Shares are not individually redeemable and owners of the Shares may acquire those Shares from the Fund and tender those Shares for redemption to the Fund in Creation Unit aggregations only, typically consisting of 50,000 Shares.

Index returns do not represent Fund returns. An investor cannot invest directly in an index. Neither the underlying Index nor the benchmark indexes charge management fees or brokerage expenses, and no such fees or expenses were deducted from the performance shown; nor do any of the indexes lend securities, and no revenues from securities lending were added to the performance shown. In addition, the results actual investors might have achieved would have differed from those shown because of differences in the timing, amounts of their investments, and fees and expenses associated with an investment in the Fund. WM/Reuters closing spot rate is the exchange rate of the U.S. dollar and the applicable foreign currency as determined by WM/Reuters as of 4:00 p.m. London Time.
Potential benefits
Investors may wish to invest in the currency in order to take advantage of short-term tactical or long-term strategic opportunities.

An investor who believes that the U.S. dollar is weakening relative to the currency may capitalize on the potential movement.

An investor who believes that the currency is overvalued relative to the U.S. dollar may choose to sell CurrencyShares, including short sales, as permitted by the Securities and Exchange Commission (SEC).

Investors are able to access the currency market through a traditional brokerage account and the shares trade daily on the NYSE Arca.

Investment risks
CurrencyShares are subject to risks similar to those of stocks and may not be suitable for all investors. The value of the Shares relates directly to the value of the Japanese Yen held by the Trust. Fluctuations in the price of the Japanese Yen could materially and adversely affect the value of the Shares.

If the Trust incurs expenses in USD, the Trust would be required to sell Japanese Yen to pay these expenses. The sale of the Trust's Japanese Yen to pay expenses in USD at a time of low Japanese Yen prices could adversely affect the value of the Shares.

If interest earned by the Trust does not exceed the Trust's expenses, the Trustee will withdraw Japanese Yen from the Trust to pay these excess expenses, which will reduce the amount of Japanese Yen represented by each Share on an ongoing basis and may result in adverse tax consequences for Shareholders.

The Japanese Yen/USD exchange rate, like foreign exchange rates in general, can be volatile and difficult to predict. This volatility could materially and adversely affect the performance of the Shares. Investment in foreign exchange related products is subject to many factors that contribute to or increase volatility, such as national debt levels and trade deficits, changes in domestic and foreign interest rates, and investors' expectations concerning interest rates, currency exchange rates and global or regional political, economic or financial events and situations.

Substantial sales of Japanese Yen by the official sector could adversely affect an investment in the Shares. The interest rate paid by the Depository, if any, may not be the best rate available. If the Sponsor determines that the interest rate is inadequate, then its sole recourse is to remove the Depository and terminate the Deposit Accounts.

The Fund is subject to certain other risks. Please see the current prospectus for more information regarding the risks associated with an investment in the Fund.

The Fund is not a mutual fund or any other type of Investment Company within the meaning of the Investment Company Act of 1940, as amended, and is not subject to regulation thereunder.

The Trust has filed a registration statement (including a prospectus) with the SEC for the offering to which this communication relates.
