

Invesco Global Opportunities Fund

A: OPGIX C: OGICX Y: OGIYX R6: OGIX

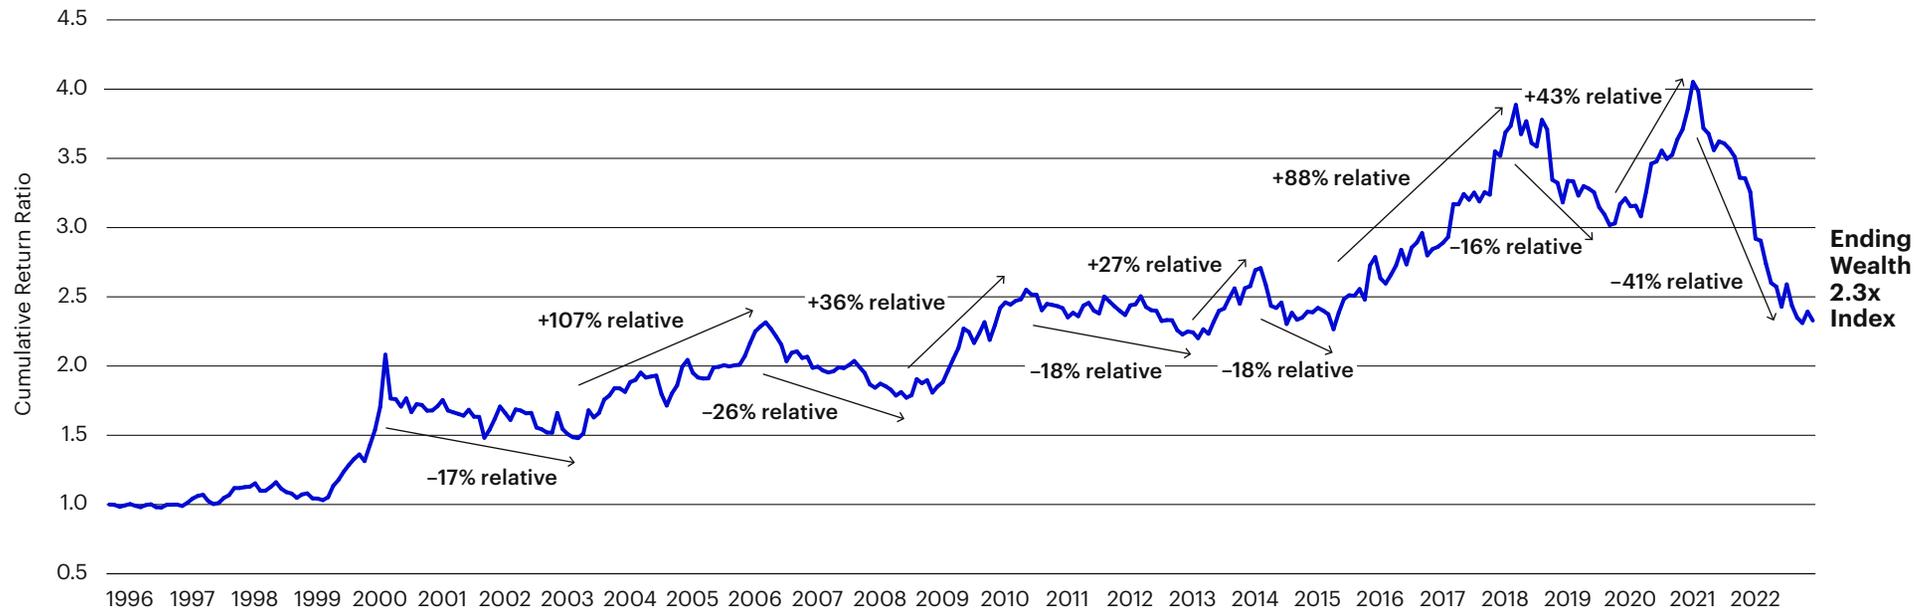

A history of emergent growth investing

For over two decades, Invesco Global Opportunities Fund has provided investors with exposure to emergent growth companies with transformational potential located all around the world. Our benchmark independent approach to portfolio construction and willingness to invest with conviction results in a fund that looks and acts quite differently from any index or peer product. This approach has historically resulted in strong long-term returns for our clients, though not without volatility along the way. We believe that by seeing through short-term noise to focus on long-term opportunity, we can provide the alpha¹ generation to help clients meet their long-term investment goals.

