Invesco Quality Income Fund

Q4 2025

Key takeaways

1 Yields shifted
Short and intermediate-maturity Treasury yields fell during the quarter. One- to five-year maturities fell between 0.01 and 0.20%, while longer maturities were relatively stable to slightly higher, resulting in steepening of the overall yield curve.

2 Inflation pressures persisted
Economic data, while limited by the US government shutdown, showed sticky inflation, with tariff-related cost pressures adding further uncertainty. These dynamics in our view increase the likelihood that the US Federal Reserve will keep monetary policy tight for an extended period.

3 Agency MBS benefited from yield curve steepening
US Agency mortgage-backed securities (MBS) had a positive return for the quarter. High coupon MBS outperformed as implied volatility declined and the yield curve steepened, which supported market segments delivering higher income.

Investment objective
The fund seeks to provide a high level of current income, with liquidity and safety of principal.

Fund facts

Fund AUM ($M)	509.90

Portfolio managers
Brian P. Norris, Clint W. Dudley, David Lyle

Manager perspective and outlook

- Structured credit sectors outperformed Treasuries and investment-grade corporate bonds this quarter.
- We favor a neutral allocation to Agency MBS because after strong performance in the third quarter, we believe valuations now appear fair relative to historical levels. Technical conditions (supply/demand balance) in our view remain supportive, but we believe the overall risk/reward profile is more balanced.

Portfolio characteristics*

Average duration (years)	5.32
Weighted average life (years)	6.74
Average weighted coupon (%)	3.26
30-day SEC yield (Class A shares)	2.92
30-day SEC unsubsidized yield (Class A shares)	-

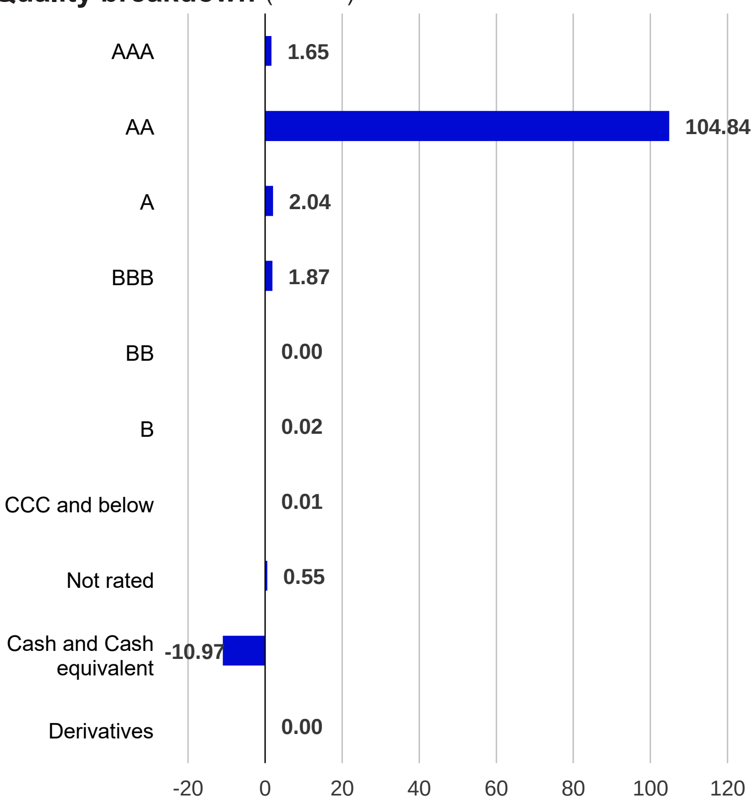
Portfolio positioning

We maintain a neutral allocation to Agency MBS, reflecting in our view fair valuations after strong recent performance.

Among 30-year mortgages, the fund remains underweight in mortgages with 1.5% - 2.0% coupons, overweight in mortgages with 2.5% - 3.0% coupons and has a neutral weight across mortgages with 3.5% - 6.5% coupons. Among 15-year mortgages, the fund is underweight in mortgages with 1.5% - 2.5% coupons and overweight in mortgages with 4.5% - 5.0% coupons.

The fund's exposure to securities not held in the benchmark continues to focus on selective opportunities across non-Agency MBS, commercial mortgage-backed securities (CMBS) and asset-backed securities (ABS).

Quality breakdown (% total)



Investment categories (%)

	Portfolio	Index
Securitized	**110.97**	**100.00**
Agency MBS	102.65	100.00
Non-Agency MBS	5.16	0.00
CMBS	1.96	0.00
ABS	1.20	0.00
Cash & Cash Equivalent	**-10.97**	**0.00**
Derivatives & FX	**0.00**	**0.00**

Performance highlights

Invesco Quality Income Fund Class A shares at net asset value (NAV) had a positive absolute return for the quarter but underperformed the benchmark.

Contributors to performance
Exposure to ABS, residential mortgage-backed securities (RMBS) and CMBS, which are not in the fund's benchmark, added to relative return.
Duration and yield curve positioning also added to relative performance.

Detractors from performance
Agency MBS detracted from relative return, primarily due to security selection in the sector. Relative to the benchmark, the fund had a neutral weighting in higher coupon Agency MBS, an area that performed well. However, the fund was overweight in Agency MBS with 2.5% - 3.0% coupons, which lagged higher coupon cohorts.

