

Invesco Rochester High Yield Municipal ETF

IROC

Fund description

Invesco Rochester High Yield Municipal ETF (fund) is an actively managed exchange-traded fund (ETF) that seeks current income exempt from federal income tax. The fund seeks to achieve its investment objective by investing, under normal market conditions, at least 75% of its net assets in higher yielding municipal securities, specifically medium-and-lower grade municipal securities. The fund will normally maintain a weighted average portfolio duration of less than 7.5 years.

Effective February 24, 2025, The Fund will invest at least 75% of its total assets in low-to medium-quality municipal securities. The Fund's name will change to "Invesco Rochester High Yield Municipal ETF." As a result of this change, the Fund will also change its ticker to "IROC."

Effective July 1, 2025 through June 30, 2026, Invesco Capital Management LLC (the "Adviser") will voluntarily waive 100% of its management fee, 0.39%, for the Fund. The Net Expense Ratio for the Fund through June 30, 2026 is 0.00%.

Returns less than one year are cumulative. Performance data quoted represents past performance. Past performance is not a guarantee of future results; current performance may be higher or lower than performance quoted. Investment returns and principal value will fluctuate and Shares, when redeemed, may be worth more or less than their original cost. See [invesco.com](https://www.invesco.com) to find the most recent month-end performance numbers. Market returns are based on the midpoint of the bid/ask spread at 4 p.m. ET and do not represent the returns an investor would receive if shares were traded at other times. Fund performance reflects fee waivers, absent which, performance data quoted would have been lower.

Fund inception: December 09, 2022

Not a Deposit Not FDIC Insured Not Guaranteed by the Bank May Lose Value Not Insured by any Federal Government Agency.

Shares are not individually redeemable and owners of the Shares may acquire those Shares from the Fund and tender those Shares for redemption to the Fund in Creation Unit aggregations only, typically consisting of 20,000 Shares.

Index returns do not represent Fund returns. An investor cannot invest directly in an index.

Neither the underlying Index nor the benchmark indexes charge management fees or brokerage expenses, and no such fees or expenses were deducted from the performance shown; nor do any of the indexes lend securities, and no revenues from securities lending were added to the performance shown. In addition, the results actual investors might have achieved would have differed from those shown because of differences in the timing, amounts of their investments, and fees and expenses associated with an investment in the Fund.

¹Custom Invesco High Yield Municipal Index is composed of 80% S&P Municipal Bond High Yield Index and 20% S&P Municipal Bond Investment Grade Index. The S&P Municipal Bond High Yield Index is considered representative of US municipal bonds that are not rated or are rated below investment grade. The S&P Municipal Bond Investment Grade Index is considered representative of investment-grade US municipal bonds.

²The S&P Municipal Bond Index is a broad, market value-weighted index that seeks to measure the performance of the U.S. municipal bond market.

Investment risks

There are risks involved with investing in ETFs, including possible loss of money. Actively managed ETFs do not necessarily seek to replicate the performance of a specified index. Actively managed ETFs are subject to risks similar to stocks, including those related to short selling and margin maintenance. Ordinary brokerage commissions apply. The Fund's return may not match the return of the Index. The Fund is subject to certain other risks. Please see the current prospectus for more information regarding the risk associated with an investment in the Fund.

The investment techniques and risk analysis used by the portfolio managers may not produce the desired results.

Interest rate risk refers to the risk that bond prices generally fall as interest rates rise and vice versa. An issuer may be unable to meet interest and/or principal payments, thereby causing its instruments to decrease in value and lowering the issuer's credit rating. The values of junk bonds fluctuate more than those of high quality bonds and can decline significantly over short time periods.

Municipal securities are subject to the risk that legislative or economic conditions could affect an issuer's ability to make payments of principal and/or interest.

The Fund may invest in municipal securities issued by entities having similar characteristics, which may make the Fund more susceptible to fluctuation.

