Market overview

+ Despite the headwinds of aggressive monetary policy tightening throughout 2022, the global economy showed strength in the first quarter of 2023 as China reopened and Europe experienced a mild winter. However, stress in the banking sector erupted in March, raising recession fears and tempering investors' sentiment toward risk. Fortunately, these issues did not appear to be systemic, and policymakers' swift response helped to calm markets. Central banks in major developed markets continued to raise interest rates, albeit at a slower pace. The US Federal Reserve and Bank of England raised their policy rates by 0.50%, while the European Central Bank hiked by 1.00%. Select central banks in emerging markets also raised rates during the quarter, but most appear to be at or near the end of their hiking cycles. As a result of changing expectations for relative growth and monetary policy, the US dollar weakened during the quarter, declining 1.1%.

Positioning and outlook

+ During the quarter, we increased currency exposure, particularly exposure to the Chilean Peso and the Malaysian Ringgit. We maintained the fund's overweight duration posture.
+ During the past quarter, a tug of war between economic growth and inflation concerns, particularly in the US, continued to exert influence on global markets. January was marked by investors' increasing willingness to take on risk and expectations that yields might have peaked. In February, strong US economic data forced market participants to confront the possibility that the terminal level for the Fed's rate increases might be higher than anticipated. However, come March, turmoil in the banking sector prompted widespread growth concerns and yet another reversal on the outlook for monetary policy. Although we do not believe there are systemic issues in the banking sector that threaten an immediate crisis, we think this episode could temper the Fed's enthusiasm for aggressive continuation of its hiking cycle. Regional banks play an important role in the US economy and fall out from the two bank failures will no doubt curb growth prospects.
+ For emerging markets, we think the initial effect of less change in developed market interest rates will be a weaker US dollar. We expect differentiation among emerging market countries will be significant in an environment of prolonged higher interest rates. Some countries are already experiencing high real rates, while others still struggle to reduce inflation. Asia, for example, may be more affected by what is happening in US yields rather than changes in growth or inflation dynamics. Meanwhile, Latin America, where rate hikes had been slowing toward the end of last year, has benefited from China's reopening, which could lead to a better growth outlook than our earlier expectations. We expect a reassertion of individual growth and inflation dynamics in each emerging market country, which would present substantial opportunities for active managers such as ourselves.

Performance highlights

+ The fund's Class A shares at net asset value (NAV) outperformed its benchmark. (Please see the investment results table on page 2 for fund and index performance.) The fund's interest rate positioning and foreign currency exposure added to relative return. The top contributors to relative return were interest rate positioning in Colombia, positioning in the Mexican Peso and positioning in the Egyptian Pound. The top detractors were positioning in the China Renminbi, interest rate positioning in Brazil and currency exposure in the Colombian Peso.

Expense ratios	% net	% total
Class A Shares	1.21	1.37
Class Y Shares	0.96	1.13
Class R Shares	1.46	1.63
Class R6 Shares	0.96	0.97
Class R5 Shares	0.96	0.97

Per the current prospectus
Net = Total annual operating expenses less any contractual fee waivers and/or expense reimbursements by the adviser in effect through at least February 29, 2024. See current prospectus for more information.

Top countries	% of total net assets
Mexico	12.96
South Africa	11.86
Brazil	11.72
Colombia	8.72
Malaysia	8.54
Indonesia	7.58
Thailand	6.57
Poland	5.90
Czech Republic	4.73
Chile	3.27

Holdings are subject to change and are not buy/sell recommendations.

Performance quoted is past performance and cannot guarantee comparable future results; current performance may be lower or higher. Visit invesco.com/performance for the most recent month-end performance. Performance figures reflect reinvested distributions and changes in net asset value (NAV). Investment return and principal value will vary, and you may have a gain or a loss when you sell shares. Class A shares at NAV are available only to certain investors and have no sales charge; therefore, performance is at NAV. Class Y shares have no sales charge; therefore, performance is at NAV. Class R shares have no sales charge; therefore, performance is at NAV. Class R6 shares have no sales charge; therefore, performance is at NAV. Returns less than one year are cumulative; all others are annualized. Performance shown prior to the inception date of Class R5 shares is that of Class A shares and includes the 12b-1 fees applicable to Class A shares. Class R5 shares have no sales charge; therefore, performance is at NAV. Fund performance reflects any applicable fee waivers and/or expense reimbursements. Had the adviser not waived fees and/or reimbursed expenses currently or in the past, returns would have been lower. See current prospectus for more information. Index returns do not reflect any fees, expenses, or sales charges. As the result of a reorganization on May 24, 2019, the returns of the fund for periods on or prior to May 24, 2019 reflect performance of the Oppenheimer predecessor fund. Share class returns will differ from the predecessor fund due to a change in expenses and sales charges.

