

Invesco Macro Allocation Strategy Fund

Absolute Return

Mutual Fund Retail Share Classes
Data as of Sept. 30, 2019

Investment objective

The fund seeks to provide a positive absolute return over a complete economic and market cycle.

Portfolio management

Scott Wolle, Mark Ahnrud, Chris Devine, Scott Hixon, Christian Ulrich

Fund facts

Nasdaq A: GMSDX C: GMSEX Y: GMSHX
R: GMSJX R6: GMSLX R5: GMSKX
Total Net Assets \$27,658,877
Distribution Frequency Annually

Expense ratios	% net	% total
Class A Shares	1.47	2.23
Class C Shares	2.22	2.98
Class Y Shares	1.22	1.98

Per the current prospectus

Net = Total annual operating expenses less any contractual fee waivers and/or expense reimbursements by the adviser in effect through at least Feb. 29, 2020 and contractual management fee waivers in effect through at least June 30, 2020. See current prospectus for more information.

Gross performance attribution

	Since Oct. 1, 2012 (annualized)	
	Quarter	
Equities	-0.04%	2.15%
Fixed Income	-0.27%	1.51%
Commodities	1.26%	-0.44%
Strategic Exposure	-0.06%	1.08%
Cash	0.57%	0.75%
Total	1.46%	5.05%

Returns are gross of fund expenses; net returns will be lower. Cash represents fund collateral used to support derivative positions.

Target portfolio asset positions

Equities	38.18%
Fixed Income	67.53%
Commodities	-25.66%

The fund's strategic allocation targets an equal risk contribution (33%) from within and across each of the portfolio's three asset classes to the overall portfolio risk. The Target Portfolio Asset Positions shown, which are applied monthly, seeks to overweight, underweight or maintain those strategic positions depending on a select group of factors such as valuations, the current economic environment and investor positioning. Total portfolio asset weight greater than 100% is achieved through derivatives and other instruments that create leverage.

An actively managed strategy providing exposure to stocks, bonds and commodities, using a risk-balanced approach. The fund seeks to participate meaningfully during periods of economic strength and to protect during periods of economic stress.

Performance of a \$10,000 investment

Class A shares at NAV (Aug. 28, 2013 - Sept. 30, 2019)

■ Invesco Macro Allocation Strategy Fund - \$12,036

Investment results

Performance quoted is past performance and cannot guarantee comparable future results; current performance may be lower or higher. Visit invesco.com/performance for the most recent month-end performance.

Performance figures reflect reinvested distributions and changes in net asset value (NAV). Investment return and principal value will vary, and you may have a gain or a loss when you sell shares. Performance shown prior to the inception date of Class A shares is that of Class Y shares and includes the higher 12b-1 fees applicable to Class A shares. No contingent deferred sales charge (CDSC) will be imposed on redemptions of Class C shares following one year from the date shares were purchased. Performance shown at NAV does not include applicable CDSC or front-end sales charges, which would have reduced the performance. Performance shown prior to the inception date of Class C shares is that of Class Y shares and includes the higher 12b-1 fees applicable to Class C shares. Class Y shares have no sales charge; therefore, performance is at NAV. On Aug. 28, 2013, Class H1 shares were renamed Class Y shares. Performance shown prior to Aug. 28, 2013, is that of Class H1 shares. Returns less than one year are cumulative; all others are annualized. Fund performance reflects any applicable fee waivers and/or expense reimbursements. Had the adviser not waived fees and/or reimbursed expenses currently or in the past, returns would have been lower. See current prospectus for more information. Index returns do not reflect any fees, expenses, or sales charges.

Calendar year total returns (%)

Class A shares at NAV

	2009	2010	2011	2012	2013	2014	2015	2016	2017	2018	YTD
	-	-	-	-	2.43	4.51	-3.32	9.02	7.30	-3.75	3.30

Inception year is 2013. Return for inception year 2013 is a partial-year return.

Class Y shares are available only to certain investors. See the prospectus for more information.

Under normal conditions, the strategy invests in derivatives and other financially-linked instruments whose performance is expected to correspond to US and international fixed income, equity and commodity markets. However, the performance of the asset classes cannot be guaranteed. The derivative investments and enhanced investment techniques (such as leverage) used by the portfolio are subject to greater risks than those associated with investing directly in securities or more traditional instruments.

The Bloomberg Barclays 3-Month Treasury Bellwether Index is unmanaged market considered representative of US treasury

About risk

Commodities may subject an investor to greater volatility than traditional securities such as stocks and bonds and can fluctuate significantly based on weather, political, tax, and other regulatory and market developments.

An issuer may be unable to meet interest and/or principal payments, thereby causing its instruments to decrease in value and lowering the issuer's credit rating.

Should the Fund's asset classes or the selected countries and investments become correlated in a way not anticipated by the Adviser, the risk allocation process may result in magnified risks and loss instead of balancing (reducing) the risk of loss.

Derivatives may be more volatile and less liquid than traditional investments and are subject to market, interest rate, credit, leverage, counterparty and management risks. An investment in a derivative could lose more than the cash amount invested.

The risks of investing in securities of foreign issuers, including emerging markets, can include fluctuations in foreign currencies, political and economic instability, and foreign taxation issues.

Interest rate risk refers to the risk that bond prices generally fall as interest rates rise and vice versa.

The fund is considered non-diversified and may experience greater volatility than a more diversified investment.

Short sales may cause an investor to repurchase a security at a higher price, causing a loss. As there is no limit on how much the price of the security can increase, exposure to potential loss is unlimited.

By investing in the subsidiary, the fund is indirectly exposed to risks associated with the subsidiary's investments, including derivatives and commodities. Because the subsidiary is not registered under the Investment Company Act of 1940, the fund will not have the protections offered to investors in US registered investment companies.

Investments may appreciate or decrease significantly in value over short periods of time and cause share values to experience significant volatility over short periods of time.

The fund is subject to certain other risks. Please see the current prospectus for more information regarding the risks associated with an investment in the fund.