Standardized performance (%) as of December 31, 2025

		Quarter	YTD	1 Year	3 Years	5 Years	10 Years	Since Inception
Class A shares inception: 05/31/84	NAV	1.59	8.23	8.23	4.78	-0.22	1.44	5.32
	Max. Load 4.25%	-2.73	3.66	3.66	3.27	-1.09	1.00	5.21

Expense ratios per the current prospectus: Class A: Net: 0.89%, Total: 0.89%; Class R6: Net: 0.53%, Total: 0.53%; Class Y: Net: 0.65%, Total: 0.65%.

Performance quoted is past performance and cannot guarantee comparable future results; current performance may be lower or higher. Visit invesco.com for the most recent month-end performance. Performance figures reflect reinvested distributions and changes in net asset value (NAV). Investment return and principal value will vary so that you may have a gain or a loss when you sell shares. Returns less than one year are cumulative; all others are annualized. Performance includes litigation proceeds. Had these proceeds not been received, total return would have been lower Index source: RIMES Technologies Corp. Had fees not been waived and/or expenses reimbursed in the past, returns would have been lower. Performance shown at NAV does not include the applicable front-end sales charge, which would have reduced the performance.

Class Y and R6 shares have no sales charge; therefore performance is at NAV. Class Y shares are available only to certain investors. Class R6 shares are closed to most investors. Please see the prospectus for more details.

Calendar year total returns (%)

	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025

Unless otherwise specified, all information is as of 12/31/25. Unless stated otherwise, Index refers to Bloomberg US MBS Index.

Asset allocation/diversification does not guarantee a profit or eliminate the risk of loss.

The Bloomberg U.S. Mortgage Backed Securities Index represents mortgage-backed pass-through securities of Ginnie Mae (GNMA), Fannie Mae (FNMA), and Freddie Mac (FHLMC). An investment cannot be made directly in an index.

About Risk

The Fund may use leverage to seek to enhance income, which creates the likelihood of greater volatility of the Fund's shares and may also impair the ability to maintain its qualification for federal income tax purposes as a regulated investment company.

An issuer may be unable to meet interest and/or principal payments, thereby causing its instruments to decrease in value and lowering the issuer's credit rating.

Derivatives may be more volatile and less liquid than traditional investments and are subject to market, interest rate, credit, leverage, counterparty, and management risks. An investment in a derivative could lose more than the cash amount invested.

Dollar roll transactions involve the risk that the market value and yield may decline below the price of the mortgage-related securities that have been sold and are required to be repurchased.

Interest rate risk refers to the risk that bond prices generally fall as interest rates rise and vice versa.

Mortgage- and asset-backed securities are subject to prepayment or call risk, which is the risk that the borrower's payments may be received earlier or later than expected due to changes in prepayment rates on underlying loans. Securities may be prepaid at a price less than the original purchase value.

Obligations issued by US Government agencies and instrumentalities may receive varying levels of support from the government, which could affect the fund's ability to recover should they default.

The Fund is subject to certain other risks. Please see the current prospectus for more information regarding the risks associated with an investment in the Fund.

The opinions expressed are those of the fund's portfolio management, are based on current market conditions and are subject to change without notice. These opinions may differ from those of other Invesco investment professionals.

Ratings source: Standard & Poor's Rating Services (S&P), Moody's Investor Services (Moody's), Fitch Ratings (Fitch), Kroll Bond Rating Agency, Inc (Kroll), DBRS Limited (DBRS) or Morningstar Credit Ratings LLC (Morningstar), as applicable. A credit rating is an assessment provided by a nationally recognized statistical rating organization (NRSRO) of the creditworthiness of an issuer with respect to debt obligations, including specific securities, money market instruments or other debts. Ratings are measured on a scale that generally ranges from AAA (highest) to D (lowest); ratings are subject to change without notices. Ratings are initially measured by taking the middle of three or lower of two ratings from Moody's, S&P, or Fitch at a security level where applicable. Securities not rated by Moody's, S&P or Fitch are measured by taking the middle of three or lower of two ratings from Kroll, DBRS, or Morningstar. Not Rated indicates that the debtor was not rated and should not be interpreted as indicating low quality. For more information on rating methodologies, please visit www.standardandpoors.com and select 'Understanding Credit Ratings' under Rating Resources 'About Ratings' on the homepage; www.ratings.moodys.com and select 'Rating Methodologies' under Research and Ratings on the homepage; www.fitchratings.com and select 'Ratings Definitions Criteria' under 'Resources' on the homepage; www.krollbondratings.com and select 'Methodologies' under Understanding Ratings on the homepage; www.dbrs.com and select 'Understanding Ratings' on the homepage; ratingagency.morningstar.com and select 'Methodologies and Guidelines' under Ratings/Surveillance on the homepage.

*** 30-day SEC yield** is based on a 30-day period and is computed by dividing the net investment income per share earned during the period by the maximum offering price per share on the last day of the period. **30-day SEC unsubsidized yield** reflects the 30-day yield if the investment adviser were not waiving all or part of its fee or reimbursing the fund for part of its expenses. Total return would have also been lower in the absence of these temporary reimbursements or waivers. **Effective duration** is the managers' estimate of a bond fund's price sensitivity to changes in interest rates. This measure takes into account mortgage prepayments, puts, adjustable coupons and potential call dates.

Morningstar

 Past performance is no guarantee of future results. Open-end mutual funds and exchange-traded funds are considered a single population for comparison purposes. Had fees not been waived and/or expenses reimbursed currently or in the past, the ranking would have been lower. Rankings for other share classes may differ due to different performance characteristics.
