The performance quoted is past performance and is not a guarantee of future results. Investment returns and principal value of an investment will fluctuate so that an account owner's units, when redeemed, may be worth more or less than their original cost. Current performance may be higher or lower than the performance data shown. For up-to-date month-end performance information please call 877 615 4116, or visit collegebound529.com. Performance figures reflect reinvested distributions of the underlying security and changes in net asset value (NAV). No contingent deferred sales charge (CDSC) will be imposed on redemptions of Class C units following one year from the date units were purchased. Performance shown at NAV does not include applicable CDSC or front-end sales charges, which would have reduced the performance. Class I units have no sales charge; therefore, performance is at NAV. Class RA units have no sales charge; therefore, performance is at NAV. Returns less than one year are cumulative; all others are annualized. Index returns do not reflect any fees, expenses, or sales charges. Index sources: Invesco, FactSet Research Systems Inc. Had fees not been waived and/or expenses reimbursed in the past, returns would have been lower.

Class I units are available only to certain investors.

Effective on or about June 25, 2021, Class RA and Class RZ units are closed to new investors. Existing Account Owners holding Class RA and Class RZ units are permitted to make additional investments in those classes, respectively.

See the Program Description for more information.

The Custom Invesco CollegeBound Index reflects a benchmark composition using new underlying indexes at historical asset class weights through October 26, 2021 and new underlying indexes at new asset class weights thereafter. The Custom Invesco CollegeBound index performance reflects following the new underlying indexes: Russell 3000 Index, MSCI ACWI ex-US IMI Index, Bloomberg US Aggregate Bond Index, Bloomberg US Treasury TIPS 0-5 Years Index, Bloomberg US Corporate High Yield Index and Bloomberg U.S. Treasury Bellwethers (3M) Index. The prior Custom Invesco CollegeBound Indexes were comprised of: Russell 1000® Index, MSCI EAFE® Index, and U.S. Aggregate Index.

Asset allocation/diversification does not guarantee a profit or eliminate the risk of loss.

About Risk

In general, stock values fluctuate, sometimes widely, in response to activities specific to the company as well as general market, economic and political conditions.

Derivatives may be more volatile and less liquid than traditional investments and are subject to market, interest rate, credit, leverage, counterparty and management risks. An investment in a derivative could lose more than the cash amount invested.

An investment in exchange-traded funds (ETFs) may trade at a discount to net asset value, fail to develop an active trading market, halt trading on the listing exchange, fail to track the referenced index, or hold troubled securities. ETFs may involve duplication of management fees and certain other expenses. Certain of the ETFs the fund invests in are leveraged, which can magnify any losses on those investments.

The risks of investing in securities of foreign issuers, including emerging markets, can include fluctuations in foreign currencies, political and economic instability, and foreign taxation issues.

Junk bonds involve a greater risk of default or price changes due to changes in the issuer's credit quality. The values of junk bonds fluctuate more than those of high quality bonds and can decline significantly over short time periods.

Fixed-income investments are subject to credit risk of the issuer and the effects of changing interest rates. Interest rate risk refers to the risk that bond prices generally fall as interest rates rise and vice versa. An issuer may be unable to meet interest and/or principal payments, thereby causing its instruments to decrease in value and lowering the issuer's credit rating.

The Portfolio may invest in municipal securities issued by entities having similar characteristics, which may make the Portfolio more susceptible to fluctuation.

The use of environmental, social and governance (ESG) factors to exclude certain investments for non-financial reasons may limit market opportunities available to portfolios not using these criteria. Further, information used to evaluate ESG factors may not be readily available, complete or accurate, which could negatively impact the ability to apply ESG standards.

The portfolio is subject to the risks of the underlying investments. Market fluctuations may change the target weightings in the underlying investments and certain factors may cause the fund to withdraw its investments therein at a disadvantageous time.

The portfolio is subject to certain other risks. Please see the current Program Description for more information regarding the risks associated with an investment in the portfolio.
