About risk

This does not constitute a recommendation of any investment strategy or product for a particular investor. Investors should consult a financial professional before making any investment decisions.

There is no guarantee that the Fund's income will be exempt from federal and state income taxes. Municipal securities are subject to the risk that legislative or economic conditions could affect an issuer's ability to make payments of principal and/or interest. Preferred securities may be less liquid than many other securities, and in certain circumstances, an issuer of preferred securities may redeem the securities prior to a specified date. The fund's yield will vary as the short-term securities in its portfolio mature or are sold and the proceeds are reinvested in other securities. Additionally, inflation may outpace and diminish investment returns over time. Interest rate risk refers to the risk that bond prices generally fall as interest rates rise and vice versa. Income generated from the Fund is based primarily on prevailing interest rates, which can vary widely over the short- and long-term. If interest rates drop, the Fund's income may drop as well.

Fixed income products are subject to risk, including credit risk of the issuer and the effects of changing interest rates. Municipal securities are subject to the risk that litigation, legislation or other political events, local business or economic conditions or the bankruptcy of the issuer could have a significant effect on an issuer's ability to make payments of principal and/or interest. Investments concentrated in a comparatively narrow market sector can be more volatile than non-concentrated investments.

There are risks involved with investing in ETFs, including possible loss of money. Index-based ETFs are not actively managed. Actively managed ETFs do not necessarily seek to replicate the performance of a specified index. Both index-based and actively managed ETFs are subject to risk similar to stocks, including those related to short selling and margin maintenance. Ordinary brokerage commissions apply. Please be aware that the mutual funds and ETFs listed may be subject to certain additional risks. See the prospectus for complete details about the risks associated with each fund.

Shares are not individually redeemable and owners of the Shares may acquire those Shares from the Funds and tender those Shares for redemption to the Funds in Creation Unit aggregations only, typically consisting of 10,000, 20,000, 25,000, 50,000, 75,000, 80,000, 100,000 or 150,000 Shares. The funds listed are subject to certain other risks. Please see the current prospectus for more information regarding the risks associated with an investment in the fund.

Diversification does not guarantee a profit or eliminate the risk of loss.

Morningstar Inc. Ratings are based on a risk-adjusted return measure that accounts for variation in a fund's monthly performance, placing more emphasis on downward variations and rewarding consistent performance. Open-end mutual funds and exchange-traded funds are considered a single population for comparison purposes. Ratings are calculated for funds with at least a three year history. The overall rating is derived from a weighted average of three-, five- and 10-year rating metrics, as applicable, excluding sales charges and including fees and expenses. ©2026 Morningstar Inc. All rights reserved. The information contained herein is proprietary to Morningstar and/or its content providers. It may not be copied or distributed and is not warranted to be accurate, complete or timely. Neither Morningstar nor its content providers are responsible for any damages or losses arising from any use of this information. Past performance does not guarantee future results. The top 10% of funds in a category receive five stars, the next 22.5% four stars, the next 35% three stars, the next 22.5% two stars and the bottom 10% one star. Ratings are subject to change monthly. Had fees not been waived and/or expenses reimbursed currently or in the past, the Morningstar rating would have been lower. Ratings for other share classes may differ due to different performance characteristics

Before investing, investors should carefully read the prospectus and/or summary prospectus and carefully consider the investment objectives, risks, charges and expenses. For this and more complete information about the fund(s), investors should contact their advisors for a prospectus and/or summary prospectus or visit invesco.com/fundprospectus.
