Invesco International Diversification Blend Portfolio

Why invest in this portfolio

1. **Global exposure**
   Invests in a blend of equity and fixed income assets across both non-US developed and emerging markets.
2. **Core diversifier**
   Convenient and cost-effective vehicle for countering the home-country bias often present in domestic portfolios.
3. **Targeted**
   Constructed from proprietary Invesco funds designed to provide targeted exposure to styles, factors, and geographies.

Portfolio characteristics

Weighted average expense ratio	0.62%
Number of holdings	8
Weighted average 12 month yield	11.49%
Weighted average P/B	2.19
12 month trailing P/E	15.43
12 month forward P/E	11.60

Portfolio mix	(%)
International Equity	60.0
International Fixed Income	32.3
Global Fixed Income	5.7
Cash	2.0

Portfolio objective

The Invesco International Diversification Portfolios aim to solve for the home country bias in a portfolio by providing broad international exposure across market capitalizations and styles, both in developed and emerging markets.

Invesco may rebalance the portfolio on a more frequent basis than noted if necessary due to changing market conditions.
The model portfolio expense ratio is a weighted average net expense ratio of the underlying holdings. The expenses do not include transaction costs. Brokerage commissions may or may not apply.
The weighted average 12 month yield represents the average income generated by the portfolio's holdings over the past 12 months, weighted by each holding's size in the portfolio. Yield reflects underlying fund fees and expenses but does not reflect advisory fees, brokerage commissions, or additional investor costs.
All material presented is compiled from sources believed to be reliable and current, but accuracy cannot be guaranteed. This is not to be construed as an offer to buy or sell any financial instruments and should not be relied upon as the sole factor in an investment making decision. As with all investments there are associated inherent risks. This should not be considered a recommendation to purchase any investment product. This does not constitute a recommendation of any investment strategy for a particular investor. Investors should consult a financial professional before making any investment decisions if they are uncertain whether an investment is suitable for them. Please obtain and review all financial material carefully before investing. Factor investing is an investment strategy in which securities are chosen based on certain characteristics and attributes. Where cash is shown, it is for the model level. It does not include possible amounts held within each underlying fund. There can be no assurance that any investment process or strategy will achieve its investment objective. Asset allocation and diversification do not guarantee a profit or eliminate the risk of loss.

The inception date for this portfolio is April 30, 2018. Returns for 2018 are from April 30, 2018 (inception) through December 31, 2018. Past performance does not guarantee future results. An investment cannot be made directly in an index. Returns greater than 1 year are annualized. "Pure" gross of fees returns reflect the deduction of trading costs but do not reflect any other expenses, outside of the operational expenses, and are supplemental to net returns. See notes on page 4. The benchmark for this portfolio is the Invesco International Diversification Blend Custom Index.

All investing involves risks. Understanding these risks is essential for making informed investment decisions. Equities may fluctuate in value due to company-specific events or broader market conditions, as well as economic, political, or social developments in the US or abroad. Bonds carry risks related to interest rates, inflation, and credit quality; high-yield bonds, in particular, may experience greater market fluctuations and a higher risk of loss of income and principal compared to higher-rated bonds. Investments in foreign securities, including American Depositary Receipts (ADRs), involve additional risks such as foreign currency fluctuations and potential volatility caused by adverse political, economic, or other developments, with these risks being more pronounced in emerging markets. Concentrating investments in a single industry or sector can increase risk due to lack of diversification. Real estate securities are subject to changes in the value of underlying properties, economic conditions, interest rate fluctuations, and risks associated with renting properties, such as tenant defaults. Commodities investments face risks from market price volatility, regulatory and interest rate changes, credit risk, economic shifts, and adverse political or financial factors. Managed futures are speculative and involve a high degree of risk. Exchange-Traded Funds (ETFs) carry risks that may affect their price, yield, total return, and ability to meet investment objectives; ETF shares may trade at a premium or discount to their net asset value (NAV) and may incur management fees, transaction costs, or other expenses. Mutual funds are also subject to investment risks, including the possible loss of principal, and their investment return and principal value will fluctuate, meaning that shares redeemed may be worth more or less than the original cost.

Returns for 2018 are from April 30, 2018 (inception) through December 31, 2018.
Performance greater than 1 year is annualized. * "Pure" gross of fees returns reflect the deduction of trading costs but do not reflect any other expenses, outside of the operational expenses, and are supplemental to net returns. See note below.

Invesco Worldwide claims compliance with the Global Investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS standards. Invesco Worldwide has been independently verified for the periods 1st January 2003 through 31st December 2025. The verification reports are available upon request. A firm that claims compliance with the GIPS standards must establish policies and procedures for complying with all the applicable requirements of the GIPS standards. Verification provides assurance on whether the firm's policies and procedures related to composite and pooled fund maintenance, as well as the calculation, presentation, and distribution of performance, have been designed in compliance with the GIPS standards and have been implemented on a firm-wide basis. Verification does not provide assurance on the accuracy of any specific performance report. GIPS® is a registered trademark of CFA Institute. CFA Institute does not endorse or promote this organization, nor does it warrant the accuracy or quality of the content contained herein.

