What this fund does

The fund seeks to provide higher levels of tax-free income by purchasing shorter-term high yield and investment grade municipal bonds that are exempt from federal personal income taxes. As the second-largest high yield municipal bond manager, we use our size and deep experience to provide investors consistent access to bond issues.

Performance quoted is past performance and cannot guarantee comparable future results; current performance may be lower or higher. Visit [invesco.com/performance](https://www.invesco.com/performance) for the most recent month-end performance. Performance figures reflect reinvested distributions and changes in net asset value (NAV). Investment return and principal value will vary, and you may have a gain or a loss when you sell shares. Returns less than one year are cumulative; all others are annualized. Performance shown prior to the inception date of Class R6 shares is that of Class A shares and includes the 12b-1 fees applicable to Class A shares. Index sources: Invesco, FactSet Research Systems Inc. Fund performance reflects any applicable fee waivers and/or expense reimbursements. Had the adviser not waived fees and/or reimbursed expenses currently or in the past, returns would have been lower. See current prospectus for more information. Index returns do not reflect any fees, expenses, or sales charges.

Class Y and R6 shares have no sales charge; therefore, performance is at NAV. Class Y shares are available only to certain investors. Class R6 shares are closed to most investors. Please see the prospectus for more details.

Income may be subject to state and local taxes. There is no guarantee that the fund's income will be exempt from federal income taxes, including the alternative minimum tax.

The Custom Invesco Short Duration High Yield Municipal Index consists of 60% S&P Municipal Bond High Yield Index, 40% S&P Municipal Bond Short Index. An investment cannot be made directly in an index.

About Risks

All or a portion of the fund's otherwise tax-exempt income may be subject to the federal alternative minimum tax.

The fund may use leverage to seek to enhance income, which creates the likelihood of greater volatility of the fund's shares and may also impair the ability to maintain its qualification for federal income tax purposes as a regulated investment company.

The fund is subject to certain other risks. Please see the current prospectus for more information regarding the risks associated with an investment in the fund.

An issuer may be unable to meet interest and/or principal payments, thereby causing its instruments to decrease in value and lowering the issuer's credit rating.

Derivatives may be more volatile and less liquid than traditional investments and are subject to market, interest rate, credit, leverage, counterparty, and management risks. An investment in a derivative could lose more than the cash amount invested.

Interest rate risk refers to the risk that bond prices generally fall as interest rates rise and vice versa.

Junk bonds have greater risk of default or price changes due to changes in the issuer's credit quality. Junk bond values fluctuate more than high quality bonds and can decline significantly over a short time.

The portfolio may hold illiquid securities that it may be unable to sell at the preferred time or price and could lose its entire investment in such securities.

Securities which are in the medium- and lower-grade categories generally offer higher yields than are offered by higher-grade securities of similar maturity, but they also generally involve more volatility and greater risks.

The fund may invest in municipal securities issued by entities having similar characteristics, which may make the fund more susceptible to fluctuation.

Municipal securities have the risk that legislative or economic conditions could affect an issuer's ability to make principal and/or interest payments.

This does not constitute a recommendation of any investment strategy or product for a particular investor. Investors should consult a financial professional before making any investment decisions.

Note: Not all products available at all firms. Financial professionals, please contact your home office.

Ratings source: Standard & Poor's, Moody's or Fitch, as applicable. A credit rating is an assessment provided by a nationally recognized statistical rating organization (NRSRO) of the creditworthiness of an issuer with respect to debt obligations, including specific securities, money market instruments or other debts. Ratings are measured on a scale that generally ranges from AAA (highest) to D (lowest); ratings are subject to change without notice. If securities are rated differently by the rating agencies, the higher rating is applied. Not Rated indicates the debtor was not rated and should not be interpreted as indicating low quality. A negative in Cash indicates fund activity that has accrued or is pending settlement. For more information on the rating methodology, please visit www.standardandpoors.com and select 'Understanding Ratings' under Rating Resources on the homepage; www.moody.com and select 'Rating Methodologies' under Research and Ratings on the homepage; www.fitchratings.com and select 'Ratings Definitions' on the homepage.

The fund holdings are organized according to the Global Industry Classification Standard, which was developed by and is the exclusive property and service mark of MSCI Inc. and Standard & Poor's.

30 Day SEC Yield is based on a 30-day period and is computed by dividing the net investment income per share earned during the period by the maximum offering price per share on the last day of the period.

30 Day Sec Unsubsidized Yield reflects the SEC 30-day yield if the Adviser were not waiving all or part of its fee or reimbursing the fund for part of its expenses.

Taxable Equivalent Yield quoted above is based on the 2022 top federal tax rate of 40.8%, including the 3.8% tax on earned income under the Patient Protection and Affordable Care Act, as applicable. Had fees not been waived and/or expenses reimbursed, the yield would have been lower.

Option adjusted duration is a measure, as estimated by the fund's portfolio managers, of a bond fund's price sensitivity to changes in interest rates. It takes into account mortgage prepayments, puts, adjustable coupons and potential call dates.

Weighted average maturity (WAM) is a measure, as estimated by the fund's portfolio managers, of the length of time the average security in a bond fund will mature or be redeemed by its issuer. It takes into account mortgage prepayments, puts, adjustable coupons and potential call dates.