The Fund invests in obligations, exempt from regular federal individual income taxes, of the governments of U.S. territories, commonwealths and possessions such as Puerto Rico, the U.S. Virgin Islands, Guam and the Northern Mariana Islands. As result, the Fund may be adversely affected by local political, economic, social and environmental conditions and developments, including natural disasters affecting such obligations. Certain municipalities the Fund invests in, such as Puerto Rico, have significant financial difficulties, including risk of default, insolvency or bankruptcy; and may be subject to credit rating downgrades affecting the payment of principal and interest, the market values and marketability of such municipal obligations.

Securities which are in the medium- and lower-grade categories generally offer higher yields than are offered by higher-grade securities of similar maturity, but they also generally involve more volatility and greater risks, such as greater credit, market, liquidity, management, and regulatory risks.

Derivatives may be more volatile and less liquid than traditional investments and are subject to market, interest rate, credit, leverage, counterparty and management risks. An investment in a derivative could lose more than the cash amount invested.

The Fund may engage in active and frequent trading of its portfolio securities to reflect the rebalancing of the Index.

All or a portion of the Fund's otherwise tax-exempt income may be subject to the federal alternative minimum tax.

The Fund's income may decline when interest rates fall if it holds a significant portion of short duration securities and/or securities with floating or variable interest rates. If the Fund invests in lower yielding bonds, as the bond's portfolio mature; the Fund will need to purchase additional bonds, thereby reducing its income.

Based on a Master Settlement Agreement ("MSA") with 46 states and six other US jurisdictions, large US tobacco manufacturers have agreed to make annual payments to government entities in exchange for the release of all litigation claims. Several states have sold bonds backed by those future payments, including (i) bonds that make payments only from a state's interest in the MSA and (ii) bonds that make payments from both the MSA revenue and from an "appropriation pledge" by the state which requires the state to pass a specific periodic appropriation to make the payments and is generally not an unconditional guarantee of payment by a state. Settlement payments are based on factors, including, but not limited to, annual domestic cigarette shipments, cigarette consumption, inflation and the financial capability of participating tobacco companies. Payments could be reduced if consumption decreases, if market share is lost to non-MSA manufacturers, or if there is a negative outcome in litigation regarding the MSA, including challenges by participating tobacco manufacturers regarding the amount of annual payments owed under the MSA.

The Fund is non-diversified and may experience greater volatility than a more diversified investment.

The Fund currently intends to effect creations and redemptions principally for cash, rather than principally in-kind because of the nature of the Fund's investments. As such, investments in the Fund may be less tax efficient than investments in ETFs that create and redeem in-kind.

Important information

This does not constitute a recommendation of any investment strategy or product for a particular investor. Investors should consult a financial professional before making any investment decisions.

Before investing, investors should carefully read the prospectus and consider the investment objectives, risks, charges and expenses. For this and more complete information about the fund, investors should ask their financial professionals for a prospectus or download one at invesco.com

Glossary

30 Day SEC Unsubsidized Yield reflects the 30-day yield if the investment adviser were not waiving all or part of its fee or reimbursing the fund for part of its expenses. Total return would have also been lower in the absence of these temporary reimbursements or waivers.

30 Day SEC Yield is based on a 30-day period and is computed by dividing the net investment income per share earned during the period by the maximum offering price per share on the last day of the period.

A credit rating is an assessment provided by a nationally recognized statistical rating organization (NRSRO) of the creditworthiness of an issuer with respect to debt obligations, including specific securities, money market instruments or other debts. Ratings are measured on a scale that generally ranges from AAA (highest) to D (lowest); ratings are subject to change without notice. NR indicates the debtor was not rated and should not be interpreted as indicating low quality. For more information on rating methodologies, please visit the following NRSRO websites: www.spglobal.com and select 'Understanding Credit Ratings' under Rating Resources 'About Ratings' on the homepage.; <https://ratings.moodys.io/ratings> and select 'Understanding Ratings' on the homepage.; <https://www.fitchratings.com> and select 'Ratings Definitions Criteria' under 'Resources' on the homepage. Then select 'Rating Definitions' under 'Resources' on the 'Contents' menu.

Effective Duration is a measure of a bond's sensitivity to interest rate changes that reflects the change in a bond's price given a change in yield. This duration measure is appropriate for bonds with embedded options.