For purposes of compliance with Global Investment Performance Standards (GIPS®), "Invesco Worldwide" refers collectively to all direct or indirect subsidiaries of Invesco Ltd. that provide discretionary investment advice with the exception of the following entities: Invesco Investment Management Ltd., Invesco Investment Advisers LLC, Invesco Asset Management Australia (Holdings) Ltd., Invesco Global Real Estate Asia Pacific, Inc., IRE (Cayman) Ltd., Invesco Senior Secured Management, Inc., Invesco Private Capital, Inc., and Invesco Capital Management LLC. Invesco Great Wall Fund Management Company Limited is compliant with GIPS but is not part of Invesco Worldwide. On 3 November 2025, Invesco completed a divestiture of its ownership in Invesco India Private Limited, resulting in the loss of controlling interest. This transaction resulted in the exclusion of Invesco India Private Limited and its associated assets from the Invesco Worldwide (IWW) GIPS firm effective that date.

The Invesco International Diversification Blend Portfolio Wrap Composite includes all discretionary accounts styled after the Invesco International Diversification Blend Model Portfolio. The strategy seeks to provide broad international equity and fixed income exposure across market capitalizations, styles, and both developed and emerging markets. For periods beginning December 1, 2023, the composite is composed of 100% non-fee paying discretionary wrap accounts. Prior to December 1, 2023, the composite was composed of 100% non-fee paying discretionary institutional accounts. The historical performance results are those of the Invesco International Diversification Blend Portfolio Institutional Composite. The composite is managed in comparison to, not duplication of, the benchmark. The composite was created in May 2018.

The Invesco International Diversification Blend Custom Index is comprised of 60% of the MSCI All Country World Index (ACWI) ex-USA Net Return (NR) and 40% of the Bloomberg Global Aggregate ex-USD Total Return (TR) Index Value Unhedged USD. The custom index is rebalanced daily. The MSCI ACWI Index captures large and midcap representation across Developed Markets countries (excluding the US) and Emerging Markets countries. The index is computed using the net return, which withholds applicable taxes for non-resident investors. The Bloomberg Global Aggregate ex USD Index is a measure of investment grade debt from twenty-four local currency markets. This multi-currency benchmark includes treasury, government-related, corporate and securitized fixed-rate bonds from both developed and emerging markets issuers. Bonds issued in USD are excluded. The benchmark is used for comparative purposes only and generally reflects the risk or investment style of the product. For comparison purposes the index is fully invested, which includes the reinvestment of income. The returns for the index do not include any transaction costs, management fees or other costs.

"Pure" gross of fees returns reflect the deduction of trading costs but do not reflect any other expenses, outside of the operational expenses, and are supplemental to net returns. Performance results are presented both net and gross of total wrap fees. For periods beginning March 1, 2024, the net returns reflect the deduction of the maximum total wrap fee, which is currently 3.00% per annum or 0.250% monthly, from the "pure" gross return. Prior to March 1, 2024, the net returns reflect the deduction of the maximum total wrap fee of 1.50% per annum or 0.125% monthly, from the "pure" gross return. Effective March 1, 2024, the model fee has been retroactively changed for all periods since inception to 3.00%. A model fee is the highest wrap fee a client could pay (3.00% annually as charged by the program sponsor). The total wrap fee includes all charges for trading costs, portfolio management, custody and other administrative fees. The standard wrap fee schedule currently in effect is as follows: 3.00% on total assets. Actual fees may vary depending on, among other things, the applicable fee schedule and portfolio size.

6. The dispersion of annual "pure" gross returns is measured by the equal-weighted standard deviation of account's "pure" gross returns included in the composite for the full year. For periods with five or fewer accounts included for the entire year, dispersion is not presented as it is not considered meaningful. The three-year annualized expost standard deviation measures the variability of the monthly "pure" gross returns of the composite and the benchmark over the preceding 36 months. The standard deviation is not presented where there is less than 36 months of performance history. Past performance is not indicative of future results. As with any investment vehicle there is always the potential for gains as well as the possibility of losses.

All returns are expressed in U.S. dollars and are gross of nonreclaimable withholding tax, if applicable.

The following are available on request: * Policies for valuing investments, calculating performance and preparing GIPS reports * List of composite descriptions * List of limited distribution pooled fund descriptions * List of broad distribution pooled funds. Invesco acquired Massachusetts Mutual Life Insurance Company's asset management affiliate OppenheimerFunds on May 24, 2019. Composite assets and returns prior to September 2019 represent results while it was part of OppenheimerFunds. OFI Global was GIPS verified by another firm through December 31, 2018.

In September 2023 the composite changed names from the Invesco International Diversification Blend SMA Wrap Composite to the Invesco International Diversification Blend Portfolio Wrap Composite.

Invesco Advisers, Inc. is the investment adviser for this separately managed account (SMA); it provides investment advisory services to individual and institutional clients and does not sell securities. It is an indirect, wholly owned subsidiary of Invesco Ltd. The Investment Advisers Act of 1940 requires investment advisory firms, such as Invesco Advisers, Inc., to file and keep current with the Securities and Exchange Commission a registration statement of Form ADV. Part II of Form ADV contains information about the background and business practices of Invesco Advisers, Inc. Under the Commission's rules, we are required to offer to make available annually Part II of Form ADV to our clients along with our privacy policy.
