All data provided by Invesco unless otherwise noted.

1. Based on Weighted Average Maturity (WAM). WAM represents the average time until maturity for securities in a portfolio, weighted in proportion to the dollar amount that is invested in the portfolio. WAM measures the sensitivity of fixed-income portfolios to interest rate changes. Portfolios with longer WAMs are more sensitive to changes in interest rates; shorter WAMs indicate less sensitivity.
2. If different from the Maturity Date under Rule 2a-7, the Final Legal Maturity date includes any maturity date extensions, which may be effected at the option of the issuer, or unconditional payments of principal by the issuer which may be affected at the option of the Fund, and represents the date used to calculate the Fund's weighted average life as determined under Rule 2a-7.
3. Past performance is no guarantee to future results. The security coupon/yield is not an indication of fund performance.
4. Based on Weighted Average Life (WAL). WAL represents a fund's sensitivity to changes in credit spreads and other spread risks. WAL differs from WAM, in the respect that it uses a security's final maturity date, whereas WAM uses a security's next interest rate reset date. WAL should always be equal to or greater than WAM.
5. CUSIPs may include other unique identifiers, such as the central index key (CIK), International Securities Identification Number (ISIN) or Legal Entity Identifier (LEI) or an internal identifier, if other identifiers mentioned are unavailable.
