

Invesco AI and Next Gen Software ETF

IGPT
Fund description

The Invesco AI and Next Gen Software ETF (Fund) is based on the STOXX World AC NexGen Software Development Index (Index). The Fund will normally invest at least 90% of its total assets in common stocks that comprise the Index. The Index is comprised of companies with significant exposure to technologies or products that contribute to future software development through direct revenue. The Fund and the Index are rebalanced after the close of trading on the second Friday of March, June, September and December.

Effective after the close of markets on Aug. 25, 2023, the Fund's name, ticker, underlying index, index provider, investment objective, investment strategy and management changed. The Fund's name and ticker changed from Invesco Dynamic Software ETF (ticker: PSJ) to the Invesco AI and Next Gen Software ETF (ticker: IGPT). The Fund's Index Provider changed from ICE Data Indices, LLC to STOXX Ltd. and its Underlying Index changed from the Dynamic Software Intellidex Index to the STOXX World AC NexGen Software Development Index; and as a result, the Fund's objective and strategy will change to seek to track the investment results of the new Underlying Index by investing at least 90% of its total assets in securities that comprise the new Underlying Index. See the prospectus for more information. Effective at the close of markets on July 14, 2023, the Fund will effect a "3 for 1" forward split of its issued and outstanding shares. Please see the prospectus for more information.

Returns less than one year are cumulative. Performance data quoted represents past performance. Past performance is not a guarantee of future results; current performance may be higher or lower than performance quoted. Investment returns and principal value will fluctuate and Shares, when redeemed, may be worth more or less than their original cost. See [invesco.com](https://www.invesco.com) to find the most recent month-end performance numbers. Market returns are based on the midpoint of the bid/ask spread at 4 p.m. ET and do not represent the returns an investor would receive if shares were traded at other times. Fund performance reflects fee waivers, absent which, performance data quoted would have been lower. Please keep in mind that high, double-digit and/or triple-digit returns are highly unusual and cannot be sustained.

Not a Deposit Not FDIC Insured Not Guaranteed by the Bank May Lose Value Not Insured by any Federal Government Agency.

Shares are not individually redeemable and owners of the Shares may acquire those Shares from the Fund and tender those Shares for redemption to the Fund in Creation Unit aggregations only, typically consisting of 10,000 Shares.

Index returns do not represent Fund returns. An investor cannot invest directly in an index. Neither the underlying Index nor the benchmark indexes charge management fees or brokerage expenses, and no such fees or expenses were deducted from the performance shown; nor do any of the indexes lend securities, and no revenues from securities lending were added to the performance shown. In addition, the results actual investors might have achieved would have differed from those shown because of differences in the timing, amounts of their investments, and fees and expenses associated with an investment in the Fund. ¹The S&P Composite 1500 Software & Services Index consists of all software and services stocks included in the S&P Composite 1500 Index. ²The Dynamic Software Intellidex Index is comprised of common stocks of 30 US software companies.

Investment risks

There are risks involved with investing in ETFs, including possible loss of money. Shares are not actively managed and are subject to risks similar to those of stocks, including those regarding short selling and margin maintenance requirements. Ordinary brokerage commissions apply. The Fund's return may not match the return of the Underlying Index. The Fund is subject to certain other risks. Please see the current prospectus for more information regarding the risk associated with an investment in the Fund.

The Fund may engage in frequent trading of its portfolio securities in connection with the rebalancing or adjustment of the Underlying Index.

Investments focused in a particular industry, such as software, and sectors, such as information technology, are subject to greater risk, and are more greatly impacted by market volatility, than more diversified investments.

Stocks of small and mid-sized companies tend to be more vulnerable to adverse developments, may be more volatile, and may be illiquid or restricted as to resale.

The Fund is non-diversified and may experience greater volatility than a more diversified investment.

The risks of investing in securities of foreign issuers, including emerging market issuers, can include fluctuations in foreign currencies, political and economic instability, and foreign taxation issues.

Important information

Typically, security classifications used in calculating allocation tables are as of the last trading day of the previous month.

Glossary

30 Day SEC Unsubsidized Yield reflects the 30-day yield if the investment adviser were not waiving all or part of its fee or reimbursing the fund for part of its expenses. Total return would have also been lower in the absence of these temporary reimbursements or waivers.

30 Day SEC Yield is based on a 30-day period and is computed by dividing the net investment income per share earned during the period by the maximum offering price per share on the last day of the period.

Intraday NAV is a symbol representing estimated fair value based on the most recent intraday price of underlying assets.

Weighted Harmonic Average Stock Price-to-Book-Value Ratio (P/B Ratio) is the ratio of a stock's market price to a company's net asset value.

Weighted Harmonic Average Stock Price-to-Earnings Ratio (P/E Ratio) is the share price divided by earnings per share. It is measured on a 12-month trailing basis.

Weighted Average Return on Equity is net income divided by net worth.

Weighted Market Capitalization is the sum of each underlying securities market value.
