### Market overview

- + The US equity market continued its strong rebound from the March lows, with the S&P 500 Index having its best two consecutive quarters since 2009.
- + The healthy third quarter gains came despite a September selloff driven by an uptick in volatility as the US election came into focus and the timing of a COVID-19 vaccine remained uncertain.

### Positioning and outlook

- + We believe the worst of the recession is behind us, but the speed at which the economy recovers remains uncertain.
- + Our base case is that at least one of several vaccines in development will be approved in the fourth quarter of 2020 with the bulk of distribution occurring in early 2021, suggesting an end to social distancing by next spring.
- + However, we do not think a simple resumption of the previous economic trend is in the cards. Even with government assistance programs, businesses and jobs are being permanently lost, and the reallocation of people and resources in the economy will take time.
- + We maintain our valuation discipline and our focus on companies with skilled management teams that are executing better than their peers.

### Performance highlights

- + The fund's Class A shares at net asset value (NAV) returned 5.81% for the quarter, underperforming the Russell Midcap Index's return of 7.46%. (Please see the investment results table on page 2 for fund and index performance.)
- + The fund's underperformance was mainly driven by stock selection in the information technology and health care sectors. This was partially offset by stronger stock selection in the financials and real estate sectors.

### Contributors to performance

- + **Target** posted strong quarterly results as the company has been a market share gainer and has benefited as many other retailers struggle or go out of business due to the pandemic.
- + **Trane Technologies**, an industrial manufacturing company, rebounded after significantly underperforming in the second quarter. The company reported much better-than-expected quarterly results and investors were impressed by the company's ability to navigate the COVID-19 crisis and manage its cost structure. The company also benefited from renewed focus on its involvement in areas such as indoor air quality, energy management and precision temperature control for the safe movement of food, medicines and vaccines.
- + **D.R. Horton**, a homebuilder, has been well positioned to benefit from pandemic-driven secular trends, including a shift in housing demand from more populated urban centers toward suburban and other less dense geographic areas.

### Detractors from performance

- + **Magellan Midstream Partners**, primarily a refined products pipeline company, underperformed the broad market along with the rest of the energy sector. There was no significant fundamental news related to the company during the quarter, although earnings estimates for the year rose slightly.
- + **Valero**, a petroleum refiner, was also dragged down with the energy sector. Additionally, improvement in refining utilization stalled coming out of the summer driving season, particularly with more kids doing online school. This has put pressure on the company's profitability, especially given the uncertain virus outlook.
- + **Hill-Rom**, a medical technology company, reported a strong quarter. However, following the recent surge in demand for its beds and ventilators, the remainder of the year appears lackluster and company management expects capital spending by hospitals to be uneven.

**The fund's positioning versus the Russell Midcap Index**  
(% underweight/overweight)

**Investment results**

Average annual total returns (%) as of Sept. 30, 2020

Period	Class A Shares		Class C Shares		Class Y Shares	Style-Specific Index

Performance quoted is past performance and cannot guarantee comparable future results; current performance may be lower or higher. Visit [invesco.com/performance](http://invesco.com/performance) for the most recent month-end performance. Performance figures reflect reinvested distributions and changes in net asset value (NAV). Investment return and principal value will vary, and you may have a gain or a loss when you sell shares. No contingent deferred sales charge (CDSC) will be imposed on redemptions of Class C shares following one year from the date shares were purchased. Performance shown at NAV does not include applicable CDSC or front-end sales charges, which would have reduced the performance. Class Y shares have no sales charge; therefore, performance is at NAV. Returns less than one year are cumulative; all others are annualized. Fund performance reflects any applicable fee waivers and/or expense reimbursements. Had the adviser not waived fees and/or reimbursed expenses currently or in the past, returns would have been lower. See current prospectus for more information. Index returns do not reflect any fees, expenses, or sales charges. As the result of a reorganization on May 24, 2019, the returns of the fund for periods on or prior to May 24, 2019 reflect performance of the Oppenheimer predecessor fund. Share class returns will differ from the predecessor fund due to a change in expenses and sales charges.

**About risk**

Derivatives may be more volatile and less liquid than traditional investments and are subject to market, interest rate, credit, leverage, counterparty and management risks. An investment in a derivative could lose more than the cash amount invested.

In general, stock values fluctuate, sometimes widely, in response to activities specific to the company as well as general market, economic and political conditions.

Stocks of small and mid-sized companies tend to be more vulnerable to adverse developments, may be more volatile, and may be illiquid or restricted as to resale.

The fund is subject to certain other risks. Please see the current prospectus for more information regarding the risks associated with an investment in the fund.

***Before investing, investors should carefully read the prospectus and/or summary prospectus and carefully consider the investment objectives, risks, charges and expenses. For this and more complete information about the fund(s), investors should ask their advisors for a prospectus/summary prospectus or visit [invesco.com/fundprospectus](http://invesco.com/fundprospectus).***
