

Sample Portfolio

Intermediate Corporate Bond

100% SMA

As of March 14, 2025

Invesco Fixed Income

Comprehensive range of fixed income solutions with global breadth and scale

Invesco Ltd.

A leading independent global investment firm

\$1,846 billion¹

Specialized investment teams managing \$1.8 trillion in global assets

8,400+

Employees worldwide

120

On-the-ground presence serving clients in more than 120 countries

Invesco Fixed Income

Deep and experienced teams with distinct market coverage across a broad suite of capabilities

\$491 billion²

Global fixed income assets under management

182

Experienced team of investment professionals averaging 18 years in the industry

88

Research credit analysts with distinct market coverage with a global presence

Fixed Income SMAs

Disciplined active investment manager delivering cost-efficient, custom solutions

\$23.9 billion³

Fixed income SMA assets under management across 7 asset classes

16,681

Individual client accounts

30+ years

Established provider of SMAs

Source: Invesco, As of December 31, 2024

1) AUM includes all assets under advisement, distributed and overseen by Invesco. 2) This data represents Invesco Fixed Income assets globally. 3) This data represents Fixed Income SMA assets within the United States.

Custom Fixed Income SMAs

Disciplined active investment manager delivering cost-efficient, custom solutions

Custom SMAs by Invesco

Customized Framework

SMA framework with multiple options across various asset classes to enable clients to customize their individual portfolio to meet their unique needs.

Tax-Smart Strategies

Skilled investment teams who generate tax-alpha proactively for clients utilizing advanced analytics.

Personalized Service

Trusted portfolio management partners and a high-touch, personalized client service group.

Custom Fixed Income SMAs

Customized Portfolios

Utilize a thoughtful framework for clients to customize portfolios based on duration, tax situation, liquidity needs, and values.

7 asset classes, 4 duration options, 18 state-specific options

Disciplined Active Management

Seek to enhance returns through active security selection and sector allocation and implement a passive approach to duration management.

\$23.9 billion in fixed income assets under management

Technology Automation

Continuous technological improvements to drive scale and create efficient, seamless trade execution.

16,681 custom fixed income client accounts

Why Credit SMAs

Diversified asset class mix to deliver high taxable income with low volatility

Portfolio Highlights

High Taxable Yields

Investment grade high yield bonds that seek to provide additional yield above U.S. government securities

Diversified Returns

Low correlation between sectors can deliver resilient returns in periods of volatility

Active Credit Management

Allocate to select high-quality, research driven credits to help enhance returns

Portfolio Targets

Targeted Duration	3 to 4 Years
Maturity Range	0 to 12 Years
Holdings Range	50 to 75
Cash Range	0% to 5%
Currency	U.S. Dollar
Asset Allocation	100% Corporate: Investment Grade

Source: Invesco, As of December 31, 2024.

Diversification does not guarantee a profit or eliminate the risk of loss. There can be no assurance that any investment process or strategy will achieve its investment objective.

Disclosure

Definitions

Coupon - The average rate of the coupons of the bonds in the portfolio, weighted based on each holding size relative to the portfolio.

Average Credit Rating - An internal measurement created by Invesco Managed Accounts LLC and is calculated by taking the highest rated of the 3 major rating agencies (S&P, Moody's, and Fitch) at the security level. It is then changed into a numerical value, asset weighted and then calculated to be shown at the portfolio level in Standard & Poor's format. Not-rated securities are not included in the average credit rating calculation.

Current Yield - Calculated by dividing the annual coupon payment by the bond's current market price.

Effective Duration - Calculation for bonds with embedded options that takes into account that expected cash flows fluctuate as interest rates change. This figure is expressed in years.

Taxable Equivalent Yield (TEY) - Is the return that a tax-exempt bond needs to possess for its yield to equal the yield on a comparable taxable bond. This is a tool investors can use to compare the returns between a tax-free and taxable bond alternative. It is calculated by taking the tax-free bond yield and dividing it by one minus the tax rate.

High Yield Bonds - Rated below investment grade, as defined by S&P BB or below. High yield securities involve greater risk and are less liquid than higher grade issuers. Changes in general economic conditions, financial conditions of the issuers and in interest rates may adversely impact the ability of issuers to make timely payments of interest and principal.

Yield to Maturity - The yield an investor would receive if all bonds were held to maturity.

Yield to Worst - The lowest possible yield an investor can receive on a bond without the issuer defaulting.
