Invesco Dividend Income Fund

Why invest in this fund

1. **Upside participation; downside preservation.**
   Our team seeks to participate in up markets and mitigate risk in down markets.

2. **Focus on quality.**
   We seek companies with strong free cash flows and healthy balance sheets that drive price appreciation and sustainable dividend growth.

3. **Income generators.**
   Every company we buy is required to pay a dividend when we add them to the portfolio.

What this fund does

The fund seeks to complement investors’ income portfolios by helping investors earn income, preserve assets, and build capital. This focus on high-quality, dividend-paying stocks is designed to help buffer market volatility.

Performance quoted is past performance and cannot guarantee comparable future results; current performance may be lower or higher. Visit invesco.com for the most recent month-end performance. Performance figures reflect reinvested distributions and changes in net asset value (NAV). Investment return and principal value will vary so that you may have a gain or a loss when you sell shares. Returns less than one year are cumulative; all others are annualized. On Feb. 6, 2013, the fund’s investment strategy eliminated a requirement to concentrate its investments primarily in the securities of issuers in utilities-related industries. Results prior to Feb. 6, 2013, reflect the performance of the fund’s previous strategy. Index source: FactSet Research Systems Inc. Had fees not been waived and/or expenses reimbursed in the past, returns would have been lower. Performance shown at NAV does not include the applicable front-end sales charge, which would have reduced the performance.

Class Investor, Y and R6 shares have no sales charge; therefore, performance is at NAV. Class Y shares are available only to certain investors. Class Investor and R6 shares are closed to most investors. Please see the prospectus for more details.

The Russell 1000® Value Index is an unmanaged index considered representative of large-cap value stocks. The Russell 1000 Value Index is a trademark/service mark of the Frank Russell Co. Russell® is a trademark of the Frank Russell Co. An investment cannot be made directly in an index.
About Risk
Securities that pay high dividends as a group can fall out of favor with the market, causing such companies to underperform companies that do not pay high dividends. Also changes in the dividend policies of the companies and the capital resources available for such companies’ dividend payments may affect the fund.

The risks of investing in securities of foreign issuers can include fluctuations in foreign currencies, political and economic instability, and foreign taxation issues.

A value style of investing is subject to the risk that the valuations never improve or that the returns will trail other styles of investing or the overall stock markets.

The fund is subject to certain other risks. Please see the current prospectus for more information regarding the risks associated with an investment in the fund.

This does not constitute a recommendation of any investment strategy or product for a particular investor. Investors should consult a financial professional before making any investment decisions.

Note: Not all products available at all firms. Financial professionals, please contact your home office.

The fund holdings are organized according to the Global Industry Classification Standard, which was developed by and is the exclusive property and service mark of MSCI Inc. and Standard & Poor's.

Alpha (cash adjusted) is a measure of performance on a risk-adjusted basis. Beta (cash adjusted) is a measure of relative risk and the slope of regression. R-squared is the percentage of a fund or security’s movements that can be explained by movements in a benchmark index. Sharpe Ratio is a risk-adjusted measure calculated using standard deviation and excess return to determine reward per unit of risk. A higher Sharpe ratio indicates better risk-adjusted performance. Standard deviation measures a fund’s range of total returns and identifies the spread of a fund’s short-term fluctuations. Tracking Error is defined as the expected standard deviation of a portfolio’s excess return over the benchmark index return. The up and down capture measures how well a manager was able to replicate or improve on periods of positive benchmark returns and how severely the manager was affected by periods of negative benchmark returns.

It may not be copied or distributed and is not warranted to be accurate, complete or timely. Neither Morningstar nor its content providers are responsible for any damages or losses arising from any use of this information.

Past performance is no guarantee of future results. Open-end mutual funds and exchange-traded funds are considered a single population for comparison purposes. For factsheets that display Morningstar Star Ratings; Ratings are calculated for funds with at least a three year history. The overall rating is derived from a weighted average of three-, five- and 10- year rating metrics, as applicable, excluding sales charges and including fees and expenses. Had fees not been waived and/or expenses reimbursed currently or in the past, the Morningstar rating would have been lower. Ratings are as of the most recent quarter end and are subject to change every month. The top 10% of fund in a category receive five stars, the next 22.5% four stars, the next 35% three stars, the next 22.5% two stars and the bottom 10% one star. Ratings for other share classes may differ due to different performance characteristics.

Before investing, consider the Fund’s investment objectives, risks, charges and expenses. Visit invesco.com/fundprospectus for a prospectus/summary prospectus containing this information. Read it carefully before investing.
