

A History of Emergent Growth Investing

Invesco Global Opportunities Fund

Quick Facts

For over two decades, Invesco Global Opportunities Fund has provided investors with exposure to emergent growth companies with transformational potential located all around the world. Our benchmark independent approach to portfolio construction and willingness to invest with conviction results in a fund that looks and acts quite differently from any index or peer product. This approach has historically resulted in strong long-term returns for our clients, though not without volatility along the way. We believe that by seeing through short-term noise to focus on long-term opportunity, we can provide the alpha² generation to help clients meet their long-term investment goals.

Morningstar Rating™

Class A shares rated 5 stars overall by Morningstar among 138 World Small/Mid Stock funds. Morningstar measures risk-adjusted returns. The overall rating is a weighted average based on the fund's 3-, 5- and 10- year rating as of 9/30/20.¹

3x the Index Return Since Manager Inception³

Relative returns, Invesco Global Opportunities Fund/MSCI ACWI, October 2, 1995 - September 30, 2020 (Class A shares at NAV)

The following is a graph of the relative returns of Invesco Global Opportunities Fund vs. the MSCI ACWI since portfolio manager inception. If the line is going up, we're outperforming, and if it's going down, we're underperforming. The strategy can underperform during discrete time periods, but it has historically bounced back strongly.

¹ Morningstar ratings are based on a risk-adjusted return measure that accounts for variation in a fund's monthly performance, placing more emphasis on the downward variations and rewarding consistent performance. Open-end mutual funds and exchange-traded funds are considered a single population for comparison purposes. Ratings are calculated for funds with at least a three year history. The overall rating is derived from a weighted average of three-, five- and 10-year rating metrics, as applicable, excluding sales charges and including fees and expenses. Had fees not been waived and/or expenses reimbursed currently or in the past, the Morningstar rating would have been lower. Class A shares received 5 stars for the overall, 3 stars for the three years, 5 stars for the five years and 5 stars for the 10 years. The fund was rated among 138, 138, 96 and 59 funds within the Morningstar World Small/Mid Stock Category of the overall period, three, five and 10 years, respectively. Morningstar ratings are as of September 30, 2020, the most recent data available, and are subject to change every month. The top 10% of funds in a category receive five stars, the next 22.5% four stars, the next 35% three stars, the next 22.5% two stars and the bottom 10% one star. Ratings for other share classes may differ due to different performance characteristics. ©2020 Morningstar, Inc. All rights reserved. ² Alpha is the measure of performance on a risk-adjusted basis. Alpha takes the volatility (price risk) of a mutual fund and compares its risk-adjusted performance to a benchmark index. The excess return of the fund relative to the return of the benchmark index is a fund's alpha.

³ As of 9/30/20. Performance quoted above includes changes in net asset value and reinvested distributions, but not the maximum applicable sales charge. If sales charge was considered, performance quoted above would be lower.

Capitalize on Structural Growth Opportunities

Invesco Global Opportunities Fund is focused on providing alpha generation to investor portfolios by buying emergent companies with substantial growth potential and holding them for the long term to allow their growth to compound over time. We believe by building a diversified portfolio across sectors, countries, and individual stocks, and focusing on long-term potential instead of short-term noise, the fund has provided some of the strongest returns in the industry while providing diversification benefits.

*20-year return for MSCI ACWI Index is using Gross Return.

Sources: Invesco, Morningstar, 9/30/20. Ranking is for Class A shares and ranking may include more than one share class of funds in the category, including other share classes of the fund. **Ranking is based on total return as of 9/30/20, without considering sales charges.** Different share classes may have different expenses and performance characteristics.

Performance quoted is past performance and cannot guarantee comparable future results; current performance may be lower or higher. Visit invesco.com/performance for the most recent month-end performance. Performance figures reflect reinvested distributions and changes in net asset value. Investment return and principal will vary, and you may have a gain or loss when you sell shares. Class Y shares have no sales charge; therefore performance is at NAV. Class R6 and Y shares are not subject to sales charge. See current prospectus for more information. As the result of a reorganization on May 24, 2019, the returns of the fund for periods on or prior to May 24, 2019 reflect performance of the Oppenheimer predecessor fund. Share class returns will differ from the predecessor fund due to a change in expenses and sales charges. Class I shares were reorganized into Class R6 shares. R6 shares are primarily intended for retirement plans that meet certain standards and for institutional investors. Y shares are generally intended for certain investors, such as wrap-fee based programs or commissionable brokerage platforms that charge sales commission.

4 As of 9/30/20. Returns based on NAV. **Past performance does not guarantee future results.**

MSCI AC World Index is a freefloat-adjusted, market-capitalization-weighted index that is designed to measure the equity market performance of developed and emerging markets.

About Risk: In general, stock values fluctuate, sometimes widely, in response to activities specific to the company as well as general market, economic and political conditions. The risks of investing in securities of foreign issuers, including emerging market issuers, can include fluctuations in foreign currencies, political and economic instability, and foreign taxation issues. Stocks of small and mid-sized companies tend to be more vulnerable to adverse developments, may be more volatile, and may be illiquid or restricted as to resale. Interest rate risk refers to the risk that bond prices generally fall as interest rates rise and vice versa. An issuer may be unable to meet interest and/or principal payments, thereby causing its instruments to decrease in value and lowering the issuer's credit rating. Junk bonds involve a greater risk of default or price changes due to changes in the issuer's credit quality. The values of junk bonds fluctuate more than those of high-quality bonds and can decline significantly over short time periods. The fund is subject to certain other risks. Please see the current prospectus for more information regarding the risks associated with an investment in the fund.

From Lipper Fund Awards from Refinitiv, ©2020 Refinitiv. All Rights reserved. Used under license. The 2020 Lipper Fund Award winners are selected based on the highest risk-adjusted performance among funds within a given category. The calculation periods extend over 36, 60, and 120 months. The highest Lipper Leader for Consistent Returns (Effective Return) value within each eligible classification determines the fund classification winner over three, five or 10 years. A high Lipper rating does not necessarily imply that a fund had the best total performance or that the fund achieved positive results for that period. Lipper Inc. is a major independent mutual fund tracking organization. Other share classes may have different performance characteristics.

Effective Sept. 30, 2020, Invesco Oppenheimer Global Opportunities Fund was renamed Invesco Global Opportunities Fund.

This does not constitute a recommendation of any investment strategy or product for a particular investor. Investors should consult a financial professional before making any investment decisions.

Before investing, investors should carefully read the prospectus and/or summary prospectus and carefully consider the investment objectives, risks, charges and expenses.