1 Ratings source: Standard & Poor's, Moody's or Fitch, as applicable. A credit rating is an assessment provided by a nationally recognized statistical rating organization (NRSRO) of the creditworthiness of an issuer with respect to debt obligations, including specific securities, money market instruments or other debts. Ratings are measured on a scale that generally ranges from AAA (highest) to D (lowest); ratings are subject to change without notice. If securities are rated differently by the rating agencies, the higher rating is applied. Not Rated indicates the debtor was not rated and should not be interpreted as indicating low quality. A negative in Cash indicates fund activity that has accrued or is pending settlement. For more information on the rating methodology, please visit www.standardandpoors.com and select 'Understanding Ratings' under Rating Resources on the homepage; www.moodys.com and select 'Rating Methodologies' under Research and Ratings on the homepage; www.fitchratings.com and select 'Ratings Definitions' on the homepage.
Class A shares at NAV and Class Y shares are available only to certain investors. Class R shares are generally available only to employee benefit plans. Class R6 shares and Class R5 shares are primarily intended for retirement plans that meet certain standards and for institutional investors. See the prospectus for more information.
The JP Morgan Government Bond Index–Emerging Markets Global Diversified Index is a comprehensive global local emerging markets index comprising liquid, fixed-rate, domestic currency government bonds. An investment cannot be made directly in an index.
Effective duration is a modified duration calculation which incorporates the expected duration-shortening effect of an issuer's embedded call provision. **Weighted average effective maturity (WAM)** is a measure, as estimated by the fund's portfolio managers, of the length of time the average security in a bond fund will mature or be redeemed by its issuer. It takes into account mortgage prepayments, puts, adjustable coupons and potential call dates.

About risk

An issuer may be unable to meet interest and/or principal payments, thereby causing its instruments to decrease in value and lowering the issuer's credit rating.

Derivatives may be more volatile and less liquid than traditional investments and are subject to market, interest rate, credit, leverage, counterparty and management risks. An investment in a derivative could lose more than the cash amount invested.

ESG considerations may vary across investments and issuers, and not every ESG factor may be identified or evaluated for investment. The Fund will not be solely based on ESG considerations; therefore, issuers may not be considered ESG-focused companies. ESG factors may affect the Fund's exposure to certain companies or industries and may not work as intended. The Fund may underperform other funds that do not assess ESG factors or that use a different methodology to identify and/or incorporate ESG factors. ESG is not a uniformly defined characteristic and as a result, information used by the Fund to evaluate such factors may not be readily available, complete or accurate, and may vary across providers and issuers. There is no guarantee that ESG considerations will enhance Fund performance.

The risks of investing in securities of foreign issuers, including emerging markets, can include fluctuations in foreign currencies, political and economic instability, and foreign taxation issues.

Junk bonds have greater risk of default or price changes due to changes in the issuer's credit quality. Junk bond values fluctuate more than high quality bonds and can decline significantly over a short time.

Interest rate risk refers to the risk that bond prices generally fall as interest rates rise and vice versa.

The fund invests in financial instruments that use the London Interbank Offered Rate (''LIBOR'') as a reference or benchmark rate for variable interest rate calculations. LIBOR will be phased out by the end of 2021, and it's anticipated that LIBOR will cease to be published after that time. To assist with the transition, US dollar LIBOR rates will continue to be published until June 2023. There is uncertainty on the effects of the LIBOR transition process, therefore any impact of the LIBOR transition on the fund or its investments cannot yet be determined. There is no assurance an alternative rate will be similar to, produce the same value or economic equivalence or instruments using the rate will have the same volume or liquidity as LIBOR. Any effects of LIBOR transition and the adoption of alternative rates could result in losses to the fund.

The fund is considered non-diversified and may experience greater volatility than a more diversified investment.

The Fund is subject to certain other risks. Please see the current prospectus for more information regarding the risks associated with an investment in the Fund.

Before investing, investors should carefully read the prospectus and/or summary prospectus and carefully consider the investment objectives, risks, charges and expenses. For this and more complete information about the fund(s), investors should ask their financial professionals for a prospectus/summary prospectus or visit invesco.com/fundprospectus.
