Invesco may rebalance the portfolio on a more frequent basis than noted if necessary due to changing market conditions.
The model portfolio expense ratio is a weighted average net expense ratio of the underlying holdings. The expenses do not include transaction costs. Brokerage commissions may or may not apply.
The weighted average 12 month yield represents the average income generated by the portfolio's holdings over the past 12 months, weighted by each holding's size in the portfolio. Yield reflects underlying fund fees and expenses but does not reflect advisory fees, brokerage commissions, or additional investor costs.

All investing involves risks. Understanding these risks is essential for making informed investment decisions. Equities may fluctuate in value due to company-specific events or broader market conditions, as well as economic, political, or social developments in the US or abroad. Bonds carry risks related to interest rates, inflation, and credit quality; high-yield bonds, in particular, may experience greater market fluctuations and a higher risk of loss of income and principal compared to higher-rated bonds. Investments in foreign securities, including American Depositary Receipts (ADRs), involve additional risks such as foreign currency fluctuations and potential volatility caused by adverse political, economic, or other developments, with these risks being more pronounced in emerging markets. Concentrating investments in a single industry or sector can increase risk due to lack of diversification. Real estate securities are subject to changes in the value of underlying properties, economic conditions, interest rate fluctuations, and risks associated with renting properties, such as tenant defaults. Commodities investments face risks from market price volatility, regulatory and interest rate changes, credit risk, economic shifts, and adverse political or financial factors. Managed futures are speculative and involve a high degree of risk. Exchange-Traded Funds (ETFs) carry risks that may affect their price, yield, total return, and ability to meet investment objectives; ETF shares may trade at a premium or discount to their net asset value (NAV) and may incur management fees, transaction costs, or other expenses. Mutual funds are also subject to investment risks, including the possible loss of principal, and their investment return and principal value will fluctuate, meaning that shares redeemed may be worth more or less than the original cost.

Invesco Worldwide claims compliance with the Global Investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS standards. Invesco Worldwide has been independently verified for the periods 1st January 2003 through 31st December 2025. The verification reports are available upon request. A firm that claims compliance with the GIPS standards must establish policies and procedures for complying with all the applicable requirements of the GIPS standards. Verification provides assurance on whether the firm's policies and procedures related to composite and pooled fund maintenance, as well as the calculation, presentation, and distribution of performance, have been designed in compliance with the GIPS standards and have been implemented on a firm-wide basis. Verification does not provide assurance on the accuracy of any specific performance report. GIPS® is a registered trademark of CFA Institute. CFA Institute does not endorse or promote this organization, nor does it warrant the accuracy or quality of the content contained herein.

For purposes of compliance with Global Investment Performance Standards (GIPS®), "Invesco Worldwide" refers collectively to all direct or indirect subsidiaries of Invesco Ltd. that provide discretionary investment advice with the exception of the following entities: Invesco Investment Management Ltd., Invesco Investment Advisers LLC, Invesco Asset Management Australia (Holdings) Ltd., Invesco Global Real Estate Asia Pacific, Inc., IRE (Cayman) Ltd., Invesco Senior Secured Management, Inc., Invesco Private Capital, Inc., and Invesco Capital Management LLC. Invesco Great Wall Fund Management Company Limited is compliant with GIPS but is not part of Invesco Worldwide. On 3 November 2025, Invesco completed a divestiture of its ownership in Invesco India Private Limited, resulting in the loss of controlling interest. This transaction resulted in the exclusion of Invesco India Private Limited and its associated assets from the Invesco Worldwide (IWW) GIPS firm effective that date.

The Invesco Strategic ETF 60/40 Portfolio Wrap Composite includes all discretionary accounts styled after the Invesco Strategic ETF 60/40 Model Portfolio. The portfolio seeks to achieve higher risk-adjusted returns within predefined levels of risk, over a full market cycle, by accessing strategic asset class allocations through cost-effective exchange-traded funds, which targets 60% Equity and 40% Fixed Income. The portfolio offers broad diversification across asset and sub-asset classes, and investment factors. It is also designed to deliver increased investment flexibility and customization to achieve specific investor outcomes. For periods beginning June 1, 2024, the composite is composed of 100% non-fee paying discretionary wrap accounts. Prior to June 1, 2024, the composite was composed of 100% non-fee paying discretionary institutional accounts. The historical performance results are those of the Invesco Strategic ETF 60/40 Institutional Composite. The composite is managed in comparison to, not duplication of, the benchmark. The composite was created in October 2017.

The Invesco HCB Multi Asset 60/40 Linked Index is comprised of 48% MSCI ACWI All Cap Net Return Index / 12% Russell 3000 Index / 4% Bloomberg Short Treasury Index / 30% Bloomberg US Aggregate Bond Index / 4% Bloomberg US Corporate High Yield Index / 2% JP Morgan EMBI Global Diversified Index; and is rebalanced daily. Prior to October 1, 2024, the benchmark was comprised of 60% MSCI All Country World Index (ACWI) Net Return (NR) and 40% Bloomberg U.S. Aggregate Total Return (TR) Index Unhedged. The benchmark is used for comparative purposes only and generally reflects the risk or investment style of the product. For comparison purposes the index is fully invested, which includes the reinvestment of income. The returns for the index do not include any transaction costs, management fees or other costs.

"Pure" gross of fees returns reflect the deduction of trading costs but do not reflect any other expenses, outside of the operational expenses, and are supplemental to net returns. Performance results are presented both net and gross of total wrap fees. For periods beginning March 1, 2024, the net returns reflect the deduction of the maximum total wrap fee, which is currently 3.00% per annum or 0.250% monthly, from the "pure" gross return. For periods from March 1, 2021 through February 29, 2024, the net returns reflect the deduction of the maximum total wrap fee of 1.50% per annum or 0.125% monthly, from the "pure" gross return. Prior to March 1, 2021, the net returns reflect the deduction of the maximum total wrap fee of 2.00% per annum or 0.1667% monthly, from the "pure" gross return. Effective March 1, 2024, the model fee has been retroactively changed for all periods since inception to 3.00%. A model fee is the highest wrap fee a client could pay (3.00% annually as charged by the program sponsor). The total wrap fee includes all charges for trading costs, portfolio management, custody and other administrative fees. The standard wrap fee schedule currently in effect is as follows: 3.00% on total assets. Actual fees may vary depending on, among other things, the applicable fee schedule and portfolio size. The dispersion of annual "pure" gross returns is measured by the equal-weighted standard deviation of account's "pure" gross returns included in the composite for the full year. For periods with five or fewer accounts included for the entire year, dispersion is not presented as it is not considered meaningful. The three-year annualized expost standard deviation measures the variability of the monthly "pure" gross returns of the composite and the benchmark over the preceding 36 months. The standard deviation is not presented where there is less than 36 months of performance history. Past performance is not indicative of future results. As with any investment vehicle there is always the potential for gains as well as the possibility of losses.

All returns are expressed in U.S. dollars and are gross of nonreclaimable withholding tax, if applicable.

The following are available on request: * Policies for valuing investments, calculating performance and preparing GIPS reports * List of composite descriptions * List of limited distribution pooled fund descriptions * List of broad distribution pooled funds.

In September 2023 the composite changed names from the Invesco Pinnacle Series: Smart Beta 60 SMA Wrap Composite to the Invesco Strategic ETF 60/40 Portfolio Wrap Composite.
