Umang Khetan, CFA

Portfolio Manager Industry since 2005 B.S., University of California M.B.A. Columbia Business School

Current portfolio positioning

US financial markets were volatile in the second quarter after the Trump administration imposed broad tariffs on all imports, increasing investor anxiety and uncertainty for businesses. The US dollar weakened, yield spreads widened and recession concerns grew. Economic data confirmed a slowdown: first-quarter real gross domestic product (GDP) fell to -0.5%, the first contraction since early 2022, with weaker consumer spending and a surge in pre-tariff imports. June saw declines in personal income and spending, a sharp drop in new home sales, and rising jobless claims. Inflation stayed contained, with core personal consumption expenditures (PCE) at 2.7% year-over-year. Federal Reserve (Fed) Chair Jerome Powell signaled caution, delaying rate cuts until more data emerges, though at least one cut is expected this year.

Equity markets initially fell but rebounded strongly, with the S&P 500 Index reaching a record high and returning 10.94% for the quarter. The information technology (IT) and communication services sectors led gains, while energy and health care lagged.

The Invesco Comstock SMA portfolio outperformed the Russell 1000 Value Index for the guarter.

On the positive side, stock selection in communication services was a large relative contributor, with Meta Platforms and Walt Disney as standout performers. Stock selection in financials, notably from regional banks, also contributed to returns. In consumer staples the strategy benefited from favorable results from Philip Morris International, which aided both absolute and relative returns.

On the detractor side, stock selection and an overweight in health care hurt relative returns, notably from health care provider Elevance Health and health care equipment manufacturer Becton, Dickinson and Co. A slight overweight to energy stocks also hampered relative returns, as oil and gas stocks underperformed due to an oversupply of oil from the Organization of the Petroleum Exporting Countries and their allies (known as OPEC+) that resulted in lower oil prices.

Key overweights are health care, communication services, IT and energy. Underweights are no exposure in real estate, followed by underweights in materials, financials, utilities, industrials and consumer staples.

We continue to believe market volatility may be elevated in 2025 given the uncertainties around the policies of the new administration (notably tariffs) and geopolitical risks from global conflicts in the Middle East and Eastern Europe. Investors are also focusing on the the Fed's view on the economy and rate cut expectations. In our view, market volatility may create opportunities for patient, disciplined, long-term investors.

Definitions

Alpha Portfolio performance after adjusting for the portfolio's systematic risk.

Beta (cash adjusted) is a measure of relative risk and the slope of regression.

R-Squared Strength of linear relationship between portfolio and benchmark performance.

Information Ratio measures the risk-adjusted returns of a financial asset or portfolio relative to a certain benchmark.

Sharpe Ratio is a risk-adjusted measure calculated using standard deviation and excess return to determine reward per unit of risk. A higher Sharpe ratio indicates better risk-adjusted performance.

Up/Down Capture Evaluates how well the manager performed relative to its benchmark during periods when the benchmark return is positive / Evaluates how well the manager performed relative to the benchmark during periods when the benchmark return is negative.

Standard Deviation measures a fund's range of total returns and identifies the spread of a fund's short-term fluctuations.

This table illustrates the composition of a model portfolio as of the date listed and should not be considered as a recommendation to purchase or sell a particular security; additionally, there is no assurance that the securities purchased remain in the portfolio or that securities sold have not been repurchased. Past performance does not guarantee future results. Holdings may vary depending on program sponsor restrictions or specific client guidelines. Top 10 holdings and percentages are listed above and represent 30% of total holdings. To obtain a list of all recommendations made by Invesco Advisers, Inc. in this investment style during the last year, please contact Invesco Advisers, Inc. at 800 349 0953.

Health Care

Top quarterly contributors to /detractors from performance

AZN

Top 5 contributors	Average weight (%)	Top 5 detractors	Average weight (%)
Microsoft Corporation	2.97	UnitedHealth Group Incorporated	0.76
Meta Platforms, Inc.	2.97	Becton, Dickinson and Company	1.31
Johnson Controls International plc	2.62	Chevron Corporation	1.98
Eaton Corporation plc	1.95	ConocoPhillips	1.66
Bank of America Corporation	3.53	Elevance Health, Inc.	2.01