2.3x the index return since manager inception²

Cumulative return ratio, Invesco Global Opportunities Fund growth of 10k/MSCI ACWI growth of 10k, October 2, 1995 – December 31, 2022 (Class A shares at NAV)

The following is a graph of the Growth of 10k for Invesco Global Opportunities Fund versus the Growth of 10k for the MSCI ACWI since portfolio manager inception. If the line is going up, we're outperforming, and if it's going down, we're underperforming. The strategy can underperform during discrete time periods, but it has historically bounced back strongly.

An investment cannot be made directly in an Index. Index performance is shown for illustrative purposes only and does not predict or depict the performance of the funds. **Past performance does not guarantee future results.**

1. Alpha is the measure of performance on a risk-adjusted basis. Alpha takes the volatility (price risk) of a mutual fund and compares its risk-adjusted performance to a benchmark index. The excess return of the fund relative to the return of the benchmark index is a fund's alpha.
2. As of 12/31/22. Performance quoted above includes changes in net asset value and reinvested distributions, but not the maximum applicable sales charge. If sales charge was considered, performance quoted above would be lower.

Capitalize on Structural Growth Opportunities

Invesco Global Opportunities Fund is focused on providing alpha generation to investor portfolios by buying emergent companies with substantial growth potential and holding them for the long term to allow their growth to compound over time. We believe by building a diversified portfolio across sectors, countries, and individual stocks and focusing on long-term potential instead of short-term noise, the fund has provided some of the strongest returns in the industry while providing diversification benefits.

High conviction alpha generator in portfolio

Performance quoted is past performance and cannot guarantee comparable future results; current performance may be lower or higher. Visit [invesco.com/performance](https://www.invesco.com/performance) for the most recent month-end performance. Performance figures reflect reinvested distributions and changes in net asset value. Investment return and principal will vary, and you may have a gain or loss when you sell shares. Class Y shares have no sales charge; therefore, performance is at NAV. Class R6 and Y shares are not subject to sales charge. See current prospectus for more information. As the result of a reorganization on May 24, 2019, the returns of the fund for periods on or prior to May 24, 2019, reflect performance of the Oppenheimer predecessor fund. Share class returns will differ from the predecessor fund due to a change in expenses and sales charges. Class I shares were reorganized into Class R6 shares. R6 shares are primarily intended for retirement plans that meet certain standards and for institutional investors. Y shares are generally intended for certain investors, such as wrap-fee based programs or commissionable brokerage platforms that charge sales commission. Please keep in mind that high, double-digit and/or triple-digit returns are highly unusual and cannot be sustained.

Sources: Invesco, Morningstar, 12/31/22. Morningstar Rankings are based on total return, excluding sales charges and including fees and expenses versus all funds in the Morningstar category. Open-end mutual funds and exchange-traded funds are considered a single population for comparison purposes. Had fees not been waived and/or expenses reimbursed currently or in the past, the ranking would have been lower.

4. As of 12/31/22. Returns based on NAV. Past performance does not guarantee future results.

MSCI AC World Index is a free-float-adjusted, market-capitalization-weighted index that is designed to measure the equity market performance of developed and emerging markets. An investment cannot be made directly in an Index. Index performance is shown for illustrative purposes only and does not predict or depict the performance of the funds. Past performance does not guarantee future results.

About Risk: In general, stock and other equity securities values fluctuate, sometimes widely, in response to activities specific to the company as well as general market, economic and political conditions. To the extent the fund invests a greater amount in any one sector or industry, there is increased risk to the fund if conditions adversely affect that sector or industry. The risks of investing in securities of foreign issuers, including emerging markets, can include fluctuations in foreign currencies, political and economic instability, and foreign taxation issues. Fixed-income investments are subject to credit risk of the issuer and the effects of changing interest rates. Growth stocks tend to be more sensitive to changes in their earnings and can be more volatile. Junk bonds have greater risk of default or price changes due to changes in the issuer's credit quality. Junk bond values fluctuate more than high quality bonds and can decline significantly over a short time. Many countries in the European Union are susceptible to high economic risks associated with high levels of debt, notably due to investments in sovereign debts of European countries such as Greece, Italy and Spain. Stocks of small and mid-sized companies tend to be more vulnerable to adverse developments, may be more volatile, and may be illiquid or restricted as to resale. The fund is subject to certain other risks. Please see the current prospectus for more information regarding the risks associated with an investment in the fund.

This does not constitute a recommendation of any investment strategy or product for a particular investor. Investors should consult a financial professional before making any investment decisions.

Before investing, investors should carefully read the prospectus and/or summary prospectus and carefully consider the investment objectives, risks, charges and expenses. For this and more complete information about the fund(s), investors should ask their financial professional for a prospectus/summary prospectus or visit [invesco.com/fundprospectus](https://www.invesco.com/fundprospectus).
