current prospectus for more information. Index returns do not reflect any fees, expenses, or sales charges. Index source: FactSet Research Systems Inc.

The Bloomberg Barclays U.S. Aggregate Bond Index is an unmanaged index considered representative of the US investment-grade, fixed-rate bond market. An investment cannot be made directly in an index.

Effective duration is a modified duration calculation which incorporates the expected duration-shortening effect of an issuer's embedded call provision. **Weighted average effective maturity (WAM)** is a measure, as estimated by the fund's portfolio managers, of the length of time the average security in a bond fund will mature or be redeemed by its issuer. It takes into account mortgage prepayments, puts, adjustable coupons and potential call dates.

Ratings source: Standard & Poor's Rating Services (S&P), Moody's Investor Services (Moody's), Fitch Ratings (Fitch), Kroll Bond Rating Agency, Inc (Kroll), DBRS Limited (DBRS) or Morningstar Credit Ratings LLC (Morningstar), as applicable. A credit rating is an assessment provided by a nationally recognized statistical rating organization (NRSR) of the creditworthiness of an issuer with respect to debt obligations, including specific securities, money market instruments or other debts. Ratings are measured on a scale that generally ranges from AAA (highest) to D (lowest); ratings are subject to change without notices. Rating are initially measured by taking the middle of three or lower of two ratings from Moody's, S&P, or Fitch at a security level where applicable. Securities not rated by Moody's, S&P or Fitch are measured by taking the middle of three or lower of two ratings from Kroll, DBRS, or Morningstar. Not Rated indicates that the debtor was not rated and should not be interpreted as indicating low quality. For more information on the rating methodology, please visit www.standardandpoors.com and select 'Understanding Ratings' under Rating Resources on the homepage; www.moodys.com and select 'Rating Methodologies' under Research and Ratings on the homepage; www.fitchratings.com and select 'Ratings Definitions' on the homepage; www.krollbondratings.com and select 'Methodologies' under Understanding Ratings on the homepage; www.dbrs.com and select 'Understanding Ratings' on the homepage; ratingagency.morningstar.com and select 'Methodologies and Guidelines' under Ratings/Surveillance on the homepage.

About risk

An issuer may be unable to meet interest and/or principal payments, thereby causing its instruments to decrease in value and lowering the issuer's credit rating.

Derivatives may be more volatile and less liquid than traditional investments and are subject to market, interest rate, credit, leverage, counterparty and management risks. An investment in a derivative could lose more than the cash amount invested.

The risks of investing in securities of foreign issuers, including emerging markets, can include fluctuations in foreign currencies, political and economic instability, and foreign taxation issues.

Interest rate risk refers to the risk that bond prices generally fall as interest rates rise and vice versa.

Mortgage- and asset-backed securities are subject to prepayment or call risk, which is the risk that the borrower's payments may be received earlier or later than expected due to changes in prepayment rates on underlying loans. Securities may be prepaid at a price less than the original purchase value.

Obligations issued by US Government agencies and instrumentalities may receive varying levels of support from the government, which could affect the fund's ability to recover should they default.

The fund is subject to certain other risks. Please see the current prospectus for more information regarding the risks associated with an investment in the fund.