The holdings identified do not represent all of the securities purchased, sold or recommended for advisory clients. Past performance is not a guarantee of future results. Top 5 contributors and detractors are sorted and shown in order of the security's contribution to, or detraction from, the overall performance of the portfolio for the quarter. The average weight is also shown for each of these top 5 holdings. The holdings identified do not represent all of the securities purchased, sold or recommended for advisory clients. Past performance is not a guarantee of future results.

as of Dec. 31, 2024

Annualized compound returns

Period	"Pure" gross return* (%)	Net return (%)	Russell 1000 [®] Value Index Total Return (%)
1 Year	16.63	13.22	14.37
3 Year	9.52	6.30	5.63
5 Year	12.16	8.87	8.68
10 Year	10.07	6.83	8.49
Since Inception (6/1/2001)	7.92	4.74	7.47

Returns less than one year are not annualized.

"Pure" gross of fees returns do not reflect the deduction of trading costs or any other expenses, and are supplemental to net returns. See note 5.

- 1. Invesco Worldwide claims compliance with the Global Investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS standards. Invesco Worldwide has been independently verified for the periods 1st January 2003 through 31st December 2024. The verification reports are available upon request. A firm that claims compliance with the GIPS standards must establish policies and procedures for complying with all the applicable requirements of the GIPS standards. Verification provides assurance on whether the firm's policies and procedures related to composite and pooled fund maintenance, as well as the calculation, presentation, and distribution of performance, have been designed in compliance with the GIPS standards and have been implemented on a firm-wide basis. Verification does not provide assurance on the accuracy of any specific performance report. GIPS is a registered trademark of
- CFA Institute. CFA Institute does not endorse or promote this organization, nor does it warrant the accuracy or quality of the content contained herein.

 2. For purposes of compliance with Global Investment Performance Standards (GIPS®), "Invesco Worldwide" refers collectively to all direct or indirect subsidiaries of Invesco Ltd. that provide discretionary investment advice with the exception of the following entities: Invesco Investment Management Ltd., Invesco Investment Advisers LLC, Invesco Asset Management Australia (Holdings) Ltd., Invesco Global Real Estate Asia Pacific, Inc., IRE (Cayman) Ltd., Invesco Senior Secured Management, Inc., Invesco Private Capital, Inc., and Invesco Capital Management LLC. Invesco Great Wall Fund Management Company Limited is compliant with GIPS but is not part of Invesco Worldwide.
- 3. The Invesco Comstock SMA Wrap Composite includes all discretionary, fee-paying wrap accounts styled after the Invesco Comstock SMA Model Portfolio, which seeks capital growth and income by emphasizing a value style of investing seeking well-established, undervalued companies believed to possess the potential for capital growth and income as defined by the Russell 1000® Value Index Total Return (TR). The composite is managed in comparison to, not duplication of, the benchmark. The composite was created in June 2001.

 4. The Russell 1000 Value Index is an unmanaged index considered representative of large-cap value stocks.
- 5. "Pure" gross of fees returns do not reflect the deduction of trading costs or any other expenses and are supplemental to net returns. Performance results are presented both net and gross of total wrap fees. Net returns reflect the deduction of the maximum total wrap fee, which is currently 3.00% per annum or 0.25% monthly, from the "pure" gross return. A model fee is the highest wrap fee a client could pay (3.00% annually as charged by the program sponsor, inclusive up to a maximum investment advisory fee of 0.75%). The total wrap fee includes all charges for trading costs, portfolio management, custody and other administrative fees. The standard wrap fee schedule currently in effect is as follows: 3.00% on total assets. Actual fees may vary depending on, among other things, the applicable fee schedule and portfolio size.
- 6. The dispersion of annual "pure" gross returns is measured by the equal-weighted standard deviation of account's "pure" gross returns included in the composite for the full year. For periods with five or fewer accounts included for the entire year, dispersion is not presented as it is not considered meaningful. The three-year annualized ex-post standard deviation measures the variability of the monthly "pure" gross returns of the composite and the benchmark over the preceding 36 months. The standard deviation is not presented where there is less than 36 months of performance history. Past performance is not indicative of future results. As with any investment vehicle there is always the potential for gains as well as the possibility of losses.
- 7. All returns are expressed in U.S. dollars and are gross of nonreclaimable withholding tax, if applicable.
- 8. The following are available on request: Policies for valuing investments, calculating performance and preparing GIPS reports; List of composite descriptions; List of limited distribution pooled fund descriptions; List of broad distribution pooled funds.
