

Invesco S&P 500 Low Volatility Portfolio

US Equity

Investment objective

The portfolio seeks to track the investment results (before fees and expenses) of the S&P 500® Low Volatility Index.

Portfolio description

The ETF will invest at least 90% of its total assets in the securities that comprise the Index. The Index is compiled, maintained and calculated by Standard & Poor's and consists of the 100 securities from the S&P 500® Index with the lowest realized volatility over the past 12 months. Volatility is a statistical measurement of the magnitude of up and down asset price fluctuations over time. The ETF and the Index are rebalanced and reconstituted quarterly in February, May, August and November.

The performance quoted is past performance and is not a guarantee of future results. Investment returns and principal value of an investment will fluctuate so that an account owner's units, when redeemed, may be worth more or less than their original cost. Current performance may be higher or lower than the performance data shown. For up-to-date month-end performance information please call 877 615 4116, or visit collegebound529.com. Performance figures reflect reinvested distributions of the underlying security and changes in net asset value (NAV). No contingent deferred sales charge (CDSC) will be imposed on redemptions of Class C units following one year from the date units were purchased. Performance shown at NAV does not include applicable CDSC or front-end sales charges, which would have reduced the performance. Class I units have no sales charge; therefore, performance is at NAV. Returns less than one year are cumulative; all others are annualized. Index returns do not reflect any fees, expenses, or sales charges.

About risk

Risks of the Underlying Holding

There are risks involved with investing in ETFs, including possible loss of money. Shares are not actively managed. The underlying ETF's return may not match the return of the ETF's Underlying Index. The underlying ETF is subject to certain other risks. Please see the current prospectus for more information regarding the risk associated

with an investment in the underlying ETF.

Investments focused in a particular industry or sector are subject to greater risk, and are more greatly impacted by market volatility, than more diversified investments.

There is no assurance that the Fund will provide low volatility.

Before you invest, consider whether your or the beneficiary's home state offers any state tax or other state benefits such as financial aid, scholarship funds, and protection from creditors that are only available for investments in that state's qualified tuition program.
