As of September 30, 2023

Invesco Dorsey Wright Basic Materials Momentum ETF

Fund description
The Invesco Dorsey Wright Basic Materials Momentum ETF (Fund) is based on the Dorsey Wright® Basic Materials Technical Leaders Index (Index). The Fund will normally invest at least 90% of its total assets in the securities that comprise the Index. The Index is designed to identify companies that are showing relative strength (momentum), and is composed of at least 30 securities from the NASDAQ US Benchmark Index. Relative strength is the measurement of a security's performance in a given universe over time as compared to the performance of all other securities in that universe. The Fund and the Index are rebalanced and reconstituted quarterly.

Effective after the close of markets on Aug. 25, 2023, the Fund's name changed from Invesco DWA Basic Materials Momentum ETF to Invesco Dorsey Wright Basic Materials Momentum ETF. No other changes were made to the Fund. See the prospectus for more information.

Returns less than one year are cumulative. Performance data quoted represents past performance. Past performance is not a guarantee of future results; current performance may be higher or lower than performance quoted. Investment returns and principal value will fluctuate and Shares, when redeemed, may be worth more or less than their original cost. See invesco.com to find the most recent month-end performance numbers. Market returns are based on the midpoint of the bid/ask spread at 4 p.m. ET and do not represent the returns an investor would receive if shares were traded at other times. Fund performance reflects fee waivers, absent which, performance data quoted would have been lower. As the result of a reorganization on April 6, 2018, the returns presented reflect performance of the Guggenheim predecessor fund. Invesco is not affiliated with Guggenheim.

Fund Inception: October 12, 2006

Neither the underlying Index nor the benchmark indexes charge management fees or brokerage expenses, and no such fees or expenses were deducted from the performance shown; nor do any of the indexes lend securities, and no revenues from securities lending were added to the performance shown. In addition, the results actual investors might have achieved would have differed from those shown because of differences in the timing, amounts of their investments, and fees and expenses associated with an investment in the Fund. The Dynamic Basic Materials Sector Intellidex® Index evaluates companies based on a variety of investment merit criteria, including price momentum, earnings momentum, quality, management action, and value. The Nasdaq US Benchmark Index is a float adjusted market-cap-weighted index designed to track the performance of securities to the United States.

¹S&P 500® Materials Index is an unmanaged index considered representative of the materials market.
Investment risks

There are risks involved with investing in ETFs, including possible loss of money. Shares are not actively managed and are subject to risks similar to those of stocks, including those regarding short selling and margin maintenance requirements. Ordinary brokerage commissions apply. The Fund’s return may not match the return of the Underlying Index. The Fund is subject to certain other risks. Please see the current prospectus for more information regarding the risk associated with an investment in the Fund.

Momentum style of investing is subject to the risk that the securities may be more volatile than the market as a whole or returns on securities that have previously exhibited price momentum are less than returns on other styles of investing.

Investments focused in a particular sector, such as materials, are subject to greater risk, and are more greatly impacted by market volatility, than more diversified investments.

Stocks of small and mid-sized companies tend to be more vulnerable to adverse developments, may be more volatile, and may be illiquid or restricted as to resale.

Important information

Typically, security classifications used in calculating allocation tables are as of the last trading day of the previous month.

The Global Industry Classification Standard was developed by and is the exclusive property and a service mark of MSCI, Inc. and Standard & Poor's.

There is no relationship between Dorsey, Wright & Associates, LLC ("Dorsey Wright") and Invesco other than a license by Dorsey Wright to Invesco of certain Dorsey Wright trademarks, tradenames, investment models, and indexes (the "DWA IP"). DWA IP has been created and developed by Dorsey Wright without regard to and independently of Invesco, and/or any prospective investor. The licensing of any DWA IP is not an offer to purchase or sell, or a solicitation of an offer to buy any securities. A determination that any portion of an investor's portfolio should be devoted to any ETF product developed by Invesco or investment model developed by Dorsey Wright is a determination made solely by the investment advisor serving the investor or the investor himself, not Dorsey Wright.

This does not constitute a recommendation of any investment strategy or product for a particular investor. Investors should consult a financial professional before making any investment decisions.

Before investing, investors should carefully read the prospectus and consider the investment objectives, risks, charges and expenses. For this and more complete information about the fund, investors should ask their financial professionals for a prospectus or download one at invesco.com.

Note: Not all products available through all firms or in all jurisdictions.

Glossary

30 Day SEC Unsubsidized Yield reflects the 30-day yield if the investment adviser were not waiving all or part of its fee or reimbursing the fund for part of its expenses. Total return would have also been lower in the absence of these temporary reimbursements or waivers.

30 Day SEC Yield is based on a 30-day period and is computed by dividing the net investment income per share earned during the period by the maximum offering price per share on the last day of the period.

Intraday NAV is a symbol representing estimated fair value based on the most recent intraday price of underlying assets.

Weighted Harmonic Average Stock Price-to-Book-Value Ratio (P/B Ratio) is the ratio of a stock's market price to a company's net asset value.

Weighted Harmonic Average Stock Price-to-Earnings Ratio (P/E Ratio) is the share price divided by earnings per share. It is measured on a 12-month trailing basis.

Weighted Market Capitalization is the sum of each underlying securities market value.
